

MACROASIA CORPORATION
December 31, 2014

SEC Form 17-A
ANNUAL REPORT PURSUANT TO SECTION 17 OF THE
SECURITIES REGULATION CODE AND SECTION 141
OF THE CORPORATION CODE OF THE PHILIPPINES

1. For the fiscal year ended December 31, 2014
2. Commission Identification Number 40524
3. BIR tax Identification No. 004-666-098
4. Exact name of issuer as specified in its charter MACROASIA CORPORATION
5. City of Makati
Province, Country or other jurisdiction
of incorporation or organization
6. (SEC Use Only)
Industry Classification Code
7. 12th Floor PNB Allied Bank Center, 6754 Ayala Avenue, Makati City 1226
Address of Issuer's Principal office Postal Code
8. (632) 840-2001
Issuer's telephone number including area code
9. N/A
Former name, former address, and former fiscal year, if changed since last report

b) Securities registered pursuant to Sections 8 and 12 of the Code, or Sections 4 and 8 of the RSA

<u>Title of Each Class</u>	<u>Number of Shares of Common Stock Outstanding and Amount of Debt Outstanding</u>
Common Stock, ₱1 par value	1,233,404,000 outstanding shares

b) Are any or all of the securities listed on a Stock Exchange?

Yes [] No []

Name of Stock Exchange Class
Philippine Stock Exchange **Common Stock**

12. Indicate by check mark whether the registrant:
(a) has filed all reports required to be filed by Section 17 of the Code and RSA Rule 17 thereunder or Sections 11 of the RSA and RSA Rule 11(a)-1 thereunder, and Sections 26 and 141 of the Corporation Code of the Philippines, during the preceding twelve (12) months (or for such shorter period the registrant was required to file such reports);

Yes [] No []

b) has been subject to such filing requirements for the past 90 days.

Yes [] No []

13. Aggregate market value of the voting stock held by non-affiliates: ₱ 711,475,100 (290,398,000 shares @ ₱2.45 per share as of December 31, 2014)

PART I. BUSINESS AND GENERAL INFORMATION

This report contains references to MacroAsia Corporation and its subsidiaries – MacroAsia Catering Services, Inc., MacroAsia Airport Services Corporation, MacroAsia Properties Development Corporation, MacroAsia Air Taxi Services, Inc., and MacroAsia Mining Corporation, collectively referred to as the “Group”. Any references to “MacroAsia”, “MAC” and “Company” mean MacroAsia Corporation, the parent company, not including its subsidiaries.

ITEM 1. DESCRIPTION OF BUSINESS

A. Business Development

1. Corporate History

Originally under the name Infanta Mineral & Industrial Corporation, MacroAsia Corporation (the Company or MAC) was incorporated in the Philippines on February 16, 1970 to engage in the business of geological exploration and development. As a mining firm, it had exported to Japan, nickel ore from its mine in Brooke’s Point, Palawan during the 1970’s. On January 26, 1994, its Articles of Incorporation was amended to change its primary purpose from geological exploration and development to that of engaging in the business of a holding company and to change its corporate name to Cobertson Holdings Corporation. On November 6, 1995, the SEC approved the amendment to the Company’s Articles of Incorporation to change its name from Cobertson Holdings Corporation to its present name, MacroAsia Corporation.

In June 1996, the Company incorporated two of its 100% wholly-owned subsidiaries namely: MacroAsia Properties Development Corporation (MAPDC), which operates the only special economic zone at the Ninoy Aquino International Airport (NAIA) and MacroAsia Air Taxi Services, Inc. (MAATS), which provides helicopter chartering services. The Company started its first in-flight catering business in August of 1996 through its associate - Cebu Pacific Catering Services, Inc. (CPCS), the only full-service airline catering company in Mactan-Cebu International Airport (MCIA) today. By November 1996, the Company incorporated its second in-flight catering venture, MacroAsia Catering Services, Inc. (MACS), which is the dominant caterer of foreign airlines in NAIA since it operated in 1998. Another subsidiary, MacroAsia Airport Services Corporation (MASCORP) was incorporated in 1997 to service the ground handling requirements of commercial passenger, cargo and military aircrafts.

Lufthansa Technik Philippines, Inc. – A Joint Venture with MacroAsia Corporation (LTP), an associate, was incorporated in December 1999, to do aircraft maintenance, repair and overhaul (MRO) in NAIA. With its facilities, LTP is a globally competitive company offering aircraft and engine maintenance, repair, and overhaul in the Philippines, with airline clients from almost all parts of the world.

MacroAsia Mining Corporation (MMC), another wholly owned subsidiary, was incorporated on September 25, 2000 to be an institutional vehicle through and

under which the business of a mining enterprise may be explored, established, operated and maintained.

In the medium-term, the Company's growth and expansion is seen to continue, focused principally still on aviation-related services, but also tapping into the growing non-airline markets for food business in the Philippines. The Company also remains committed to optimize its mining assets, a legacy from its history as a mine operator in the 1970's. Within the next year, the Company foresees that revenues will also be derived from its water projects, as it is currently investing on waterworks systems to service the requirements of some towns outside of Metro Manila.

Growth will be driven principally by further internal growth of its current operating subsidiaries and affiliates. LTP, the aircraft maintenance, repair and overhaul affiliate will continue to place the Philippines in the global map of MRO providers with its recent capacity expansion that added a new hangar for Airbus 380 repair. LTP will continue its business model which centers on base maintenance (heavy repair) of wide-body aircrafts. These LTP projects will require further investments in manpower, technology and hangar space. MASCORP, the ground-handling subsidiary, continues to expand through the quest for new airline contracts and growth in its service capability, including airports outside of NAIA. After growing in Mactan, Cebu, MASCORP has already established a presence in Kalibo International Airport, and will continue to expand in secondary airports in the Philippines. MACS, the airline catering subsidiary in NAIA, will expand its infrastructure to accommodate its growing business, as it continues to service new airline clients and to increase its revenue portfolio from non-airline catering. MACS will be opening a food commissary outside of the airport in order to service the requirements of non-airline clients. The project is estimated to be completed within 7-10 months from the commencement of the construction and renovation of the properties in Sucat, Muntinlupa owned MAPDC. MAPDC, the Company's property development subsidiary, is expanding its presence outside of NAIA, and is in the process of establishing its presence in Mactan, Cebu. Apart from developing the Sucat property for MACS commissary, MAPDC will also serve as a vehicle to develop water projects (bulk and retail supply of treated surface water) in the Philippines.

MAATS, the helicopter chartering subsidiary, is also seen to grow as it secures new contracts with mining companies for airborne survey exploration programs, and expands its marketing network for charter services for corporate clients and individuals. MAATS has also added new services for fixed-based aircraft operations, like auxiliary service support of executive jets and Philippine permitting requirements of fixed-wing aircraft operators with no commercial presence in the Philippines.

The Company's principal mining project is basically a reactivation of the Infanta Nickel Mine that was operational in the 1970's. This project, which is already the subject of an exploration report that is compliant with Philippine Mineral Reporting Code (PMRC) is expected to generate revenues as soon as all the mining permits for operations are secured. The mining project has already been endorsed for

operations by the local government units and the Palawan Council for Sustainable Development (PCSD), and has been granted the Environmental Compliance Certificate (ECC) for operations on September 13, 2010. The Company is still securing its Certificate of Precondition (CP) from the National Commission on Indigenous People (NCIP). This document signifies the formal granting of Free and Prior Informed Consent by the indigenous people within the host barangays as attested by the NCIP. Today, MMC is providing outsourced exploration services to third party clients.

2. Bankruptcy, Receivership or Similar Proceedings

Except as stated in the succeeding paragraphs and in the discussion for each of the Company's subsidiaries and associates, there has been no other business development such as bankruptcy, receivership or similar proceedings not in ordinary course of business that affected MacroAsia and its subsidiaries or associates for the past three (3) years.

3. Material Reclassification, Merger, Consolidation, or Purchase or Sale of Significant Amount of Assets (not in the ordinary course of business)

On July 11, 2011, the Group acquired 70% of the shares of stock of WBSI which amounted to ₱3.3 million pursuant to a share purchase agreement between the Company and the stockholders of WBSI. On the same date, MAPDC entered into a sale and purchase agreement for the acquisition of the Maragondon Bulk Water Supply Project from ICH. Prior to the Group's acquisition of WBSI shares, WBSI assigned and transferred its rights over the Water Project to ICH. On September 15, 2011, MAPDC signed sale agreements, respectively with shareholders of WBSI and ICH, related to the acquisition of additional 12.6% shares in WBSI and the corresponding rights to the Maragondon Bulk Water Supply Project. Total payments made to WBSI former stockholders for the water rights as of December 31, 2013 amounted to ₱15.8 million.

Having regard to the substance of the agreements, the acquisition of WBSI shares is deemed to be linked to the acquisition of the water project from ICH and as such, the acquisition is treated as one transaction for accounting purposes. As of December 31, 2013, the acquisition of the Water Project has not yet been consummated in view of certain water permits inherent in the project that are yet to be secured. As such, the Group accounted for its investment in WBSI shares and payments made to WBSI former stockholders totaling to ₱19.1 million as "Project advances and investment" in view of the Group's right to refund from WBSI stockholders the total payments made if the water permits inherent in the project are not secured.

In 2014, the Group entered into a compromise agreement with the former stockholders of WBSI where a final consideration for the Water Project was agreed. The reduced consideration is due to the unsecured permits which are still unavailable as of date of the compromise agreement. The compromise agreement

confirmed the Group's control over WBSI. Accordingly, the Group accounted for WBSI as its subsidiary. For a more detailed discussion, please see Note 14 of the consolidated financial statements.

In December 2012, MacroAsia Corporation purchased stocks subscriptions of all the previous minority shareholders of MacroAsia Mining Corporation, increasing its shareholdings from 67% to 100% of the Corporation.

B. Business of the Issuer

MacroAsia Corporation (MAC) began commercial operations as a holding company under its amended charter in 1996.

The Group's revenues at present are derived primarily from aviation-related support businesses. It provides aircraft maintenance, repairs and overhaul (MRO) services, in-flight catering services, airport ground handling services, charter flight services, and operates a special economic zone at the Ninoy Aquino International Airport (NAIA). Non-airline sources of income for the group includes catering for institutional clients and rendering of exploratory drilling services for 3rd party clients.

All subsidiaries and associated companies of MAC render services directly to the airline customers/locators at NAIA, Manila Domestic Airport (MDA), Diosdado Macapagal International Airport (DMIA), MCIA and Kalibo International Airport generating both local and export revenues. For the past three years, an average of 79% of the total gross operating revenues reported represented revenues from foreign airlines that fly to the Philippines.

MAC continues to operate mainly through its five (5) subsidiaries and two (2) affiliates, as fully discussed below.

MacroAsia Catering Services, Inc.

MacroAsia Catering Services, Inc. (MACS), the first fully functional In-flight Catering facility located inside the premises of NAIA, was incorporated on November 5, 1996, then with a corporate name of MacroAsia-Eurest Catering Services, Inc. (MECS), to primarily provide in-flight catering services at the NAIA and the Manila Domestic Airport. When MACS started its commercial operations on September 1, 1998, it was a joint venture between MAC (67%) and two foreign partners: Singapore Airport Terminal Services (SATS, at 20%) and Compass Group International B.V. (then known as Eurest International B.V., at 13%). By mutual agreement of the three JV partners, a sale and purchase agreement with Compass Group International B.V. was executed on June 28, 2006 whereby MAC acquired the 13% shareholdings of the Compass Group. Since then, MACS continues to operate as a joint venture between MAC (80%) and SATS (20%) under its official company name of MacroAsia Catering Services Inc.

MACS' in-flight kitchen facility is situated in a two-hectare lot being leased from the Manila International Airport Authority (MIAA). MACS' operations is under a concession agreement with MIAA that grants the right to operate an in-flight catering service for civil and/or military aircraft operating at the NAIA and/or the Manila Domestic Airport. MACS secures such right by remitting the monthly Concessionaire's Privilege Fee (CPF) which is 7% of its gross income.

MACS consistently complies with both local and international hygiene standards and environmental regulations. Its distinction lies in being the only in-flight airline caterer in the Philippines that holds an ISO certification on top of its HACCP and HALAL certificates conferred by independent and professional certifying organizations. To ensure that high standards are maintained at all times, MACS maintains an in-house laboratory manned by registered microbiologists and equipped for basic to advanced microbiological testing.

Capturing more than 63% of the in-flight catering market, MACS is the catering service provider to 13 full-service foreign carriers. It also caters 2 cargo freighters, 10 VIP and General Aviation clients, 2 airport lounges and 4 institutional accounts. MACS has been the recipient of several awards and commendations for outstanding service, besting other service providers from all over the world. In 2014, it received the Gold Award in Cathay Pacific's Caterers' Performance Recognition Program (CPRP) for 2013, indicating that MACS ranking 2nd among 46 catering stations in the Cathay Pacific network, worldwide. Also during 2014, MACS was recognized by All Nippon Airways (ANA), as the "Gold Award winner for The Best Short Haul Caterer 2013", besting 13 other caterers in ANA's short-haul network two years in a row. MACS was also recognized as a Merit Winner for Singapore Airlines' 2013 Excellence in Catering Award.

MACS has a wide suppliers base, both local and international and it is not dependent on any single raw material supplier. MACS operates a bonded warehouse facility inside NAIA under a Bonded Warehouse License. Based on its quality standards, regular supplier quality audits (SQA) are conducted by MACS' Quality and Food Safety Department at the supplier's premises to inspect and verify the compliance to its manufacturing and supply standards.

Most of MACS' trade revenues are denominated in US dollars. In 2014, 2013, and 2012, this subsidiary's sales contributions to MAC's consolidated gross operating revenues were 61%, 62% and 61%, respectively. MACS' airline clients include Air Niugini (PX), All Nippon Airways (NH), Cathay Pacific (CX), China Airways (CI), Dragon Air (KA), Emirates (EK), Etihad Airways (EY), Japan Airlines (JL), Korean Air (KE), Qantas Airways (QF), Qatar Airways (QR), Saudia Airlines (SV) and Singapore Airlines (SQ), among others. MACS is also the preferred caterer for VIP flights from NAIA. MACS delivers close to 4 million meals per annum, at an average production of about 10,500 meals a day. It services an average of 30 international flights a day, serving more than half of the foreign airlines that fly to Manila.

As of December 31, 2014, MACS has a core manpower complement of 288 individuals (42 workers higher than 2013), excluding staff contracted from external providers. Of the total manpower count, 168 are regular employees.

MACS is not aware of any existing or probable government regulations that would have an adverse impact on its on-going operations. It has no research and development activities/costs during the last three fiscal years.

MacroAsia Airport Services Corporation

MacroAsia Airport Services Corporation (MASCORP) was incorporated on September 12, 1997 to provide, manage, promote and/or service any and all ground handling requirements of military and/or commercial aircraft for passengers and cargo. MASCORP commenced its ground handling operations on April 19, 1999 at the NAIA, and has been generating both domestic and export sales. As of December 31, 2014, its work force consisted of 736 staff, 19% higher compared to last year, with 161 regular employees.

On June 15, 1999 the company originally signed a joint venture agreement with Ogden Aviation Philippines B.V. to expand its international resource. Ogden Aviation Philippines B.V. was subsequently acquired by Menzies Aviation Group in 2001. By April 12, 2007, MAC acquired the 30% share of Menzies making MASCORP a wholly owned subsidiary of MAC.

On July 2, 1999, a wholly-owned subsidiary of MASCORP, Airport Specialists' Services Corporation (ASSC), was incorporated primarily to manage and to promote, service and/or provide manpower support for any and/or all ground handling requirements of private, military and/or commercial aircraft. ASSC commenced operations immediately after its incorporation but had ceased operations shortly thereafter. Toward the end of 2006, MAC acquired MASCORP's 100% ownership in ASSC. The effective ownership of MAC in ASSC was thus increased from 70% to 100%. Through the restructuring, the Company effectively acquired the 30% minority interest of Menzies Aviation Group in ASSC. Consequently, ASSC became a direct subsidiary of MAC.

MASCORP has maintained a stable and growing service partnership with its first foreign client, Thai Airways in addition to All Nippon Airways, Air Niugini, China Airlines, Korean Air, Japan Airlines, Air Philippines (MASCORP's maiden client), Cebu Pacific Air, Ages and Island Transvoyager.

MASCORP contributes 26% of the Group's total operating revenues for the years ended December 31, 2014, 2013 and 2012.

Through its aggressive marketing efforts, capability to offer a total aviation product (in synergy with the catering and MRO business of MAC), and competitiveness, MASCORP is currently increasing its market share at NAIA. Among the ground handlers in Manila, MASCORP is the only service provider present in three terminals (Terminal 1, 2, and 3). Aside from NAIA, MASCORP is

also operating in Mactan Cebu International Airport and Kalibo International Airport.

MASCORP's operations is dependent upon its concession agreements with MIAA and Mactan-Cebu International Airport Authority (MCIAA), which grants the company the right to operate ground handling services in NAIA and MCIA terminals. MASCORP secures such right by regularly paying the monthly CPF which is computed as 7% of gross income.

MASCORP is not aware of any existing or probable government regulations that would have an adverse effect on its business. Given the nature of its business, it has no research and development activities during the last three fiscal years.

MacroAsia Properties Development Corporation

MacroAsia Properties Development Corporation (MAPDC), another wholly-owned subsidiary, was incorporated on June 4, 1996 to primarily engage in the acquisition, development and sale of real properties. After it completed its first infrastructure project in 1997 and following the Asian economic crisis, the company suspended pursuing further property development projects as a core business and refocused its efforts on aviation-support activities.

On August 31, 2000, MAPDC was registered as an Economic Zone (Ecozone) Developer/Operator with the PEZA. As such, it enjoys tax incentives. It restarted commercial operations on the same date, this time as the ecozone developer/operator of the 23-hectare MacroAsia Special Ecozone at the NAIA, with LTP as its anchor locator for the next 25 years. LTP is an associated company of MAPDC as LTP is 49% owned by MAC.

The MacroAsia Special Ecozone is presently managed by a lean team of core employees. The support services needed to maintain the ecozone are provided by contracted local service providers. As of December 31, 2014, MAPDC has a workforce of 21 employees out of which, 16 are regular employees.

MAPDC is the subsidiary that serves as a vehicle for the entry of the Company into the water services business (bulk water supply or commercial retail of treated surface water into selected localities outside Metro Manila. No revenues are derived as yet from these projects, since the operational development of these projects is medium-term, exceeding a year before revenues become possible.

MAPDC owns a tract of land in Muntinlupa close to the expressway, and this property will be developed as a commissary for MacroAsia Catering.

MAPDC's operations do not require the intensive use of raw materials or like items. It does not therefore have any major existing supply contracts.

For the past three years, MAPDC's average rental income represented an average of 13% of the Group's consolidated gross operating revenues.

MAPDC is subject to PEZA rules and regulations and is not aware of any other existing or probable government regulations that may have any adverse effects on its business. MAPDC does not have any other significant agreements or patents, copyrights, licenses, franchises, concessions, or royalty agreement. It did not incur any research and development costs during the last three fiscal years.

MacroAsia Air Taxi Services, Inc.

MacroAsia Air Taxi Services, Inc. (MAATS) is a wholly-owned subsidiary of MAC which was incorporated in June of 1996. MAATS is a licensed non-scheduled domestic flight operator providing helicopter chartering services from its base at the General Aviation Area, Manila Domestic Airport to any point within the Philippines.

MAATS started commercial operations in October 1996. It has since been leasing MAC's Ecureuil AS350-B2, a 5-passenger helicopter aircraft for its chartering business. It is powered by a Turbomeca Arriel engine that has a float kit reserved for emergency water landing requirements. Revenues derived from chartering operations are 100% domestic, with majority of its customers being local businessmen or corporate accounts.

MAATS is duly licensed by the Civil Aeronautics Board (CAB), as well as an Air Operator Certificate (AOC) and Certificate of Airworthiness issued by the Civil Aviation Authority of the Philippines (CAAP).

MAATS is greatly dependent on the aforementioned licenses, without which the company cannot provide charter services to the public. These licenses have to be renewed annually. The company ensures that its helicopter receives a year-round preventive maintenance in accordance with the manufacturer's specifications and complies with the stringent requirements of the CAB and ATO.

MAATS adheres to the stringent safety standards and procedures set by the local regulating agencies. The company's pilot and mechanics undergo mandatory training programs to enrich their expertise and to keep up with the latest trends in operational safety, efficiency and customer service, a practice that has lifted the company ahead of its competitors. As of December 31, 2014, MAATS team consists of 6 employees, all of which are regular employees.

MAATS' charter flight and FBO (fixed-based operations) revenues for the last three years account for an average of two percent (2%) of MAC Group's consolidated profit before tax.

MAATS' operations do not require the intensive use of raw materials or like items. It does not therefore have any major existing supply contracts.

There are no existing or probable government regulations that may have an adverse effect on MAATS operations. It did not incur any research and development expenditures during the last three fiscal years.

MacroAsia Mining Corporation

MacroAsia Mining Corporation (MMC), another wholly owned subsidiary, was incorporated on September 25, 2000 to serve as an institutional vehicle through and under which the business of a mining enterprise may be established, operated and maintained. The Company has 26 employees, among those, 10 are regular employees as of December 31, 2014. 30% higher than previous year due to the absorption of employees by MMC from the parent company effective January 1, 2014.

MMC is now geared towards the provision of consultancy and mining exploration services, focusing on nickel areas. On August 24, 2012, the Company entered into a Contract for Service Agreement with a third party to render exploratory drilling and sampling of nickel laterite services on the third party's mining tenement.

MMC's operations do not require the intensive use of raw materials. Therefore, it does not have any major existing supply contracts.

MMC is not aware of any other existing or probable government regulations that may have any adverse effects on its business. MMC does not have any other significant agreements or patents, copyrights, licenses, franchises, concessions, or royalty agreement. It did not incur any research and development costs during the last three fiscal years.

Lufthansa Technik Philippines, Inc. – A Joint Venture with MacroAsia Corporation

Lufthansa Technik Philippines, Inc. (LTP) is a joint venture between MAC (49%) and Lufthansa Technik AG of Germany (51%). It provides a wide range of aircraft maintenance, repairs and overhaul (MRO) services at the NAIA, DMIA, MCIA and Davao International Airport.

Following the signing of the joint venture agreement on July 12, 2000, and its subsequent registration with the Philippine Economic Zone Authority (PEZA) as an economic zone locator on August 30, 2000, LTP started its commercial operations on September 01, 2000. Since then, it has been recognized as an outstanding company that has consistently generated export revenues for the country.

As an ecozone locator, LTP has a 25-year lease contract with MacroAsia Properties Development Corporation (MAPDC). It has technical services agreements with PAL as a base client, as well as with other airlines, including Lufthansa Technik AG of Germany.

LTP also has a concession agreement with MIAA upon which its business operations is highly dependent. The agreement grants LTP the right to operate as a provider of aircraft MRO services at NAIA Terminals 1, 2 and 3. LTP secures such right by yearly renewal of the agreement and paying the monthly CPF (7% of gross revenue).

On February 10, 2012, LTP opened its third aircraft hangar to accommodate maintenance works for the Airbus A380, the world's biggest and most technologically advanced commercial aircraft today.

LTP continues to have Philippine Airlines (PAL) as its main client in providing aircraft maintenance, repair and overhaul services from its facility in NAIA. Other global clients include among others – Asiana Airlines, ANA, Air Nuigini, China Airlines, Etihad Airways, Eva Air, Gulf Air, Japan Airlines, Korean Air, Qatar Airways and Royal Brunei Airlines. Moreover, other international airlines including those with non-scheduled flights to Manila also avail of LTP's MRO expertise. These include Lufthansa German Airlines, Virgin Atlantic, Qantas Airways, Indigo, Jetstar Japan, Jetstar Airways, Vietjet Air and Vietnam Airlines to name a few.

In a showcase of continuing trust in 2014, nine airlines renewed their alliances with LTP. For line maintenance, these were Air Busan, Asiana Airlines, China Airlines, Emirates Airlines, Etihad Airways, Japan Airlines Jeju Air, Jin Air and Royal Brunei Airlines. For base maintenance, Qantas entrusted the performance of two C4 checks to LTP after the successful conclusion of its A380 cabin reconfiguration. This is a major step for LTP to further strengthen its capabilities in base maintenance for the A380.

Aviation authorities/agencies from the respective countries of origin of these airline clients issue licenses/certificates to LTP for its accreditation to provide MRO services to the aforementioned associated airlines. It is certified by 33 airworthiness organizations worldwide as a qualified provider of aircraft MRO services including the Civil Aviation Authority of the Philippines (CAAP), the United States' Federal Aviation Industry (FAA) and European Aviation Safety Agency (EASA). It also holds an EASA 21 Design organization extension from Lufthansa Technik AG, enabling them to create in-house change/repair designs. The extent of LTP's work/services largely depends on these certifications, which describe/specify that LTP's services must be carried out in accordance with the respective countries' aviation regulations. These certifications are renewed either annually or every two years.

LTP's income in 2014 is made a complete turnaround with a 140% increase from last year's losses. This was made possible through LTP's continuous effort to decrease its general expenses. Last year's losses is in line with the decrease in number of serviced aircraft particularly in the line maintenance segment, increase in expenses incurred due to the buildup of base maintenance capability, write-off of inventory in 2013, provisions for tax and other assessments, LTP

booked another net loss in 2013, which accounted for 108% of MacroAsia Corporation's total equity in net loss of its associated companies for the said year.

LTP's personnel count did not change significantly as compared to the prior year. They have a labor force of about 2,520 by December 31, 2014. Of the total manpower count, 2,495 are regular employees.

LTP is not aware of any existing or probable government regulations that would have an adverse impact on its on-going operations. It has no research and development activities/costs during the last three fiscal years.

Cebu Pacific Catering Services, Inc.

Cebu Pacific Catering Services, Inc. (CPCS) is MacroAsia's first in-flight catering venture which started commercial operations in October of 1996. MAC has 40% equity in this joint venture, while its partners - Cathay Pacific Catering Services of Hongkong and MGO Pacific Resources Corporation hold 40% and 20% equity, respectively.

CPCS is the first and presently still the only full-service airline catering company at the MCI. CPCS is an economic zone locator covering 3,050 sqm in Mactan, Cebu and services both domestic and international airlines.

CPCS owns a two-storey kitchen facility designed to fully meet projected total airline catering demands and to easily accommodate future expansion. The facility is capable of producing over 3,000 meals a day in accordance with stringent international hygiene standards. The facility was designed and developed by Cathay Pacific Catering Services (HK). With its current portfolio of clients, the facility still has excess capacity to serve the requirements of Mactan Cebu International Airport in the years to come.

CPCS is presently serving an average of 1,300 meals a day, using local raw materials for its menus. It procures its raw materials from the local market and does not have any major raw materials supply contracts. CPCS services Philippine Airlines, Korean Air and Asiana Airlines as well as local airlines like Cebu Pacific and AirAsia Zest Airlines.

CPCS's personnel count increased by 24%, to about 77 employees as of December 31, 2014, compared to staff count in previous year. Of the total manpower count, 38 are regular employees.

As the only full-service airline catering company in Cebu, CPCS expects to provide most if not all of the catering services for future ex-Cebu flights to other regional destinations.

CPCS contributed an average of 13% out of the total MAC equity in the net income of associates.

As a registered entity, CPCS is subject to the rules and regulations of the Philippine Economic Zone Authority (PEZA). It is not aware of any existing or probable government regulations that would have an adverse effect on its operations.

CPCS does not have any other significant agreements or patents, copyrights, licenses, franchises, concessions, or royalty agreements.

No research and development costs have been incurred by CPCS during the last three fiscal years.

Status of any publicly-announced new product or service

Except as otherwise disclosed in the discussion of the businesses of each subsidiary and affiliate above, there are no other publicly-announced new products or services for the Group.

Competition

The Group's strength relative to its competitors lies on its skilled manpower, liquid assets relative to its operational funding requirements and adequate capital to continue and expand its existing businesses and develop or venture into new business activities. The Company's strategic advantage in the aviation services sector comes from the close relationships with airline clients, which in turn enables reciprocal arrangements for auxiliary aviation services. The strong backing of the Company's venture partners in some of the subsidiaries/affiliates, namely, Singapore Air Terminal Services (SATS, Singapore), Cathay Pacific Catering Services (CPCS, Hongkong) and Lufthansa Technik AG (Germany) also provides the globally-competitive expertise and market reach for the Company's subsidiaries/affiliates.

The Company's competitive edge is manifested in various service areas through its quality of services, labor/manpower stability, competitive pricing, advanced aircraft (MRO) technology, and a carefully packaged inter-related aviation support services.

Suppliers

The Group has a broad base of suppliers, both local and foreign. Except as otherwise disclosed in the discussion of the businesses of each subsidiary and affiliate above, there are no major existing supply contracts for the Group.

Customers

Except as otherwise disclosed in the discussion of the businesses of each subsidiary and affiliate above, the Group is not dependent upon a single customer or a few customers that a loss of anyone of which would have a material adverse effect on the Group.

Employees

MacroAsia Corporation, the parent company, has a total workforce of 27 employees. The Group has a total manpower complement of 3,708. Of these, 2,913 are regular

employees, 45 are on probation, and 750 are project and/or contractual staff. The total number of employees may likely increase in 2015 driven by the growth in certain business segments, particularly in the food business segment.

None of the Company, its subsidiaries and associated companies is subject to any Collective Bargaining Agreement (CBA). There has been no strike, nor any attempt to protest against the Company, its subsidiaries and associated companies during the past three years.

The Company provides health/medical insurance/benefits to its employees through an independent Health Maintenance Organization (HMO).

Compliance with Environmental Laws

MacroAsia Corporation and its subsidiaries have not been subject to any material fines or legal or regulatory action involving non-compliance in any material respect with relevant environmental protection regulations.

Major Risks Involved

MAC recognizes some developments that may have potential impact on the Group.

Global Economic Slowdown, Economic Woes Impacting on Airlines, Safety and Health Issues Affecting Airline Travel.

The Group continues to adopt a simultaneous approach of employing revenue generating strategies for both core and non-core business while cutting down on costs. Aggressive marketing, offering of innovative products and services, optimizing resources and provision of quality services help maintain and expand client patronage. Sustainable cost leadership efforts like staff cost benchmarking (staff cost is the biggest cost among MAC's service companies) were implemented with much vigor. The impact of aviation developments for key clients are discussed as these become evident, particularly in corporate head office meetings (generally on a weekly basis), as part of executive/management committee meetings.

Industry Regulations

MacroAsia Corporation and its subsidiaries are subject to the relevant rules and regulations imposed by government and private institutions such as the Civil Aviation Authority, Civil Aeronautics Board, Securities and Exchange Commission as well as the Philippine Stock Exchange. Moreover, being a part of the air travel industry, the Group is subject to various stringent international standards for cleanliness, health, and safety.

Volatility in Foreign Exchange Rates

Bulk of the Group's revenues and part of its costs and expenses are transacted in foreign currency, particularly in US dollars. Any drastic fluctuation in the Peso-US dollar exchange rate may affect the Group's financial performance. The

Company's Investment Committee has directed Management to engage in foreign exchange hedging transactions and to limit the Company's foreign currency holdings to not more than 25% in US Dollar portfolio and hold the rest in local currency (at least 75% of the portfolio in Philippine Peso) to minimize exposure to foreign exchange fluctuations.

Competition

The business activities of the Company and its subsidiaries are carried out in a competitive environment, as the Group competes not only with local providers of aviation-related services, but with regional and international players as well. Operational track record and high quality of services coupled with competitive prices remain to be the company's advantages over its competitors.

Natural Occurrences

The Group is subject to various other risks which are beyond the Company's control. These include weather conditions and natural disasters which may disrupt its operations. There can be no assurance that the above risks will not have an adverse effect on the Company.

Periodic planning sessions/meetings with top management, various committees and members of the Board are being held to identify, assess and formulate related contingency plans to manage or minimize the adverse impacts of potential or identified risks on the Group's operations.

Transactions with and/or Dependence on Related Parties

Please see Note 18 under the Company's Consolidated Notes to Financial Statements (pages 47 to 51)

Significant Agreements and Commitments

Please see Note 28 under the Company's Consolidated Notes to Financial Statements (pages 65 to 68)

Other Information

The Group has not issued any short term or long term commercial papers to date.

There are no other significant patents, trademarks, copyrights, licenses, franchises, concessions, and royalty agreements held by the Group.

MAC, as a listed entity, operates in a highly regulated environment. The business of the Company, including its subsidiaries and affiliates to which it operates, depends upon the permits and licenses issued by the government authorities or agencies for its operation. The Group is not aware of any existing or probable government regulations on its products and services that would have an adverse impact on the operations of the businesses to which the Group operates.

The Group has not incurred any material research and development costs during each of the last three fiscal years.

MacroAsia Corporation's Mining Project

Macroasia Corporation holds two Mineral Production Sharing Agreements (MPSA), MPSA-220-2005-IVB and MPSA-221-2005-IVB, both located in Brooke's Point, Palawan. MPSA-220 or the Infanta Nickel Project covers a total land area of 1,114 hectares with nickel in the form of laterite ore as the primary commodity. This area was the source of ore shipments to Japan in the 1970's.

The total extent of the laterite area within the MPSA is around 536 hectares with the deposits comprised of limonite and saprolite ores. Within this delineated nickel ore envelope, 2,754 drill holes were done, resulting into 48,568.7 meters drilled. There were also 482 test pits that were dug, yielding 2,550.8 meters more for sampling. The resulting samples collected numbered 52,284, and these were analyzed for nickel (Ni), iron (Fe) and 12 other elements/oxides, including the loss in ignition (LOI), using fused bead X-Ray Fluorescence (XRF) technique at Intertek Laboratories. The Company has completed an exploration report that is compliant to the Philippine Mineral Reporting Code. A mining plan has also been drafted.

The operation of the Mining Project has already been endorsed by the three impact barangays, including the indigenous people in the area. In 2010, the Company has received the Environmental Compliance Certificate (ECC) for operations. The Company is still completing the acquisition of other permits needed to operate. Simultaneously, it has ongoing discussions with potential partners for the development of the project for the best interest of various stakeholders.

Exploration and maintenance works in the mineral property was done in 2012. The exploration period of the MPSA 220-2005-IVB has been approved for extension by the Department of Environment and Natural Resources (DENR) on December 5, 2012. The extended exploration period would allow MAC to finalize the data for the fine-tuning of the feasibility study and eventual metallurgical testing of the nickel laterite ore.

Bulawan Mining Corporation (BUMICO), a subsidiary of the Philippine National Bank (PNB), transferred its right for their Exploration Permit Application (EXPA 103-VII) over a 403 hectare area in Basay, Negros to MAC through the signing of a Deed of Assignment (DOA) on August 15, 2012. The DOA has been approved by Mines and Geosciences Bureau (MGB) Region VII Office on January 28, 2013. The area has a high potential for copper-gold mineralization. The exploration permit application is now under MAC's name. This tenement can be subject to a JV for exploration with other interested entities.

BUMICO also transferred its interests in the Bulawan Mining Project with an Operating Agreement with Philex Mining Corporation (PMC) to MAC through a Deed of Assignment (DOA) signed on September 6, 2012. The DOA was finalized after securing the written consent of Philex. In relation to the operating agreement

between Philex and BUMICO, Philex committed to submit quarterly reports to MAC which will be subjected to regular validation by MAC's technical team.

The Exploration Permit (EP) for the Sipalay Project, another BUMICO project that was part of BUMICO's assignment to MAC, has been renewed by the Mines and Geosciences Bureau on December 10, 2012.

ITEM 2. DESCRIPTION OF PROPERTIES

MacroAsia Corporation

MacroAsia Corporation owns an Ecureuil AS 350-B2, a five-passenger helicopter as of December 31, 2014. It has a rental agreement with MAATS (a wholly owned subsidiary) at a specified fixed monthly lease payment plus an amount computed at a rate based on flying time, for the use of the aircraft for a period of six months, renewable thereafter for periods of six months at the option of both parties.

MAC leases from Philippine National Bank (formerly Allied Bank Corporation) the office space it currently occupies. The lease agreement is for a period of two years up to October 2011 with an annual rental rate that is subject to review every year. The contract of lease was renewed for a period of two years, starting October 16, 2011, and unless earlier terminated, shall expire at midnight October 15, 2013. The lease agreement has not been renewed but MAC continues to lease the office space under the same terms and conditions until the new lease contract is finalized.

The Company entered into one lease agreement in 2011 and three lease agreements in 2010 with third party lessors covering the use of parcels of land for 35 years in Palawan. The leased properties will be used by the Company as drying area and/or stockpile of its mine products and other related purposes. The Company prepaid the rental charges up to 18 to 30 years totaling ₱9.0 million as of December 31, 2014 and 2013, respectively. Rental rates are subject to escalation during the lease periods.

MacroAsia Properties Development Corporation

MacroAsia Properties Development Corporation owns five parcels of land with a total area of 7,912 square meters, located at East Service Road, Sucat, Muntinlupa, Metro Manila. These properties were acquired in 1996 for future development. In 2014, MAPDC acquired the land adjacent to the property with a land area of 1,500 square meters together with a building with a floor area of 3,280.02 square meters. These acquired properties in Sucat will be developed to become a commissary for MACS' expansion.

Also in 2014, MAPDC acquired 3 hectares of land in Brgy. Bagahabag, Solano Nueva Vizcaya which will be used for the waterworks project of MAPDC and its subsidiaries. Currently, a water treatment plant is being constructed in the area. The treatment plant includes an intake structure and reservoir.

On September 01, 2000, MAPDC executed a 25-year lease agreement with the MIAA covering about 23 hectares located within NAIA. The lease contract may be terminated at the option of the company if the company, its sublessee or any of its successors-in-interest, ceases to operate its business; and MIAA or the government decides to transfer the airport to another location, making it impossible for the company to conduct its business. With the full support of the PEZA, MAPDC has transformed the area into an Economic Zone, and has signed a 25-year sub-lease agreement with LTP, its anchor locator.

MacroAsia Catering Services, Inc.

In 1996, MAC assigned all of its rights and obligations to MacroAsia Catering Services, Inc. under the lease agreement it entered in the same year with MIAA for the use of a parcel of land where its catering concession facilities are located. The lease contract is for a period of 10 years starting six months after the start of the construction of the facilities, renewable every five years thereafter under such terms and conditions as may be agreed upon by both parties. Minimum annual rental payment amounts to ₱8.5 million. Upon expiration of the lease agreement, both parties mutually agreed to continue the lease on a renewable, short-term basis using the terms in effect during the last year that the original lease agreement was in force. In October 2013, the Company has renewed the lease agreement with MIAA for a period of three (3) years commencing on June 1, 2013 and expiring on May 31, 2016 or earlier, depending upon the MIAA development plan affecting the area.

MACS has a concession agreement with MIAA to exclusively operate an in-flight catering service for civil and/or military aircraft operating at NAIA and/or MDA. In 2012, the concession agreement is renewable every year upon mutual agreement of the parties. In 2013, the concession agreement of the Company is renewed and effective for a period of 3 years commencing on June 1, 2013 and expiring on May 31, 2016 or earlier depending upon the MIAA development plan affecting the area. The agreement is renewable yearly up to three years, subject to certain conditions. In consideration of the concession privilege, the Company pays MIAA a monthly concessionaire's privilege fee equivalent to 7% of the Company's monthly gross income on catering services. The Company also assigned a Treasury note placement amounting to ₱5.0 million, included under "Other noncurrent assets" account in the balance sheets, to MIAA in compliance with the concession agreement.

MacroAsia Airport Services Corporation

MacroAsia Airport Services Corporation leases its office space and staging area from MIAA in Terminals 1, 2 and 3 on a month-to-month basis, with a monthly rental of ₱418,659, ₱19,807 and ₱156,544 respectively.

In August 2009, the company paid surety cash deposit to MIAA amounting to ₱2 million as one of the requirements for the renewal of the lease agreement. Per MIAA's Board Resolution No. 2010-019 dated March 2, 2010, the MIAA Board of Directors approved the renewal of the ground handling concession contract of MASCORP and its corresponding contract of lease for a period of five years commencing on March 1, 2010. As of December 31, 2014, MIAA has not yet formalized nor issued the corresponding agreements which remained pending due to the on-going rehabilitation and repair of Terminal 1. Currently, management is in discussions with necessary parties to have the document concession and lease agreements in place.

Meanwhile, MIAA continues to bill, and MASCORP continues to pay the rental fees billed by MIAA based on current rates. In consideration of the concession privilege, the company continues to pay MIAA a monthly concession privilege fee in the amount equivalent to 7% of the company's monthly gross income on domestic and international ground handling services. MASCORP also pays concession privilege to Mactan Cebu International Airport (MCIA) on the same terms as MIAA's.

Other than what was discussed above, MAC or any of its subsidiaries and affiliates does not expect to buy any significant assets (property or equipment) except if needed for mining operations, in the next twelve (12) months.

ITEM 3. LEGAL PROCEEDINGS

On June 4, 2012, the Company filed a petition for review with the Court of Appeals on the denial by the National Commission on Indigenous People to issue a Certification Precondition applied for by MacroAsia Corporation for its proposed mining operation in Palawan.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

Except for matters taken during the annual meeting of stockholders, there was no other matter submitted to a vote of security holders during the period covered by this report.

PART II. OPERATIONAL AND FINANCIAL INFORMATION

ITEM 5. MARKET FOR ISSUER'S COMMON EQUITY & RELATED STOCKHOLDER MATTERS

MAC's common shares are listed and traded at the Philippine Stock Exchange and the approximate number of holders of its common equity as of December 31, 2014 is 856.

There were no unregistered securities sold by the registrant for the past three years.

The high and low prices of the Company's share during 2014 and 2013 are as follows:

<u>2013</u>		<u>High</u>		<u>Low</u>
First Quarter	₱	2.80	₱	2.40
Second Quarter		2.70		2.16
Third Quarter		2.58		2.00
Fourth Quarter		4.32		1.90
<u>2014</u>		<u>High</u>		<u>Low</u>
First Quarter	₱	4.04	₱	1.98
Second Quarter		2.46		1.95
Third Quarter		3.20		2.01
Fourth Quarter		2.68		2.20
<u>2015</u>		<u>High</u>		<u>Low</u>
As of April 10 , 2015		2.10		2.10

Common shares outstanding as of December 31, 2014 were 1,233,404,000.

Shares owned by the Public as of December 31, 2014 were 290,398,000 or 23.54%

Shares owned by the Public as of March 31, 2015 were 290,398,000 or 23.54%

The top 20 stockholders of MacroAsia Corporation as of December 31, 2014 are:

	Name	No. of Common Shares Held	% of Total
1	PCD Nominee Corporation (Filipino)	201,922,076	16.37
2	PAL Holdings (formerly Baguio Gold Holdings Corporation)	88,000,000	7.13

20	Sunway Equities, Inc.	22,370,000	1.81

Dividends

The general dividend policy of MacroAsia is governed by the By-Laws of the Company which provides that dividends upon the capital stock of the Company may be declared by the Board of Directors in the manner and form provided by law, after deducting from the net profit of the Company any approved bonuses to the members of the Board of Directors in an amount not exceeding five percent (5%) of the Company's net profit before tax and the expenses of administration. In each case, no dividend declaration shall be made by the Company which would impair its capital.

Dividends shall not be declared if there are major investments/projects which the Company and its subsidiaries and associated companies anticipate in the near future.

1. Stock Dividends

No stock dividends were declared in 2014.

2. Cash Dividends

<u>Date Approved</u>	<u>Per share</u>	<u>Stockholder of Record Date</u>	<u>Date Paid/Issued</u>
March 25, 2013	₱0.065	April 24, 2013	May 19, 2013
March 07, 2012	₱0.065	April 24, 2012	May 18, 2012

3. Cash Dividends Declared After Balance Sheet Date

No cash dividends were declared as of April 15, 2015.

4. Restriction on Retained Earnings

The retained earnings as of December 31 are restricted for dividend declaration for the portion equivalent to the following:

- Undistributed net earnings of subsidiaries and equity in net earnings of associates amounting to ₱151.7 million and ₱54.2 million as of December 31, 2014 and 2013, respectively.
- Cost of treasury shares amounting to ₱49.4 million as of December 31, 2014 and 2013.
- Deferred income tax asset amounting to ₱1.4 million and ₱4.1 million as of December 31, 2014 and 2013, respectively.

5. Appropriation of Retained Earnings

On December 12, 2014, the MACS' BOD approved the appropriation of its retained earnings amounting to ₱50.0 million for plant expansion in Sucat. MACS' BOD allocated this appropriation for the company's plans to operate an offsite commissary within the next two years.

On September 26, 2012, MACS' BOD approved the appropriation of MACS' retained earnings amounting to ₱50.0 million for various investments to expand business and renovation of facilities of MACS. An additional ₱50.0 million was appropriated by MACS' BOD last December 12, 2014 for the establishment and infrastructure requirements of a commissary for food services to non-airline clients. The company expects the commissary to be operational within the year.

On June 21, 2012, MASCORP's BOD approved to appropriate ₱30 million of its retained earnings for business expansion. The expansion program is expected to run for 2 years.

On December 12, 2011 and July 15, 2011, the Company's BOD approved the appropriation of the Company's retained earnings amounting to ₱393.1 million and ₱300.0 million, respectively, for the mining development projects and water project, respectively. The water project is expected to be completed and operational on the first quarter of 2015. As to the mining project, the Company intends to start development activities and mining operations on 2015, after the period allotted for the extension of the exploration period, if on-going studies indicate favorable economics.

On December 12, 2011, MAATS' BOD authorized and approved the appropriation of ₱ 15.0 million for purposes of expanding the business of MAATS, particularly the acquisition of an aircraft hangar. Acquisition is to be made in 2015 or earlier. In 2014, however, MAATS' BOD reversed the appropriated amount to declare as dividend during the year.

Description of Registrants Securities

MacroAsia Corporation has already issued 1,250,000,000 shares of stocks from the total authorized capital shares of 2,000,000,000.

On July 16, 2010, the BOD approved a Share Buyback Program involving a total cash outlay of ₱50 million for the repurchase of the outstanding common shares of the Company from the open market, using the trading facilities of the Philippine Stock Exchange (PSE). The Program will not involve any active or widespread solicitation for stockholders to sell. Repurchase of shares of stock will be done during the period of the Program at such prices perceived by the Company to be lower than the inherent value of the share. The Program will run until the ₱50 million authorized cash outlay is fully utilized or until such time that the BOD may direct, subject to appropriate disclosures to the PSE and the SEC.

As of December 31, 2014, the Company has reacquired 16,596,000 shares for ₱49,418,660.

Voting and Preemption Rights

All outstanding common shares of the Company as of the record date for the purpose of the Annual Stockholder's Meeting are entitled to vote at the rate of one (1) vote per share.

A stockholder entitled to vote at the meeting shall have the right to vote in person or by proxy the number of shares registered in his name in the stock transfer book of the Company for as many persons as there are directors to be elected. Each stockholder shall have the right to cumulate said shares and give one nominee as many votes as the number of directors to be elected, multiplied by the number of his shares shall equal, or he may distribute them on the same cumulative voting principle among as many nominees as he shall see fit; provided, that the number of votes cast by a stockholder shall not exceed the number of his shares multiplied by the number of directors to be elected.

Any stockholder of the Company shall have the right to dissent and demand payment of the fair value of his shares in case (i) any amendment to the articles of incorporation has the effect of changing or restricting the rights of any stockholder or class of shares, or of authorizing preferences in any respect superior to those of outstanding shares of any class, or of extending or shortening the term of corporate existence; (ii) any sale, lease, exchange, transfer, mortgage, pledge or other disposition of all or substantially all of the corporate property and assets; and (iii) of merger or consolidation.

The appraisal right may be exercised by any stockholder who shall have voted against the proposed corporate action, by making a written demand on the corporation within thirty (30) days after the date on which the vote was taken for payment of the value of his shares. If the proposed corporate action is implemented or affected, the corporation shall pay to

such stockholder, upon surrender of the certificate or certificates of stock representing his shares, the fair value thereof as of the day prior to the date on which the vote was taken, excluding any appreciation or depreciation in anticipation of such corporate action. No payment shall be made to dissenting stockholder unless the Company has unrestricted retained earnings in its books to cover such payment.

ITEM 6. MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

Overview

In 2014, MAC carried on its operations through its five subsidiaries namely: MacroAsia Catering Services, Inc. (MACS); MacroAsia Airport Services Corporation (MASCORP); MacroAsia Air Taxi Services, Inc. (MAATS); MacroAsia Properties Development Corporation (MAPDC); and MacroAsia Mining Corporation and through its two associated companies, Lufthansa Technik Philippines, Inc. – A Joint Venture with MacroAsia Corporation (LTP) and Cebu Pacific Catering Services, Inc (CPCS).

MACS, which is 80% owned by MAC, operates an in-flight kitchen at the NAIA and Manila Domestic Airport, while CPCS, 40% owned by MAC, operates similar in-flight kitchen at the MCI. These two kitchens service the in-flight catering needs of most international airlines flying out of Manila and Cebu. MASCORP, a 100% owned subsidiary of MAC handles the operation of aircraft ground-handling requirements not only at NAIA but also at MCI. LTP which is a joint venture with Lufthansa Technik AG Germany provides world-class aircraft maintenance, repair and overhaul (MRO) services at the NAIA, DMIA, MCI and Davao International Airport.

MAATS, 100%-owned subsidiary by MAC, provides aircraft charter services from its base at the Manila Domestic Airport, and also provides auxiliary services for fixed-based operators. MAPDC, another 100% owned subsidiary by MAC, developed and operates the only special economic zone at NAIA. MMC, a wholly owned subsidiary, serves as an institutional vehicle through and under which the business of a mining enterprise may be established, operated and maintained.

The two most important factors that affect the revenue levels of the aviation-services subsidiaries are passenger loads and flight frequencies of airlines.

The Group is not aware of any known trends or any known demands, commitments, events or uncertainties that will have material impact on its liquidity.

The Group is not aware of having or anticipating any cash flow or liquidity problems within the next twelve (12) months. The Group generally sources its liquidity requirements through its increased revenues and collections. These are invested in placements with better yields.

The Group is not aware of any events that will trigger direct or contingent financial obligation that is material to the Group, including any default or acceleration of an obligation.

The Group is not aware of any material off-balance sheet transactions, arrangements, obligations (including contingent obligations) and other relationships of the Company with unconsolidated entities or other persons created during the reporting period.

There are no material commitments for capital expenditures created during the reporting period.

The Group is not aware of any known trends, events or uncertainties that have had or that are reasonably expected to have a material favorable or unfavorable impact on net sales/revenues/income from continuing operations.

There have been no significant elements of income or loss that did not arise from the Group's continuing normal operations.

The Group is not aware of any current and future event that will cause a material change in the relationship, vertical and horizontal analyses, of any material item from period to period.

The Group is not aware of any seasonal aspects that have material effect on the financial statements.

Key Performance Indicators

The Company uses the following major performance measures. The analyses are based on comparisons and measurement on financial data of the current period against the same period of the previous year.

Return on Net Sales (RNS)

This ratio measures the amount of income, after all costs and expenses, including taxes are deducted, for every peso of net revenue earned.

<i>(In Thousands except for Ratios)</i>		2014	2013
Return on	= $\frac{\text{NI attributable to Equity Holder of Parent}}{\text{Total Net Revenues}}$	<u>₱ 114,980</u>	<u>₱ 170,048</u>
Net Sales		1,723,193	1,610,119
		<u>6.67%</u>	<u>(10.56%)</u>

The positive rise in the consolidated RNS resulted from the income generated by our MRO associate. In the prior year, our MRO associate contributed P215 million to last year's net loss.

Return on Investment (ROI)

This ratio measures the amount of income earned on invested capital.

		2014	2013
<i>(In Thousands except for Ratios)</i>			
Return on Investment	$\frac{\text{NI attributable to Equity holder of Parent}}{\text{Total Interest-bearing Liabilities + Equity attributable to Equity holder of Parent}}$	<u>₱ 114,980</u>	<u>₱ 170,048)</u>
		2,826,387	2,564,027
		<u>4.07%</u>	<u>(6.63%)</u>

The ROI had a positive turnaround due to the income contribution of our MRO associate this year as compared to last year's contribution of loss. MASCORP availed of an additional bank loan during 2014 amounting to P81.5 million in which P67.7 million remains unpaid as of year end.

Return on Equity (ROE)

This KPI is a measure of the owner's return for every peso of invested equity.

		2014	2013
<i>(In Thousands except for Ratios)</i>			
Return on Equity	$\frac{\text{NI attributable to Equity holder of Parent}}{\text{Total Equity holder of Parent}}$	<u>₱ 114,980</u>	<u>₱ 170,048)</u>
		2,740,660	2,537,027
		<u>4.20%</u>	<u>(6.70%)</u>

The growth in the return on equity is attributable to the income contribution of LTP this year as compared to prior year's share in loss.

Direct Cost and Expense Ratio

This ratio measures the average rate of direct costs and expense on products/services sold.

		2014	2013
<i>(In Thousands except for Ratios)</i>			
Direct Cost Ratio	$\frac{\text{Total Direct Cost}}{\text{Total Net Revenues}}$	<u>₱ 1,328,904</u>	<u>₱ 1,229,620</u>
		1,723,193	1,610,119
		<u>77.12%</u>	<u>76.37%</u>

		2014	2013
<i>(In Thousands except for Ratios)</i>			
Operating Expense Ratio	$\frac{\text{Total Operating Expenses}}{\text{Total Net Revenues}}$	<u>₱ 427,641</u>	<u>₱ 375,644</u>
		1,723,193	1,610,119
		<u>24.82%</u>	<u>23.33%</u>

Direct costs and operating expenses increases is in parallel with the growth in revenues. The increase in ratios above are due to higher increases in costs, mainly labor-related, as compared to the increases in net revenues. The provision for input taxes deemed denied by the BIR also contributed to higher operating expenses.

Current Ratio

This ratio measures the group's ability to settle its current obligations.

<i>(In Thousands except for Ratios)</i>		2014	2013
Current Ratio	$= \frac{\text{Total Current Assets}}{\text{Total Current Liabilities}}$	$= \frac{\text{₱ 1,235,306}}{295,659}$	$= \frac{\text{₱ 1,344,452}}{292,930}$
		$= \underline{\underline{4.18 : 1}}$	$= \underline{\underline{4.58 : 1}}$

The current assets decreased largely due to usage of cash for investments in water projects this year. Liabilities grew principally in the ground handling company, as external short-term loans were taken up to finance operating expansion in addition to loans obtained in the prior year.

Debt-to-Equity Ratio

This ratio indicates relationship of the group's debt to the equity of the owners.

<i>(In Thousands except for Ratios)</i>		2014	2013
Debt-to-Equity Ratio	$= \frac{\text{Total Interest-bearing Debts}}{\text{Total Equity}}$	$= \frac{\text{₱ 85,727}}{2,810,375}$	$= \frac{\text{₱ 27,000}}{2,599,195}$
		$= \underline{\underline{3.1\%}}$	$= \underline{\underline{1\%}}$

On December 2014, MASCORP, our ground-handling subsidiary, acquired an additional interest bearing bank loan to be used for general corporate purposes.

Interest Coverage Ratio

This ratio measures the number of times a company could make the interest payments on its debt with its earnings before interest and taxes.

<i>(In Thousands except for Ratios)</i>		2014	2013
Interest Coverage Ratio	$= \frac{\text{Total Earnings before Interest and Taxes}}{\text{Interest Expense}}$	$= \frac{\text{₱ 149,929}}{4,013}$	$= \frac{\text{₱ 126,177}}{0}$
		$= \underline{\underline{3,736\%}}$	$= \underline{\underline{N/A}}$

In 2014, our ground-handling recognized interests for loans obtained in 2014 and in 2013. For the large part of 2013, the Parent Company and its subsidiaries had no interest bearing

debt from external finance sources. No interest expense was recognized as of December 31, 2013 since the interest bearing external debt was acquired only in late December 2013.

Asset-to-Equity Ratio

This ratio of the Company's total assets to its stockholder's equity measures the Company's leverage and long-term solvency. The equity multiplier is a measurement of a company's financial leverage.

(In Thousands except for Ratios)

		2014	2013
Asset-to- Equity Ratio	= $\frac{\text{Total Assets}}{\text{Total Equity}}$	= ₱ 3,326,607 2,810,375	= ₱ 3,072,854 2,599,195
		= <u>1.18 : 1</u>	= <u>1.18 : 1</u>

Asset-to-Equity Ratio still remains to be low, like in 2013. The Company finances the purchase of assets mostly through equity or use of internally-generated funds. The low equity multiplier indicates that asset financing is not largely being done through debt.

2014 compared with 2013

The Group is reporting a consolidated net income after tax of ₱121.9 million in 2014, reflecting a 176% turnaround from the past two years' losses of ₱161 million and ₱180 million in 2013 and 2012 respectively.

The Group's major subsidiaries posted a stronger operating and financial performance in 2014, including LTP and CPCS, its catering associate in Cebu.

Revenues from In-flight catering which contributed 61% of the total revenues had reached one billion pesos for the first time since it started operations. From last year's ₱991 million, the current year's income of ₱1.04 billion is brought about by additional institutional client serviced in 2014. The revenues from ground-handling and aviation services rose to ₱441 million from ₱413 million in 2013. The growth is due to passenger-check services for the international flights of Cebu pacific in NAIA Terminal 3 beginning on the second half of 2014. Revenues generated from our charter flight services in the amount of ₱12 million were up by almost half due to the chopper ground time experienced in 2013, arising from permitting concerns and the period of mandated repairs and maintenance of the chopper. FBO revenues contributed ₱3 million this year, consistent with last year's revenue. Revenues from property rental in the MacroAsia Ecozone remained the same. In compliance with Philippine Accounting Standards (PAS) 17, lease rental was accounted on a straight-line basis over the lease term. Administrative fees also remained at the same level as 2013. Our mining service revenues are generated from exploratory drilling and sampling of nickel laterite services agreement with a third party. Revenues from exploration services amounted to ₱35 million, a 288% growth from last year's ₱9 million.

With the higher cost of personnel-related expenses due to the higher required manpower of our catering and ground handling subsidiaries, coupled by mandatory salary increases, and the expenses pertaining to the exploration contract obtained by our mining subsidiary, the group posted an increase of ₱99 million in its direct costs, from ₱1.23 billion in 2013 to ₱1.39 billion in 2014. Direct costs ratio of 77% is 1% higher from the 76% level in 2013,

mainly due to the higher labor cost ratio of our ground handling subsidiary. General and administrative expenses amounting to ₱375 million in 2013 increased by 14% to ₱428 million in 2014 due to resulting labor requirement of an institutional client and largely because of the provision for probable losses on input tax and TCCs based on the experience of the group and assessment of counsels attending its application.

Interest income amounting to ₱13 million remained decreased by ₱7 million in 2014 due to lower level of short term investments held by the company. Financing charges increased by ₱4.1 million compared to last year's ₱.6 million due to the loans obtained by our ground-handling subsidiary in December 2013 and early 2014 from the local bank.

Other income and charges decreased by ₱58.6 million as against ₱101.6 million in 2013. Last year's other income consists of the gain on sale of investment in bonds (recorded gain at ₱49.7 million in 2013) and foreign currency fluctuation resulting to an exchange gain of ₱29.3 million. Another component is the increase in the appraisal value of the property held by MAPDC for several years now which resulted in the reversal of the allowance for losses of ₱17.3 million that was kept in the books in prior years thus bringing back the value of the property to its original acquisition cost by end of 2013. In 2014, the main contributors of other income are reversals of prior year accruals amounting to ₱19.4 million and foreign exchange gains of ₱12.5 million.

Equity in net income/loss of associates represents MAC's proportionate share in the net income/loss of its associated companies, LTP and CPCS. The changes in the equity share in net income/loss from period to period are dependent upon the results of operations of the associated companies. In 2014, our MRO business exhibited a turnaround from last year's share in net loss of ₱263.7 million to this year's share in income of ₱111 million. Meanwhile, our catering associate in Cebu continues to contribute income with this year's ₱17.2 million, surpassing last year's ₱13.9 million.

The Group posted a provision for income tax in the amount of ₱24 million in 2014, lower by 31% as compared to 2013's ₱34.7 million.

Management remains confident about the Group's future. LTP is foreseen continue its profitability within the short term, as it strives to strengthen its base maintenance capability to service foreign airlines, and thus, will become less reliant on line maintenance as a key revenue segment. Continuous growth shall also be driven by new business opportunities in the food business segment, and ground handling opportunities will include passenger lounge servicing and expansion in other secondary airports outside our current locations and establishment of a new commissary in the near future.

Financial Position

The consolidated total assets of ₱3.3 billion is higher by 8% compared to ₱3.1 billion in 2013. This is primarily due to the new investments by the company pertaining to waterwork projects.

Total cash and cash equivalents amounting to ₱681 million decreased by 21% from last year's ₱867 million primarily due to the advances to contractors and investments in waterwork projects in 2014. Accounts receivable increased by ₱41 million or 11% from ₱368 million in 2013 mainly due to trade receivables of our catering and ground handling subsidiaries arising from new clients gained in 2014. The inventory level decreased by ₱3 million from ₱47 million in 2013 to ₱44 million as of December 31, 2014.

Other current assets, which represent restricted short-term investment, tax credit certificates (TCC), unused input taxes, creditable withholding and prepaid taxes, other prepaid expenses for insurance covers, rent, utilities, and unconsumed supplies, were recorded at ₱101 million, net of allowance for probable losses, as of December 31, 2014, posting an increase of ₱39 million as compared to 2013, principally due to the accumulation of input taxes by our catering subsidiary.

Investments in associates are accounted for under the equity method of accounting in the consolidated financial statements. Movements in the account are contributed by the share in cumulative translation adjustments for LTP due to foreign exchange fluctuations, cash dividends that were declared and actually received from LTP and CPCS during the current reporting period, and the incremental equity share in net earnings of the associated companies. The company recorded a growth of 43% from ₱462 million in 2013 to ₱662 million in 2014. This is mainly attributable to the share in the net income of LTP in 2014.

The 4% rise in property and equipment, from ₱380 million in 2013 to ₱395 million in 2014, is mainly driven by the investments in water-related projects, acquisition of land by MAPDC and the acquisition of catering support equipment by MACS. The investment property of ₱143.8 million pertains to land held for future development by MAPDC. The continuing rise in the property's appraised fair value for several years now no longer justifies the need to book an allowance for loss, and thus the land is now booked at its original acquisition cost, which is still conservatively below the prevailing appraised/market value for the property. The deferred mine exploration cost of ₱233 million remained at the same level as 2013.

Accrued rental receivable and payable are equal in amount, in compliance with PAS 17 which requires the straight-line recognition of operating lease income and expense over the term of the lease. Also, deferred rent expense and unearned rent income are equal in amount as of year-end. These four accounts will be nil after the termination of the lease and sub-lease arrangement of MAPDC with MIAA and LTP.

Available-for-sale investments, in the amount of ₱103 million as of December 31, 2014 posted a decline of 24% from ₱136.8 million in 2013 due to the sale of bonds held. The account consists of Philippine government treasury bonds, corporate bonds, and equity shares. Service concession right amounting to ₱99.7 million pertains to incurred construction costs in relation to the construction of water treatment plant and pipe laying activities of SNVRDC. This asset was accounted for in accordance to IFRIC 12, Service Concession Arrangements, under the intangible asset model as it received the right to charge users of public service. Advances to contractors of ₱48.5 million pertains to payments made to two major contractors as required in their construction agreements.

Deferred income tax assets increased by 27% or ₱4.5 million, from ₱16.9 million in 2013 to ₱21.4 million in 2014, primarily due to the increase in DTA pertaining to remeasurement losses and additional input VAT provision of losses of our catering subsidiary. Deposits and other noncurrent assets increased by 53%, from ₱82 million in 2013 to ₱127 million in 2014, due to the deferred project costs of water-related projects amounting to ₱64 million previously recognized as project advances amounting to ₱18 million. Other noncurrent assets account includes among others, prepayments on rent, retirement benefits, and goodwill of ₱17.5 million, booked during the Company's acquisition of the 13% minority interest of Compass (formerly Eurest International B. V.) in MACS.

Total liabilities posted an increase of 9% of ₱43 million from 2013's ₱474 million to this year's ₱516 million. This is largely due to the outstanding ₱68 million from new loans obtained in 2014 by our ground handling subsidiary, MASCORP, from a local bank as an additional source of working capital requirement and to finance its liabilities. This is in addition to the ₱27 loan obtained last December 2013 which has an outstanding balance of ₱18 million. Accounts payable and accrued liabilities decreased by ₱11 million (or 4%) due to lower outstanding obligations of our catering and ground-handling subsidiaries as of December 31, 2014. Accrued retirement benefits payable of ₱15 million decreased by ₱4 million from last year's ₱19 million, owing to larger increases in the fair value of plan assets as compared to the increase in retirement obligations of the company based on the results of actuarial valuation.

Dividends payable of ₱8.6 million represents the total outstanding checks payable to the Company's stockholders as of current year-end.

The deferred tax liability in the amount of ₱1.1 million stemmed from the fair value changes of available-for-sale investments.

The Company's share in foreign currency translation adjustments of LTP in the amount of ₱176.8 million last year decreased by ₱4 million to this year's ₱172 million, in accordance to Philippine Accounting Standard (PAS) 21, "The Effects of Changes in Foreign Exchange Rates". The available-for-sale reserve in the amount of ₱9 million represents the unrealized gain on available-for-sale investments due to higher quoted market prices as of December 31, 2014.

The Company re-acquired through its Share Buy-back Program a total of 16,596,000 shares for ₱49.4 million as of December 31, 2014.

Movement in the "non-controlling interests" depends on the results of operations of MACS. This account reflects the 20% equity share of SATS (JV Partner of MAC) in the catering JV. As of December 31, 2014, non-controlling interests amounted to ₱70 million.

2013 compared with 2012(restated)

The Group is reporting a consolidated net loss after tax of ₱160.8 million in 2013, which is still an improvement of ₱19 million or 10.6% from the net loss of ₱179.8 million in 2012.

The Parent Company and its subsidiaries posted a stronger operating and financial performance in 2013, including CPCS, its catering associate in Cebu. However, such

profitability gains were offset by the higher loss recorded as the Company's share in the loss of its MRO associate, LTP.

Revenues from In-flight catering which contributed 62% of the total revenues had an increase of 2% from ₱973.7 to ₱992 million in 2013. This is primarily due to additional institutional/non-airline clients that were serviced, as well as volume increases from airline clients. The revenues from ground-handling and aviation services was down by ₱2 million, from ₱415 million in 2012 to ₱413 million in 2013. The slight decrease is due to the lower non-routine revenues handled in 2013. Revenues generated from our charter flight services in the amount of ₱7.8 million were down by half compared to last year's revenue of ₱13 million, mainly due to extended chopper ground time in 2013, arising from permitting concerns and the period of mandated repairs and maintenance of the chopper. Revenues from property rental in the MacroAsia Ecozone remained the same. In compliance with Philippine Accounting Standards (PAS) 17, lease rental was accounted on a straight-line basis over the lease term. Administrative fees also remained at the same level as 2012. Our mining service revenues are generated from exploratory drilling and sampling of nickel laterite services agreement with a third party. Revenues from exploration services amounted to ₱9.2 million, which is a slight decline from the ₱10.3 million booked in 2012.

With the higher cost of personnel-related expenses due to the higher required manpower of our catering and ground handling subsidiaries, coupled by mandatory salary increases, the group posted an increase of ₱0.03 billion in its direct costs, from ₱1.20 billion in 2012 to ₱1.23 billion in 2013. Direct costs ratio of 76% is 1% higher from the 75% level in 2012, mainly due to the higher labor costs. General and administrative expenses amounting to ₱362 million in 2013 increased by 4%, from ₱347 million in 2012 due to resulting employee related expenses that were affected by the mandatory salary increases, higher repairs and maintenance expenses of our catering subsidiary and increase in allowance for doubtful accounts from subsidiaries.

Interest income amounting to ₱19.9 million remained at almost the same level as the ₱19.7 million booked in 2012. Financing charges of ₱0.6 million decreased by ₱1.7 million compared to ₱2.3 million in 2012, due to the early settlement by a subsidiary of its 2012 interest-bearing loans from a local bank.

Other income and charges posted an upsurge of ₱157.7 million as against ₱56.1 million in 2012. This is primarily driven by the gain on sale of investment in bonds (recorded gain at ₱49.7 million in 2013), foreign currency fluctuation resulting to an exchange gain of ₱29.3 million compared to an exchange loss of ₱60 million in 2012. Another factor is the continuing increase in the appraisal value of the property held by MAPDC for several years now. Due to the continuing increase in appraised value, the allowance for losses of ₱17.3 million that was kept in the books in prior years for appraisal losses of the property had to be reversed, thus bringing back the value of the property to its original acquisition cost by end of 2013.

Equity in net income/loss of associates represents MAC's proportionate share in the net income/loss of its associated companies, LTP and CPCS. The changes in the equity share in net income/loss from period to period are dependent upon the results of operations of the

associated companies. In 2013, the loss in our MRO business more than offset the earnings of our in-flight catering services in Cebu, thus resulting in a net loss being booked for 2013. The total share in net loss of associates of ₱251.9 million is 70% higher than the share in net loss of ₱148.4 million in 2012.

The Group posted a provision for income tax in the amount of ₱34.7 million in 2013, up by 24% as compared to ₱27.9 million in 2012.

Despite the consolidated loss in 2013, management remains confident about the Group's future. LTP is foreseen to be back to profitability within the short term, as it continues to strengthen its base maintenance capability to service foreign airlines, and thus, will become less reliant on line maintenance as a key revenue segment. Continuous growth shall also be driven by new business opportunities in the food business segment, and ground handling opportunities will include passenger lounge servicing and expansion in other secondary airports outside our current locations.

Financial Position

The consolidated total assets of ₱3.1 billion are lower by 7% compared to the ₱3.3 billion in 2012. This is primarily due to the decrease in investments in associates, principally arising from the losses of the MRO associate, and the reduction of recognized deferred tax assets.

Total cash and cash equivalents amounted to ₱867 million, a rise of 35% from ₱643 million as of December 31, 2012 primarily due to the sale of the investments in bonds and the stronger cash flow of subsidiaries. Accounts receivable increased by ₱71.5 million or 24% from ₱296.3 million in 2012 mainly due to trade receivables of our catering and ground handling subsidiaries. The inventory level decreased by 14% from ₱54.5 million in 2012 to ₱47 million as of December 31, 2013.

Other current assets, which represent tax credit certificates (TCC), unused input taxes, creditable withholding and prepaid taxes, other prepaid expenses for insurance covers, rent, utilities, and unconsumed supplies, were recorded at ₱62.2 million as of December 31, 2013, posting an increase of ₱16.6 million as compared to 2012, principally due to the accumulation of Tax Credit Certificates by our catering subsidiary.

Investments in associates are accounted for under the equity method of accounting in the consolidated financial statements. Movements in the account are contributed by the share in cumulative translation adjustments for LTP due to foreign exchange fluctuations, cash dividends that were declared and actually received from LTP and CPCS during the current reporting period, and the incremental equity share in net earnings of the associated companies. The company recorded a decrease of 36% from ₱729 billion in 2012 to ₱462 million in 2013. This is mainly attributable to the share in the net loss of LTP in 2013.

The 5% increase in property and equipment, from ₱360 million in 2012 to ₱379 million in 2013, is mainly driven by the investments in MAPDC's water projects and the acquisition of ground support equipment by our ground handling subsidiary. The investment property of ₱143.8 million pertains to land held for future development by MAPDC. The continuing rise in the property's appraised fair value for several years now no longer justifies the need to

book an allowance for loss, and thus the land is now booked at its original acquisition cost, which is still conservatively below the prevailing appraised/market value for the property. The deferred mine exploration cost of ₱233 million remained at the same level as 2012.

Accrued rental receivable and payable are equal in amount, in compliance with PAS 17 which requires the straight-line recognition of operating lease income and expense over the term of the lease. Also, deferred rent expense and unearned rent income are equal in amount as of year-end. These four accounts will be nil after the termination of the lease and sub-lease arrangement of MAPDC with MIAA and LTP.

Available-for-sale investments, in the amount of ₱137 million as of December 31, 2013 posted a decline of 69%, from ₱435 million in 2012 due to the sale of bonds in 2013. The account consists of Philippine government treasury bonds, corporate bonds, and equity shares.

Deferred income tax assets decreased by ₱4.8 million or 22%, from ₱21.7 million in 2012 to ₱16.9 million in 2013, mainly due to the decrease in unrecognized revenue of our mining subsidiary. Deposits and other noncurrent assets increased by 12%, from ₱204 million in 2012 to ₱228 million in 2013, due to the accumulation of input taxes during the year. Other noncurrent assets account includes among others, prepayments on rent, retirement benefits, and goodwill of ₱17.5 million, booked during the Company's acquisition of the 13% minority interest of Compass (formerly Eurest International B. V.) in MACS.

Accounts payable and accrued liabilities increased by ₱40 million (or 17%) due to the additional purchases and repairs made by the operating subsidiaries towards the end of the year. Accrued retirement benefits payable of ₱19.3 million increased by ₱3.1 million or 19%, owing to incremental accruals of expense for the year based on the results of actuarial valuation.

In December 2013, our ground handling subsidiary, MASCORP, obtained a bank loan as additional source of their working capital requirement and to finance its liabilities amounting to ₱27 million. Dividends payable of ₱12.7 million represents the total outstanding checks payable to the Company's stockholders as of current year-end.

The deferred tax liability in the amount of ₱.4 million arose from the fair value changes of available-for-sale investments.

The Company's share in foreign currency translation adjustments of LTP in the amount of ₱176.8 million decreased by 20%, from ₱220.3 million in 2012, following the Philippine Accounting Standard (PAS) 21, "The Effects of Changes in Foreign Exchange Rates". The available-for-sale reserve in the amount of ₱2.7 million represents the unrealized gain on available-for-sale investments due to higher quoted market prices as of December 31, 2013.

The Company re-acquired through its Share Buy-back Program a total of 16,596,000 shares for ₱49.4 million as of December 31, 2013.

Movement in the "non-controlling interests" depends on the results of operations of MACS. This account reflects the 20% equity share of SATS (JV Partner of MAC) in the catering JV.

2012 (restated) compared with 2011(restated)

The Group's consolidated service revenues stood at ₱1.60 billion in 2012, a 17% increase from ₱1.36 billion in 2011. However, the Group is reporting a consolidated net loss after tax of ₱179.8 million in 2012, in contrast to the net income of ₱309.5 million in 2011. The principal reason for this loss is the Company's share in the loss of LTP which is due to the start-up costs of its A380 business, lower line maintenance revenues from a base client, and write-off of obsolete inventories. The Company was also hit by the stronger Philippine Peso, compared to the US Dollar, resulting into actual and unrealized foreign exchange losses.

Revenues from In-flight catering which contributed 61% of the total Group revenues had an increase of 16%, coming from the ₱839 million in 2011. This is due to the higher meal volumes arising from the passenger traffic growth of airline clients, and the acquisition of non-airline institutional clients for servicing in 2012. For ground handling, the flights of serviced clients also increased, enabling the revenues from ground-handling to jump by 34%, from ₱309 million in 2011 to ₱415 million in 2012. Revenues generated from our charter flight services in the amount of ₱13 million were down by half in 2012, compared to ₱25 million in 2011, mainly due to the lesser charter flights in 2012. Revenues from property rental in the MacroAsia ecozone remained the same, in compliance with Philippine Accounting Standards (PAS) 17 which requires that the lease rental should be accounted on a straight-line basis over the lease term. Administrative fees also remained at the same level as 2011. For the mining services, starting on the third quarter of 2012, MMC entered into an exploratory drilling service agreement with a third party. The resulting revenues from these exploration services amounted to ₱10 million in 2012.

With the higher cost of raw materials, utilities and personnel-related expenses, the group posted an increase of 19% in its direct costs, from ₱1.01 billion in 2011 to ₱1.21 billion in 2012. Direct costs ratio of 75% is 1% higher than the 74% level in 2011, due to the increase in expenses directly related to catering and ground handling services. General and administrative expenses amounting to ₱347 million in 2012, reflects an increase of 11%, from ₱313.5 million in 2011. This is mainly due to the allowance for the uncollectible input taxes, an accounting provision in the books of the catering subsidiary, professional fees and repairs and maintenance expenses recorded by our subsidiaries. Mining expenses decreased by 61%, from ₱36 million in 2011 to ₱14 million in 2012 due to reduced mining exploration activities.

Interest income increased by ₱2.4 million or 14%, from ₱17.3 million in 2011 to ₱19.7 million in 2012, due to interest earned on the higher cash placements/short-term deposits, as well as earnings from investments in government treasury bonds. Financing charges of ₱2.3 million is lower by 31%, from ₱3.3 million in 2011 due to the settlement of loans obtained from a local bank by our two operating subsidiaries.

Other income and charges reflected a loss of ₱56.1 million, as compared to the income of ₱18.6 million in 2011. This is primarily due to forex losses, arising from the appreciation of the peso against US dollar. The Group's transactional currency exposure arises from sales and cash balances in currencies other than the Philippine Peso (its functional currency).

Equity in net income of associates represents MAC's share in the net income/loss of its associated companies. Changes in equity shares from period to period are dependent upon the results of operations of the associated companies. The total share in net loss of associates of ₱148 million in 2012, starkly contrasts to the share in net earnings of associates amounting to ₱306 million in 2011.

With the increase in temporary differences of the operating subsidiaries for 2012, the group posted a provision for income tax in the amount of ₱27.94 million, a drop of 12% when compared to ₱31.83 million in 2011.

Financial Position

The consolidated total assets of ₱3.28 billion in 2012 are lower by 14%, compared to ₱3.83 billion in 2011. This is primarily due to the settlement of bank loans, appreciation of peso against the US dollar and the decrease in investments in associates.

Total cash and cash equivalents amounted to ₱643 million, dropping by 43% from ₱1.1 billion as of December 31, 2011. This is because of the settlement of bank loans obtained by the operating subsidiaries and acquisition of additional Available-for-sale investments (bonds). Due to collection efficiency, the receivables decreased by 22% from ₱382 million in 2011 to ₱296 million as of December 31, 2012. The inventory level also decreased by 22%, from ₱69.6 million in 2011 to ₱54.5 million as of December 31, 2012.

Other current assets represent tax credit certificates, unused input taxes, creditable withholding and prepaid taxes, and other prepaid expenses for insurance covers, rent, utilities, and unconsumed supplies in the total amount of ₱48.6 million as of December 31, 2012, almost at the same level of the ₱48.2 million booked in 2011.

Investments in associates are accounted for under the equity method of accounting in the consolidated financial statements. Movements in the account are contributed by the share in cumulative translation adjustments for LTP due to foreign exchange fluctuations, cash dividends declared and actually received from LTP and CPCS during the current reporting period, and the incremental equity share in net earnings of the associated companies. The company recorded a decrease of 36% from ₱1.14 billion in 2011 to ₱729 million in 2012. This is mainly attributable to the Company's share in the net loss of the MRO associate.

The increase in property and equipment by 21%, from ₱297 million in 2011 to ₱360 million in 2012, is mainly because of the acquisition by our catering and ground handling subsidiaries, of operating vehicles and other support equipment during the year. Investment property of ₱126.6 million pertains to MAPDC's land held for future development. Deferred mine exploration costs of ₱233 million increased by 8%, compared to ₱216 million in 2011, due to the continuing exploration activities during the year.

Accrued rental receivable and payable are equal in amount, in compliance with PAS 17 which requires the straight-line recognition of operating lease income and expense over the term of the lease. Also, deferred rent expense and unearned rent income are equal in amount as of year-end. These four accounts will be nil after the termination of the lease and sub-lease arrangement of MAPDC with MIAA and LTP.

Available-for-sale investments, in the amount of ₱435 million as of December 31, 2012 increased by 465%, from ₱77 million in 2011. The Company invested in retail treasury and corporate bonds during the year. The portfolio consisted of Philippines government treasury bonds, corporate bonds, and equity shares.

Deferred income tax assets amounting to ₱22 million remained at almost the same level as 2011. Deposits and other noncurrent assets of ₱204 million increased by 11%, from ₱184 million in 2011, due to the accumulation of input taxes during the year. Other noncurrent assets account includes prepayments on rent, retirement benefits, and goodwill of ₱17.5 million from the Company's acquisition of the 13% minority interest of Compass (formerly Eurest International B. V.) in MACS.

Accounts payable and accrued liabilities decreased by ₱50 million (or 18%) due to lower inventory purchases and earlier payment to suppliers and related parties during the yearend. Accrued retirement benefits payable of ₱16.1 million decreased by ₱24.7 million or 61%, owing to incremental accruals of expense for the year based on the results of actuarial valuation, in accordance with the revised PAS 19.

The bank loans obtained by the operating subsidiaries (MACS and MASCORP) as additional source of their working capital requirements were fully settled during the year. Dividends payable of ₱8.4 million represents the total outstanding checks payable to the Company's stockholders as of year-end.

The deferred tax liability in the amount of ₱1.5 million corresponds to the impact of the fair value changes of available-for-sale investments.

The Company's share in the foreign currency translation adjustments in the LTP investment, in the amount of ₱220 million increased by 38%, from ₱160 million in 2011, following the Philippine Accounting Standard (PAS) 21, "The Effects of Changes in Foreign Exchange Rates". The available-for-sale reserve in the amount of ₱29.8 million represents the unrealized gain on available-for-sale investments, the increase is due to higher quoted market prices as of December 31, 2012. The Company re-acquired through its Share Buy-back Program a total of 16,596,000 shares for ₱49.4 million as of December 31, 2012.

Movement in the "non-controlling interests" depends on the results of operations of MacroAsia Catering Services, Inc. This account shows the 20% equity share of SATS in the catering JV.

Plans and Prospects

Since the Infanta Nickel Project is a re-opening of an old mine that was operational in the 1970's, a substantial portion of the road network to the mining area is already in place and has been maintained to keep it ready for operational use. If favorable economics dictate and when mining regulatory conditions become clear and supportive of mine operations, MAC intends to start development activities for mining operations as soon as permits to operate are received from the government. Development covers the widening of existing mine roads, construction of campsite to port area haul road, completion of the causeway for ore loading and construction of camp site and support facilities. The said activities are

estimated to require a minimum of six month construction period. Full mine production is expected 3 months after the development stage and trial production.

The Company, its subsidiaries and affiliates will keep building on their existing core businesses and will pursue new opportunities related to aviation services. Efforts of existing business units to market their services even outside current locations, and new product offerings shall continue, while cost-cutting programs will always be sustained to improve both consolidated revenues and net earnings. The Company has airport-related projects in the pipeline, whose further development is dependent on the granting of the required airport concessions from airport authorities. Further, the recent developments in the ownership and management of PAL is esteemed to provide new opportunities for the group and its subsidiaries.

MAC and its subsidiaries expect to maintain a respectable liquid position, and will use funding from third-party providers only if any of the new major projects being pursued materialize.

The total number of employees is expected to increase in proportion to growth in the client portfolio. Due to the nature of the Company's operations, no product research and development activities are anticipated during the next 12 months. However, more employees, particularly aircraft-services and passenger services staff shall continue to undergo specialized training and development, since there is a demand for such skills in the global labor market.

ITEM 7. FINANCIAL STATEMENTS

The consolidated financial statements are filed as part of this Form 17-A (page 55).

ITEM 8. INFORMATION ON INDEPENDENT ACCOUNTANT AND OTHER RELATED MATTERS
External Audit Fees and Services

	2014	2013
Regular annual audit of financial statements	₱3,409,250	₱3,169,250
Non audit fees	-	-
Total	₱3,409,250	₱3,169,250

Audit Committee's Approval Policies for the Services of External Auditor

All services to be rendered and fees to be charged by the external auditors are presented to and pre-approved by the Audit Committee. An audit planning meeting is conducted at least one month before the actual performance of work. The meeting includes discussion of the following:

- a. client service team
- b. scope of audit work
- c. updates for management
- d. possible risk areas and suggested Management action plans to strengthen internal controls
- e. coordination with the audit of subsidiaries and associates
- f. audit work plan and critical dates
- g. expectations settings

Independent Public Accountants

SyCip Gorres Velayo & Co. (SGV & Co.) has acted as the Group's independent public accountant. Audit Partner-in-Charge, Ms. Josephine H. Estomo of SGV & Co. handled the financial audit for the years ended December 31, 2014 and 2013. She has done audit and financial due diligence reviews for some of the largest companies in the Philippines. She has extensive experience in various industries including airline and allied services, real estate, manufacturing (food and beverage, liquor, ceramic tiles), semiconductors, health care services, pharmaceuticals, coconut oil milling, telecommunications, education, oil and gas, mining, hospitals and advertising. She is also knowledgeable on business combinations. She took over from Ms. Aileen L. Saringan of the same auditing firm, who was partner-in-charge from years 2009 to 2013. The change was made in compliance with SEC Memorandum Circular No. 8 – Rotation of External Auditors/Partners-in-Charge.

Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

There were no other changes in or disagreements with accountants during the last three calendar years or any subsequent interim period.

PART III. MANAGEMENT AND CERTAIN SECURITY HOLDERS

Compensation of Directors

1. Members of the Board do not receive any regular compensation from the Company, except for every regular, special or committee meeting actually attended, for which members of the Board of Director receive a per diem of ₱20,000 to ₱50,000.
2. There are no other material terms of, nor any other arrangements with regard to compensation as to which directors are compensated, or are to be compensated, directly or indirectly, for any services provided as a director.
3. As provided for in the Company's By-Laws, the Board of Directors is entitled to an annual incentive bonus in an aggregate amount not exceeding five percent (5%) of the Company's net profit before tax

Employment Contracts and Termination of Employment and Change-in-Control Arrangements

1. Executive officers' compensation consists of a monthly negotiated salary, a fixed monthly allowance and 13th month pay.
2. The Company paid a total amount of ₱6.5 million for the retirement/resignation of two executives in 2012 based on funded, non-contributory defined benefit group retirement plan as discussed in Note 20 to the financial statements (pages 52 – 56). Except as stated above, there are no other compensatory plan or arrangement with the named executive officers, which results or will result from the resignation, retirement or any other termination of the executive officer's employment with the Company and its subsidiaries or from a change-in-control of the Company or a change in the named executive officer's responsibilities following a change-in-control.

Warrants and Options Outstanding: Repricing

The Company's ₱50 million warrants were not exercised by the shareholders/officers/directors and had already expired last July 21, 2005.

ITEM 11. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

1. Security Ownership of Certain Record and Beneficial Owners of more than 5% of Registrant's Securities as of December 31, 2014

<u>Title of Class</u>	<u>Name, Address of Record Owner and Relationship with Issuer</u>	<u>Name of Beneficial Owner and Relationship with Record Owner</u>	<u>Citizenship</u>	<u>No. of Shares Held</u>	<u>% of Class</u>

3. Voting Trust Holders of 5% or more

There were no persons/shareholders of the Company who have entered into a voting trust agreement during the last three years.

4. Changes in Control

There was no significant change in control of MAC in 2014. We are not aware of any existing or pending transaction which may result in such a change in control.

ITEM 12. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

1. For detailed discussion of the material related party transactions, please see Note 18 of the Company's Notes to Consolidated Financial Statements (pages 47-51).
 - A. Part of the Group's excess cash are deposited in savings and current accounts and placed with Philippine National Bank, an affiliated company under common control, at very competitive rates and based on the outstanding cash balance at the end of the interest earning period. MacroAsia Corporation also leases the office space it currently occupies from the said bank at the bank's current prevailing rental rate. MacroAsia Mining Corporation also entered into a two-year lease contract with Philippine National Bank (formerly Allied Banking Corporation) for its office space starting January 1, 2012. The Company and its subsidiaries have not been given any preferential treatment in any of its transactions with the Bank and continues to lease the office space under the last term and condition.
 - B. MAPDC, as an ecozone operator, leases land from MIAA and subsequently leases the same to its Ecozone locators which include LTP, an affiliate. The rental charge, which is at normal market rate, is subject to a fixed price escalation and deposit. Monthly fees due from LTP are equivalent to MAPDC's cost of leasing the land from MIAA, plus administrative fees. MAPDC has outstanding advances to WBSI and CBRI which were eliminated in the consolidation process.
 - C. MASCORP provides ground handling services to various airline companies at NAIA and MCIA, including Air Philippines, an affiliate under common control. In September 2011, MASCORP started providing ground handling services to Philippine Airlines (PAL), an affiliated company under common control. The ground handling service rates being charged to Air Philippines and PAL are competitive and were the results of negotiations between the companies. MASCORP bills LTP for ground handling services rendered on behalf of its clients. MASCORP also leases ground-handling equipments from PAL and pays AirPhil for its shares on the rental and utilities in NAIA.
 - D. MACS has outstanding payable to PAL representing PAL's share in operation of the passenger lounge at NAIA. In September 2011, MACS started providing catering services to PAL under competitive rates. MACS also leases airline catering equipment from PAL. In 2014 and 2013, MACS provided an unsecured and non-interest bearing cash advances to MacroAsia WLL.
 - E. The Company and its subsidiaries have a trust fund for the employees' retirement plan with Philippine National Bank (formerly Allied Bank Corporation) as the fund manager. The Group has not been given any preferential treatment in any of its transactions with the Bank.
 - F. There are no other on-going contractual or other commitments between the Group and the aforementioned affiliates.

- G. There are no other material transactions with and/or dependence on related parties not discussed above and in the Notes to Consolidated Financial Statements.

- 2. There are no other parties that fall outside the definition of “related parties” under Philippine Accounting Standards (PAS) 24 with whom the Company or its related parties have a relationship that enabled the parties to negotiate terms of material transactions that may not be available from others or independent parties on an arm’s length basis.

SIGNATURES

Pursuant to the requirement of Sec 17 of the Code and Sec 141 of the Corporation Code of the Philippines, this report is signed on behalf of the registrant by the undersigned, thereunto duly authorized, in the City of Makati on _____.

**STATEMENT OF MANAGEMENT'S RESPONSIBILITY
FOR FINANCIAL STATEMENTS**

The management of MacroAsia Corporation is responsible for the preparation and fair presentation of the consolidated financial statements as at December 31, 2014 and 2013 and for each of the three years in the period ended December 31, 2014, including the additional components attached therein, in accordance with Philippine Financial Reporting Standards. This responsibility includes designing and implementing internal controls relevant to the preparation and fair presentation of the consolidated financial statements that are free from material misstatement, whether due to fraud or error, selecting and applying appropriate accounting policies, and making accounting estimates that are reasonable in the circumstances.

The Board of Directors reviews and approves the consolidated financial statements and submits the same to the stockholders.

SyCip Gorres Velayo & Co., the independent auditors, appointed by the stockholders has examined the consolidated financial statements of the company in accordance with Philippine Standards on Auditing, and in its report to the stockholders, has expressed its opinion on the fairness of presentation upon completion of such examination.

INDEPENDENT AUDITORS' REPORT

The Stockholders and the Board of Directors
MacroAsia Corporation

We have audited the accompanying consolidated financial statements of MacroAsia Corporation and subsidiaries, which comprise the consolidated balance sheets as at December 31, 2014 and 2013, and the consolidated statements of income, statements of comprehensive income, statements of changes in equity and statements of cash flows for each of the three years in the period ended December 31, 2014, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with Philippine Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Philippine Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of MacroAsia Corporation and subsidiaries as at December 31, 2014 and 2013, and their financial performance and their cash flows for each of the three years in the period ended December 31, 2014 in accordance with Philippine Financial Reporting Standards.

See accompanying Notes to Consolidated Financial Statements.

MACROASIA CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Corporate Information and Business Operations

Corporate Information

MacroAsia Corporation (the Company or MAC), a publicly-listed corporation, was incorporated in the Philippines on February 16, 1970 under the name Infanta Mineral & Industrial Corporation to engage in the business of geological exploration and development. On January 26, 1994, its Articles of Incorporation was amended to change its primary purpose from exploration and development to that of engaging in the business of a holding company, and changed its corporate name to Cobertson Holdings Corporation. On November 6, 1995, the Company's Articles of Incorporation was again amended to change its corporate name to its present name. Its registered office address is at 12th Floor, PNB Allied Bank Center, 6754 Ayala Avenue, Makati City.

Business Operations

The principal activities of the Company and its subsidiaries (collectively referred to as the Group) are described in Note 4. The Company, through its subsidiaries and associates (see Note 9), is presently engaged in aviation-support businesses at the Ninoy Aquino International Airport (NAIA), Manila Domestic Airport (MDA), Mactan-Cebu International Airport (MCIA), Kalibo International Airport (KIA) and the General Aviation Areas. It provides in-flight catering services, ground handling services for passenger and cargo aircraft, and helicopter charter flight services. It also operates/develops the sole economic zone within the NAIA.

Through MacroAsia Catering Services, Inc. (MACS), the Company, is now providing the food requirements of some passenger terminal lounges in NAIA. It has also ventured into the provision of the food service requirements of non-airline institutional clients outside the airport. Further, considering the expertise of staff gained through the exploration of the Company's Infanta Nickel Project in Palawan, the Company started providing nickel exploration services for other mining companies, through MacroAsia Mining Corporation (MMC), a wholly-owned subsidiary. Through MacroAsia Properties Development Corporation (MAPDC), the Company started pursuing projects related to reclaimed water supply, bulk water supply using surface water sources, and water distribution in areas outside of Metro Manila.

Through Lufthansa Technik Philippines, Inc. (LTP), an associate, which has a maintenance, repairs and overhaul facility in the Philippines, the Company provides globally competitive heavy maintenance and engineering services for specific models of Airbus and Boeing aircraft for airline clients all over the world.

The consolidated financial statements as of December 31, 2014 and 2013 and for each of the three years in the period ended December 31, 2014 were authorized for issuance by the Board of Directors (BOD) on March 31, 2015.

2. Summary of Significant Accounting and Financial Reporting Policies

Basis of Preparation

The consolidated financial statements have been prepared using the historical cost basis, except for available-for-sale financial assets which are carried at fair values. The consolidated financial statements are presented in Philippine peso (Peso), which is the Company's functional and presentation currency, and rounded to the nearest Peso except when otherwise indicated.

Statement of Compliance

The consolidated financial statements have been prepared in compliance with Philippine Financial Reporting Standards (PFRS).

Changes in Accounting Policies

The accounting policies adopted are consistent with those of the previous financial year except for the adoption of the following amendments and Philippine interpretation based on the interpretation of the International Financial Reporting Standards Interpretations Committee (IFRIC) effective beginning January 1, 2014.

- PFRS 10, *Consolidated Financial Statements*, PFRS 11, *Joint Arrangements* and PAS 27, *Separate Financial Statements: Investment Entities* (Amendments). These amendments provide an exception to the consolidation requirement for entities that meet the definition of an investment entity under PFRS 10. The exception to consolidation requires investment entities to account for subsidiaries at fair value through profit or loss. These amendments are currently not relevant to the Group since none of the entities within the Group qualifies as investment entity under PFRS 10. The Company will continue to assess its Group entities in relation to identifying an investment entity.
- Philippine Accounting Standards (PAS) 32, *Financial Instruments: Presentation - Offsetting Financial Assets and Financial Liabilities* (Amendments). These amendments clarify the meaning of ‘currently has a legally enforceable right to set-off’ and the criteria for non-simultaneous settlement mechanisms of clearing houses to qualify for offsetting. These amendments did not have impact on the Group’s financial statements since the Group has no offsetting arrangements.
- PAS 39, *Financial Instruments: Recognition and Measurement - Novation of Derivatives and Continuation of Hedge Accounting* (Amendments). These amendments provide relief from discontinuing hedge accounting when novation of a derivative designated as a hedging instrument meets certain criteria. These amendments did not have impact on the Group’s financial position or performance.
- Philippine Interpretation IFRIC 21, *Levies*. IFRIC 21 clarifies that an entity recognizes a liability for a levy when the activity that triggers payment, as identified by the relevant legislation, occurs. For a levy that is triggered upon reaching a minimum threshold, the interpretation clarifies that no liability should be anticipated before the specified minimum threshold is reached. This interpretation did not have significant impact on the Group’s financial statements as it has applied the recognition principles under PAS 37, *Provisions, Contingent Liabilities and Contingent Assets*, consistent with the requirements of IFRIC 21 in prior years.

Annual Improvements to PFRS (2010-2012 cycle)

In the 2010-2012 annual improvements cycle, seven amendments to six standards were issued, which included an amendment to PFRS 13, *Fair Value Measurement*. The amendment clarifies that short-term receivables and payables with no stated interest rates can be measured at invoice amounts when the effect of discounting is immaterial. This amendment did not have material impact to the Group.

Annual Improvements to PFRS (2011-2013 cycle)

In the 2011-2013 annual improvements cycle, four amendments to four standards were issued, which included an amendment to PFRS 1, *First-time Adoption of Philippine Financial Reporting Standards*. The amendment to PFRS 1 clarifies that an entity may choose to apply either a current

standard or a new standard that is not yet mandatory, but permits early application, provided either standard is applied consistently throughout the periods presented in the entity's first PFRS financial statements. This amendment did not have impact to the Group as it is not a first time PFRS adopter.

Accounting Standards, Amendments to Existing Standards
and Interpretations Effective Subsequent to December 31, 2014

The standards, amendments and interpretations which have been issued but not yet effective as at December 31, 2014 are disclosed below. Except as otherwise indicated, the Group does not expect the adoption of the applicable new and amended standards to have a significant impact on its financial position or performance.

- PFRS 9, *Financial Instruments: Classification and Measurement*. PFRS 9 (2010 version) reflects the first phase on the replacement of PAS 39 and applies to the classification and measurement of financial assets and liabilities as defined in PAS 39. PFRS 9 requires all financial assets to be measured at fair value at initial recognition. A debt financial asset may, if the fair value option (FVO) is not invoked, be subsequently measured at amortized cost if it is held within a business model that has the objective to hold the assets to collect the contractual cash flows and its contractual terms give rise, on specified dates, to cash flows that are solely payments of principal and interest on the principal outstanding. All other debt instruments are subsequently measured at fair value through profit or loss. All equity financial assets are measured at fair value either through OCI or profit or loss. Equity financial assets held for trading must be measured at fair value through profit or loss. For FVO liabilities, the amount of change in the fair value of a liability that is attributable to changes in credit risk must be presented in OCI. The remainder of the change in fair value is presented in profit or loss, unless presentation of the fair value change in respect of the liability's credit risk in OCI would create or enlarge an accounting mismatch in profit or loss. All other PAS 39 classification and measurement requirements for financial liabilities have been carried forward into PFRS 9, including the embedded derivative separation rules and the criteria for using the FVO. The Group is currently assessing the impact of adopting this standard.

PFRS 9 (2010 version) is effective for annual periods beginning on or after January 1, 2015. This mandatory adoption date was moved to January 1, 2018 when the final version of PFRS 9 was adopted by the Philippine Financial Reporting Standards Council (FRSC). Such adoption, however, is still for approval by the Board of Accountancy (BOA). The Group will not opt to early adopt the standard.

The following new standards and amendments were already adopted by the FRSC but are still for approval by BOA.

Effective in 2015

- PAS 19, *Employee Benefits - Defined Benefit Plans: Employee Contributions* (Amendments). PAS 19 requires an entity to consider contributions from employees or third parties when accounting for defined benefit plans. Where the contributions are linked to service, they should be attributed to periods of service as a negative benefit. These amendments clarify that, if the amount of the contributions is independent of the number of years of service, an entity is permitted to recognize such contributions as a reduction in the service cost in the period in which the service is rendered, instead of allocating the contributions to the periods of service. This amendment is effective for annual periods beginning on or after January 1, 2015. It is expected that this amendment would not be relevant to the Group since the Group's retirement plan is noncontributory.

- Annual Improvements to PFRS (2010 to 2012 cycle) which are effective for annual periods beginning on or after January 1, 2015. Except as otherwise stated, the Group does not expect these amendments to have a significant impact on the financial statements.
- PFRS 2, *Share-based Payment - Definition of Vesting Condition*. This improvement is applied prospectively and clarifies various issues relating to the definitions of performance and service conditions which are vesting conditions, including:
 - A performance condition must contain a service condition
 - A performance target must be met while the counterparty is rendering service
 - A performance target may relate to the operations or activities of an entity, or to those of another entity in the same group
 - A performance condition may be a market or non-market condition
 - If the counterparty, regardless of the reason, ceases to provide service during the vesting period, the service condition is not satisfied.
- PFRS 3, *Business Combinations - Accounting for Contingent Consideration in a Business Combination*. The amendment is applied prospectively for business combinations for which the acquisition date is on or after July 1, 2014. It clarifies that a contingent consideration that is not classified as equity is subsequently measured at fair value through profit or loss whether or not it falls within the scope of PAS 39. The Group shall consider this amendment for future business combinations.
- PFRS 8, *Operating Segments - Aggregation of Operating Segments and Reconciliation of the Total of the Reportable Segments' Assets to the Entity's Assets*. The amendments are applied retrospectively and clarify that:
 - An entity must disclose the judgments made by management in applying the aggregation criteria in the standard, including a brief description of operating segments that have been aggregated and the economic characteristics (e.g., sales and gross margins) used to assess whether the segments are 'similar'.
 - The reconciliation of segment assets to total assets is only required to be disclosed if the reconciliation is reported to the chief operating decision maker, similar to the required disclosure for segment liabilities.
- PAS 16, *Property, Plant and Equipment* and PAS 38, *Intangible Assets: Revaluation Method - Proportionate Restatement of Accumulated Depreciation and Amortization*. The amendment is applied retrospectively and clarifies in PAS 16 and PAS 38 that the asset may be revalued by reference to the observable data on either the gross or the net carrying amount. In addition, the accumulated depreciation or amortization is the difference between the gross and carrying amounts of the asset.
- PAS 24, *Related Party Disclosures - Key Management Personnel*. The amendment is applied retrospectively and clarifies that a management entity, which is an entity that provides key management personnel services, is a related party subject to the related party disclosures. In addition, an entity that uses a management entity is required to disclose the expenses incurred for management services. These amendments are not relevant to the Group.
- Annual Improvements to PFRS (2011-2013 cycle) which are effective for annual periods beginning on or after January 1, 2015. Except as otherwise stated, the Group does not expect these amendments to have a significant impact on the financial statements.

- PFRS 3 - *Scope Exceptions for Joint Arrangements*. The amendment is applied prospectively and clarifies the following regarding the scope exceptions within PFRS 3:
 - Joint arrangements, not just joint ventures, are outside the scope of PFRS 3.
 - This scope exception applies only to the accounting in the financial statements of the joint arrangement itself.
- PFRS 13 - *Portfolio Exception*. The amendment is applied prospectively and clarifies that the portfolio exception in PFRS 13 can be applied not only to financial assets and financial liabilities, but also to other contracts within the scope of PAS 39.
- PAS 40, *Investment Property*. The amendment is applied prospectively and clarifies that PFRS 3, and not the description of ancillary services in PAS 40, is used to determine if the transaction is the purchase of an asset or business combination. The description of ancillary services in PAS 40 only differentiates between investment property and owner-occupied property (i.e., property, plant and equipment).

Effective in 2016

- PAS 16 and PAS 38 - *Clarification of Acceptable Methods of Depreciation and Amortization* (Amendments). The amendments clarify the principle in PAS 16 and PAS 38 that revenue reflects a pattern of economic benefits that are generated from operating a business (of which the asset is part) rather than the economic benefits that are consumed through use of the asset. As a result, a revenue-based method cannot be used to depreciate property, plant and equipment and may only be used in very limited circumstances to amortize intangible assets. The amendments are effective prospectively for annual periods beginning on or after January 1, 2016, with early adoption permitted. These amendments are not expected to have any impact to the Group given that the Group has not used a revenue-based method to depreciate its noncurrent assets.
- PAS 16 and PAS 41, *Agriculture - Bearer Plants* (Amendments). The amendments change the accounting requirements for biological assets that meet the definition of bearer plants. Under the amendments, biological assets that meet the definition of bearer plants will no longer be within the scope of PAS 41. Instead, PAS 16 will apply. After initial recognition, bearer plants will be measured under PAS 16 at accumulated cost (before maturity) and using either the cost model or revaluation model (after maturity). The amendments also require that produce that grows on bearer plants will remain in the scope of PAS 41 measured at fair value less costs to sell. For government grants related to bearer plants, PAS 20, *Accounting for Government Grants and Disclosure of Government Assistance*, will apply. The amendments are retrospectively effective for annual periods beginning on or after January 1, 2016, with early adoption permitted. These amendments are not expected to have any impact to the Group as the Group does not have any bearer plants.
- PAS 27, *Separate Financial Statements - Equity Method in Separate Financial Statements* (Amendments). The amendments will allow entities to use the equity method to account for investments in subsidiaries, joint ventures and associates in their separate financial statements. Entities already applying PFRS and electing to change to the equity method in its separate financial statements will have to apply that change retrospectively. For first-time adopters of PFRS electing to use the equity method in its separate financial statements, they will be required to apply this method from the date of transition to PFRS. The amendments are effective for annual periods beginning on or after January 1, 2016, with early adoption permitted. The Company does not intend to change its accounting for its subsidiaries and associates in the separate financial statements.

- PFRS 10 and PAS 28, *Investments in Associates and Joint Ventures - Sale or Contribution of Assets between an Investor and its Associate or Joint Venture* (Amendments). These amendments address an acknowledged inconsistency between the requirements in PFRS 10 and those in PAS 28 in dealing with the sale or contribution of assets between an investor and its associate or joint venture. The amendments require that a full gain or loss is recognized when a transaction involves a business (whether it is housed in a subsidiary or not). A partial gain or loss is recognized when a transaction involves assets that do not constitute a business, even if these assets are housed in a subsidiary. These amendments are effective from annual periods beginning on or after January 1, 2016.
- PFRS 11 - *Accounting for Acquisitions of Interests in Joint Operations* (Amendments). The amendments to PFRS 11 require that a joint operator accounting for the acquisition of an interest in a joint operation, in which the activity of the joint operation constitutes a business must apply the relevant PFRS 3 principles for business combinations accounting. The amendments also clarify that a previously held interest in a joint operation is not remeasured on the acquisition of an additional interest in the same joint operation while joint control is retained. In addition, a scope exclusion has been added to PFRS 11 to specify that the amendments do not apply when the parties sharing joint control, including the reporting entity, are under common control of the same ultimate controlling party.

The amendments apply to both the acquisition of the initial interest in a joint operation and the acquisition of any additional interests in the same joint operation and are prospectively effective for annual periods beginning on or after January 1, 2016, with early adoption permitted.

- PFRS 14, *Regulatory Deferral Accounts*. PFRS 14 is an optional standard that allows an entity, whose activities are subject to rate-regulation, to continue applying most of its existing accounting policies for regulatory deferral account balances upon its first-time adoption of PFRS. PFRS 14 is effective for annual periods beginning on or after January 1, 2016. Since the Group is an existing PFRS preparer, this standard would not apply.
- Annual Improvements to PFRS (2012-2014 cycle). The Annual Improvements to PFRS (2012-2014 cycle) are effective for annual periods beginning on or after January 1, 2016 and are not expected to have a material impact to the Group. They include:
 - PFRS 5, *Non-current Assets Held for Sale and Discontinued Operations - Changes in Methods of Disposal*. The amendment is applied prospectively and clarifies that changing from a disposal through sale to a disposal through distribution to owners and vice-versa should not be considered to be a new plan of disposal, rather it is a continuation of the original plan. There is, therefore, no interruption of the application of the requirements in PFRS 5. The amendment also clarifies that changing the disposal method does not change the date of classification.
 - PFRS 7, *Financial Instruments: Disclosures - Servicing Contracts*. PFRS 7 requires an entity to provide disclosures for any continuing involvement in a transferred asset that is derecognized in its entirety. The amendment clarifies that a servicing contract that includes a fee can constitute continuing involvement in a financial asset. An entity must assess the nature of the fee and arrangement against the guidance in PFRS 7 in order to assess whether the disclosures are required. The amendment is to be applied such that the assessment of which servicing contracts constitute continuing involvement will need to be done retrospectively. However, comparative disclosures are not required to be provided for any period beginning before the annual period in which the entity first applies the amendments.

- PFRS 7, *Applicability of the Amendments to PFRS 7 to Condensed Interim Financial Statements*. This amendment is applied retrospectively and clarifies that the disclosures on offsetting of financial assets and financial liabilities are not required in the condensed interim financial report unless they provide a significant update to the information reported in the most recent annual report.
- PAS 19 - *Regional Market Issue Regarding Discount Rate*. This amendment is applied prospectively and clarifies that market depth of high quality corporate bonds is assessed based on the currency in which the obligation is denominated, rather than the country where the obligation is located. When there is no deep market for high quality corporate bonds in that currency, government bond rates must be used.
- PAS 34, *Interim Financial Reporting - Disclosure of Information 'Elsewhere in the Interim Financial Report'*. The amendment is applied retrospectively and clarifies that the required interim disclosures must either be in the interim financial statements or incorporated by cross-reference between the interim financial statements and wherever they are included within the greater interim financial report (e.g., in the management commentary or risk report).

Effective in 2018

- PFRS 9 - *Hedge Accounting and Amendments to PFRS 9, PFRS 7 and PAS 39*. PFRS 9 (2013 version) already includes the third phase of the project to replace PAS 39 which pertains to hedge accounting. This version of PFRS 9 replaces the rules-based hedge accounting model of PAS 39 with a more principles-based approach. Changes include replacing the rules-based hedge effectiveness test with an objectives-based test that focuses on the economic relationship between the hedged item and the hedging instrument, and the effect of credit risk on that economic relationship; allowing risk components to be designated as the hedged item, not only for financial items but also for non-financial items, provided that the risk component is separately identifiable and reliably measurable; and allowing the time value of an option, the forward element of a forward contract and any foreign currency basis spread to be excluded from the designation of a derivative instrument as the hedging instrument and accounted for as costs of hedging. PFRS 9 also requires more extensive disclosures for hedge accounting.

PFRS 9 (2013 version) has no mandatory effective date. The mandatory effective date of January 1, 2018 was eventually set when the final version of PFRS 9 was adopted by the FRSC. The adoption of the final version of PFRS 9, however, is still for approval by BOA.

The Group is currently assessing the impact of adopting this standard.

- PFRS 9, *Financial Instruments* (2014). In July 2014, the final version of PFRS 9 was issued. PFRS 9 reflects all phases of the financial instruments project and replaces PAS 39 and all previous versions of PFRS 9. The standard introduces new requirements for classification and measurement, impairment, and hedge accounting. PFRS 9 is effective for annual periods beginning on or after January 1, 2018, with early application permitted. Retrospective application is required, but comparative information is not compulsory. Early application of previous versions of PFRS 9 is permitted if the date of initial application is before February 1, 2015.

The Group is currently assessing the impact of adopting this standard.

Deferred Effectivity

- Philippine Interpretation IFRIC 15, *Agreements for the Construction of Real Estate*. This interpretation covers accounting for revenue and associated expenses by entities that undertake the construction of real estate directly or through subcontractors. The Philippine SEC and the FRSC have deferred the effectivity of this interpretation until the final Revenue standard is issued by the International Accounting Standards Board (IASB) and an evaluation of the requirements of the final Revenue standard against the practices of the Philippine real estate industry is completed. Adoption of the interpretation when it becomes effective will not have any impact on the financial statements of the Group.

The following new standard and amendments issued by the IASB has not yet been adopted by the FRSC.

- International Financial Reporting Standards (IFRS) 15, *Revenue from Contracts with Customers*. IFRS 15 was issued in May 2014 and establishes a new five-step model that will apply to revenue arising from contracts with customers. Under IFRS 15, revenue is recognized at an amount that reflects the consideration to which an entity expects to be entitled to in exchange for transferring goods or services to a customer. The principles in IFRS 15 provide a more structured approach to measuring and recognizing revenue. The new revenue standard is applicable to all entities and will supersede all current revenue recognition requirements under IFRS. Either a full or modified retrospective application is required for annual periods beginning on or after January 1, 2017, with early adoption permitted.
- Amendments to International Accounting Standards (IAS) 1, *Presentation of Financial Statements*. In December 2014, the IASB issued the amendments to IAS 1. The amendments include narrow-focus improvements in five areas; namely, materiality, disaggregation and subtotals, notes structure, disclosure of accounting policies and presentation of items of other comprehensive income arising from equity accounted investments. The amendments are effective on or after January 1, 2016.
- Amendments to IFRS 10, *Consolidated Financial Statements*, IFRS 12, *Disclosure of Interests in Other Entities*, and IAS 28, *Investments in Associates and Joint Ventures*. In December 2014, the IASB issued *Investment Entities: Applying the Consolidation Exception* (amendments to IFRS 10, IFRS 12 and IAS 28). The amendments address certain issues that have arisen in applying the investment entities exception under IFRS 10.

The Group is currently assessing the impact of IFRS 15 and the amendments to IAS 1 and IFRS 10, IFRS 12 and IAS 28 and plans to adopt the new and amended standards on their required effective dates once adopted locally.

Basis of Consolidation

The consolidated financial statements comprise the financial statements of the Company, its direct subsidiaries, the subsidiaries of MAPDC and the subsidiary of Watergy Business Solutions, Inc. (WBSI) which were all incorporated in the Philippines and are registered with the Philippine Securities and Exchange Commission, as of December 31 of each year.

	Nature of business	Percentage of Direct Ownership by MAPDC		Percentage of Ownership by MAC			
		2014	2013	2014		2013	
				Direct	Indirect ⁽²⁾	Direct	Indirect ⁽²⁾
MAPDC	Economic Zone (Ecozone) developer/operator and water supply	–	–	100	–	100	–
MacroAsia Airport Services Corporation (MASCORP)	Groundhandling aviation services	–	–	100	–	100	–
MacroAsia Air Taxi Services, Inc. (MAATS)	Helicopter chartering services	–	–	100	–	100	–
Airport Specialists' Services Corporation (ASSC) ⁽¹⁾	Manpower services	–	–	100	–	100	–
MMC	Mine exploration, development and operation	–	–	100	–	100	–

⁽¹⁾ Ceased commercial operations effective May 1, 2001.
⁽²⁾ Effective ownership interest through MAPDC and WBSI.

Subsidiaries are entities over which the Group has control. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Specifically, the Group controls an investee if and only if the Group has:

- Power over the investee (i.e., existing rights that give it the current ability to direct the relevant activities of the investee)
- Exposure, or rights, to variable returns from its involvement with the investee, and
- The ability to use its power over the investee to affect its returns

When the Group has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee
- Rights arising from other contractual arrangements
- The Group's voting rights and potential voting rights

The Group re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statement from the date the Group gains control until the date the Group ceases to control the subsidiary.

Non-controlling Interests

Non-controlling interest represents the portion of the net assets of consolidated subsidiaries not held by the Group. Non-controlling interest is presented separately in the consolidated statement of income, consolidated statement of comprehensive income and within the equity section of the

consolidated balance sheet, separate from the Company's equity. Profit or loss and each component of other comprehensive income are attributed to the equity holders of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, it: (a) derecognizes the assets (including goodwill) and liabilities of the subsidiary; (b) derecognizes the carrying amount of any non-controlling interests; (c) derecognizes the cumulative translation differences recorded in equity; (d) recognizes the fair value of the consideration received; (e) recognizes the fair value of any investment retained; (f) recognizes any surplus or deficit in profit or loss; (g) reclassifies the parent's share of components previously recognized in OCI to profit or loss or retained; (h) earnings, as appropriate, as would be required if the Group had directly disposed of the related assets or liabilities.

Prior to January 1, 2010, acquisition of non-controlling interest was accounted for using the parent entity extension method, whereby, the difference between the consideration and the book value of the share of the net assets acquired were recognized as goodwill (see Note 14). After the initial recognition, goodwill is measured at cost less accumulated impairment loss.

Investments in Associates

Associates are entities over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but not control over those policies. The considerations made in determining significant influence are similar to those necessary to determine control over subsidiaries.

The Group's investments in its associates are accounted for using the equity method. Under the equity method, the investment in associates is initially recognized at cost. The carrying amount of the investment is adjusted to recognize changes in the Group's share of net assets of the associate since the acquisition date. Goodwill relating to the associate is included in the carrying amount of the investment and is neither amortized nor individually tested for impairment.

The profit or loss reflects the Group's share of the results of operations of the associates. Any change in other comprehensive income of the investee is presented as part of the Group's other comprehensive income. In addition, when there has been a change recognized directly in the equity of the associates, the Group recognizes its share of any changes, when applicable, in the consolidated statement of changes in equity. Unrealized gains and losses resulting from transactions between the Group and the associates are eliminated to the extent of the interest in the associates.

The aggregate of the Group's share of profit or loss of associates is shown in the profit or loss outside operating profit and represents profit or loss after tax and non-controlling interests in the subsidiaries of the associates.

After application of the equity method, the Group determines whether it is necessary to recognize an impairment loss on its investment in its associates. At each reporting date, the Group determines whether there is objective evidence that the investment in the associates is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the associates and its carrying value, and then recognizes the loss in the profit or loss.

Upon loss of significant influence over the associates, the Group measures and recognizes any retained investment at its fair value. Any difference between the carrying amount of the associates upon loss of significant influence and the fair value of the retained investment and proceeds from disposal is recognized in profit or loss.

The financial statements of the associates are prepared for the same reporting period as the Group. When necessary, adjustments are made to bring the accounting policies in line with those of the Group.

Investments in associates pertain to the Company's investments in shares of stock of Cebu Pacific Catering Services, Inc. (CPCS), 40%-owned, LTP, 49%-owned and MacroAsia WLL, 35%-owned (see Note 9).

Functional Currency-denominated Transactions

Each entity in the Group determines its own functional currency and the items included in the financial statements of each entity are measured using that functional currency. Transactions in foreign currencies are initially recorded in the functional currency rate at the date of the transaction. Outstanding monetary assets and liabilities denominated in foreign currencies are translated at the functional currency rate of exchange at end of reporting period. All differences are taken to profit or loss. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Various factors are considered in determining the functional currency of each entity within the Group, including prices of goods and services, competition, cost and expenses, and other factors including the currency in which financing deals are primarily undertaken. Additional factors are considered in determining the functional currency of a foreign operation, including whether its activities are carried as an extension of the Group rather than being carried out with significant autonomy.

The financial position and results of operations of an associate in United States (US) \$ functional currency is translated into the Group's presentation currency using the following procedures:

- a. Assets and liabilities for each balance sheet presented are translated at the closing rate at the balance sheet date.
- b. Income and expenses for each statement of income are translated using the monthly average rate.
- c. All resulting exchange differences are recognized as part of other comprehensive income (loss) and as a separate component of equity.

Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible to by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The Group's Finance Committee determines the policies and procedures for both recurring fair value measurement. At each reporting date, the Group analyzes the movements in the values of assets and liabilities which are required to be re-measured or re-assessed as per the Group's accounting policies. For this analysis, the Group verifies the major inputs applied in the latest valuation by agreeing the information in the valuation computation to contracts and other relevant documents.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

As of December 31, 2014 and 2013, the Group's investments in AFS are carried at fair value and with recurring fair value measurements. Also, fair values of financial instruments measured at amortized cost are disclosed in Note 31. The Group also discloses the fair value of its investment properties with unrecognized fair value measurements (Notes 12 and 31).

Current versus Non-Current Classification

The Group presents assets and liabilities in the balance sheet based on current/non-current classification. An asset is current when it is:

- Expected to be realized or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realized within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Group classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

Cash and Cash Equivalents

Cash consists of cash on hand and in banks. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of three months or less from dates of acquisition and are subject to an insignificant risk of changes in value.

Financial Assets and Financial Liabilities

The Group recognizes a financial asset or a financial liability in the consolidated balance sheet when it becomes a party to the contractual provisions of the instrument. In the case of a regular way purchase or sale of financial assets, recognition and derecognition, as applicable, is done using settlement date accounting. All regular way purchases and sales of financial assets are recognized on the trade date, i.e., the date that the Group commits to purchase the asset. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the market place.

Financial instruments are recognized initially at fair value, which is the fair value of the consideration given (in case of an asset) or received (in case of a liability). The initial measurement of financial instruments, except for those designated at fair value through profit and loss (FVPL), includes any transaction cost.

Subsequent to initial recognition, the Group classifies its financial instruments in the following categories: financial assets and financial liabilities at FVPL, loans and receivables, held-to-maturity (HTM) investments, AFS financial assets and other financial liabilities. The classification depends on the purpose for which the instruments are acquired and whether they are quoted in an active market. Management determines the classification at initial recognition and, where allowed and appropriate, re-evaluates this classification at every reporting date.

Financial instruments are classified as liabilities or equity in accordance with the substance of the contractual arrangement. Interest, dividends, gains and losses relating to a financial instrument or a component that is a financial liability are reported as expense or income. Distributions to holders of a financial instruments classified as equity are charged directly to equity, net of any related income tax benefits.

Financial assets or financial liabilities at FVPL

Financial assets or financial liabilities classified in this category are financial assets or financial liabilities that are held for trading or financial assets and financial liabilities that are designated by management as at FVPL on initial recognition when any of the following criteria are met:

- The designation eliminates or significantly reduces the inconsistent treatment that would otherwise arise from measuring the assets or liabilities, or recognizing gains or losses on them on a different basis, or

- The assets and liabilities are part of a group of financial assets and financial liabilities, respectively, or both financial assets and financial liabilities, which are managed and their performance is evaluated on a fair value basis, in accordance with a documented risk management or investment strategy, or
- The financial instrument contains an embedded derivative, unless the embedded derivative does not significantly modify the cash flows or it is clear, with little or no analysis, that it would not be separately recorded.

Financial assets are classified as held for trading if these are acquired for the purpose of selling in the near term. Derivatives are also classified as held for trading unless they are designated as effective hedging instruments.

Financial assets and financial liabilities at FVPL are recorded in the consolidated balance sheet at fair value. Changes in fair value are recorded in profit or loss. Interest earned is recorded as interest income, while dividend income is recorded as income according to the terms of the contract, or when the right of the payment has been established. Interest incurred is recorded as financing charges.

Where a contract contains one or more embedded derivatives, the hybrid contract may be designated as financial asset or financial liabilities at FVPL, except where the embedded derivative does not significantly modify the cash flows or it is clear that separation of the embedded derivative is prohibited.

Derivative Financial Instruments

A derivative is a financial instrument or other contract with all three of the following characteristics:

- Its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided in the case of a nonfinancial variable that the variable is not specific to a party to the contract (sometimes called the “underlying”);
- It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts that would be expected to have a similar response to changes in market factors; and
- It is settled at a future date.

The Group uses derivative financial instruments such as currency forwards contracts as economic hedge to its risks arising from foreign currency fluctuations. Such derivative financial instrument is initially recognized at fair value on the date on which the derivative contracts are entered into and are subsequently remeasured at fair value. Derivatives are carried as assets when the fair value is positive and as liabilities when the fair value is negative. The fair values of freestanding forward currency transactions are calculated by reference to current forward exchange rates for contracts with similar maturity profile.

There are no outstanding derivatives as of December 31, 2014 and 2013.

Embedded derivatives

An embedded derivative is separated from the host financial or non-financial contract and accounted for as a derivative if all of the following conditions are met:

- The economic characteristics and risks of the embedded derivative are not closely related to the economic characteristic of the host contract;

- A separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and
- The hybrid or combined instrument is not recognized as at fair value through profit or loss.

The Group assesses whether embedded derivatives are required to be separated from host contracts when the Group first becomes party to the contract. Reassessment only occurs if there is a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required.

The Group has no bifurcated embedded derivatives and has opted not to designate its derivative transactions under hedge accounting.

Loans and receivables

Loans and receivables are nonderivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise when the Group provides money, goods or services directly to a debtor with no intention of trading the receivables. Loans and receivables are initially recognized at fair value, which normally pertains to the billable amount. After initial measurement, these are subsequently measured at amortized cost using the effective interest rate method. Amortized cost is calculated by taking account any discount or premium on acquisition and fees that are an integral part of the effective interest rate. Gains and losses are recognized in profit or loss when the loans and receivables are derecognized or impaired, as well as through the amortization process. Loans and receivables are included in current assets if maturity is within 12 months from the reporting date or within the normal operating cycle, whichever is longer. Otherwise, these are classified as noncurrent assets.

As of December 31, 2014 and 2013, the Group's cash in banks and cash equivalents, receivables project advances and deposits are classified as loans and receivables.

HTM investments

HTM investments are non-derivative financial assets with fixed or determinable payments and fixed maturities wherein the Group has the positive intention and ability to hold to maturity. HTM investments are carried at cost or amortized cost in the consolidated balance sheet. Amortization is determined using the effective interest rate method. Assets under this category are classified as current assets if maturity is within 12 months from the end of reporting date and noncurrent assets if maturity is more than a year.

As of December 31, 2014 and 2013, the Group has not designated any financial asset as HTM investment.

AFS investments

AFS investments are non-derivative financial assets that are either designated in this category or not classified in any of the other categories. AFS investments are carried at fair value in the consolidated balance sheet. Changes in the fair value of investments classified as AFS investments are recognized in other comprehensive income, except for the foreign exchange fluctuations on AFS debt securities and the related effective interest which are taken directly to profit or loss. These changes in fair values are recognized as other comprehensive income and remain in equity until the investment is sold, collected or otherwise disposed of, or until the investment is determined to be impaired, at which time the cumulative gain or loss previously reported in equity is included in profit or loss.

As of December 31, 2014 and 2013, the Group's investments in retail treasury and corporate bonds, golf club share and other proprietary and equity shares are classified as AFS investments.

Other financial liabilities

This category pertains to financial liabilities that are not held for trading and are not designated as at FVPL upon the inception of the liability. These include liabilities arising from operations (e.g., payables and accruals). Dividends payable also fall under this category.

Borrowings are recognized initially at fair value, net of any transaction cost incurred. Borrowings are subsequently stated at amortized cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognized in the profit or loss over the period of the borrowing using the effective interest rate.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the end of reporting date.

Notes payable, accounts payable and accrued liabilities, dividends payable and rental deposit are recognized in the period in which the related money, goods or services are received or when a legally enforceable claim against the Group is established. These are measured at amortized cost, normally equal to the nominal amount.

Other financial liabilities are recognized initially at fair value and are subsequently carried at amortized cost, taking into account the impact of applying the effective interest rate method of amortization (or accretion) for any related premium (or discount) and any directly attributable transaction cost.

Derecognition of Financial Assets and Financial Liabilities

Financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognized when:

- the right to receive cash flows from the asset has expired; or
- the Group retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a “pass-through” arrangement; or
- the Group has transferred its right to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Where the Group has transferred its right to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognized to the extent of the Group’s continuing involvement in the asset.

Financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged, cancelled or has expired.

Where an existing financial liability is replaced by another from the same lender on substantially different terms or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the profit or loss.

Impairment of Financial Assets

An assessment is made at the end of reporting date to determine whether there is objective evidence that a specific financial asset may be impaired. If such exists, any impairment loss is recognized in profit or loss.

The Group assesses at each end of the reporting date whether a financial asset or a group of financial assets is impaired.

Assets carried at amortized cost

The Group first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. Objective evidence includes observable data that comes to the attention of the Group about loss events such as, but not limited to, significant financial difficulty of the counterparty, a breach of contract (such as a default or delinquency in interest or principal payments), probability that the borrower will enter bankruptcy or other financial reorganization. If there is objective evidence that an impairment loss on loans and receivables carried at amortized cost has been incurred, the amount of loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate (i.e., the effective interest rate computed at initial recognition). The carrying amount of the asset shall be reduced through the use of an allowance account. The amount of loss, if any, is recognized in the profit or loss. If it is determined that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, the asset is included in the group of financial assets with similar credit risk and characteristics and that group of financial assets is collectively assessed for impairment. Assets that are individually assessed for impairment and for which an impairment loss is recognized are not included in a collective assessment of impairment.

Loans and receivables, together with the related allowance, are written off when there is no realistic prospect of future recovery and all collateral, if any, have been realized. If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed by adjusting the allowance account. The amount of reversal is recognized in the profit or loss, to the extent that the carrying value of the asset does not exceed its amortized cost at reversal date.

Assets carried at cost

If there is an objective evidence that an impairment loss of an unquoted equity instrument that is not carried at fair value because its fair value cannot be reliably measured, or a derivative asset that is linked to and must be settled by delivery of such unquoted equity instrument has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset.

AFS investments

In case of equity investments classified as AFS investments, impairment would include a significant or prolonged decline in the fair value of the investments below their cost. Where there is evidence of impairment loss, the cumulative loss - measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognized in profit or loss - is removed from other comprehensive income and recognized in profit or loss. Impairment losses on equity investments are not reversed through profit or loss. Increases in fair value after impairment are recognized directly in the other comprehensive income.

In the case of debt instruments classified as AFS, impairment is assessed based on the same criteria as financial assets carried at amortized cost. However, the amount recorded for impairment is the cumulative loss measured as the difference between the amortised cost and the current fair value, less any impairment loss on that investment previously recognised in the profit or loss. Future interest income is based on the reduced carrying amount and is accrued based on the rate of interest used to discount cash flows for the purpose of measuring impairment loss. If, in subsequent year, the fair value of a debt instrument increases and the increase can be related objectively to an event occurring after the impairment loss was recognized in income, the impairment loss is reversed through income.

Any subsequent reversal of an impairment loss is recognized in the profit or loss, to the extent that the carrying value of the asset does not exceed its amortized cost at the reversal date.

“Day 1” Difference

Where the transaction price in a non-active market is different from the fair value of other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable market, the Group recognizes the difference between the transaction price and fair value (a “Day 1” difference) in the profit or loss unless it qualifies for recognition as some other type of asset. In cases where use is made of data which is not observable, the difference between the transaction price and model value is only recognized in the profit or loss when the inputs become observable or when the instrument is derecognized. For each transaction, the Group determines the appropriate method of recognizing the “Day 1” difference amount.

Offsetting of Financial Instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated balance sheet if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. This is generally not the case with the master netting agreements, and the related assets and liabilities are presented in the consolidated balance sheet.

Inventories

Inventories are stated at the lower of cost and net realizable value (NRV). Cost, which includes purchase price and costs incurred in bringing the product to its present location and condition, is determined on the basis of the moving average method.

NRV of food and beverage is the estimated selling price in the ordinary course of business less the estimated costs of completion and estimated costs necessary to make the sale. In the case of materials and supplies, NRV is the recoverable value of the inventories when disposed of at their current condition.

Other Current Assets

Other current assets include input taxes, tax credit certificates, excess creditable withholding taxes and prepayments. Tax credit certificates pertain to amount of tax credit for which the Group is allowed or entitled to in accordance with applicable laws and can be used to settle the Group’s obligations due to the national government. Creditable withholding taxes are deducted from income tax due on the same year the revenue was recognized, with excess recognized as current asset. Prepayments are expenses paid in advance and recorded as asset before they are utilized. They are apportioned over the period covered by the payment and charged to the appropriate accounts in profit or loss when incurred. Prepayments that are expected to be realized for no more than 12 months after the reporting period are classified as current assets; otherwise, these are classified as other noncurrent assets.

Value-Added Tax (VAT)

Revenue, expenses, assets and liabilities are recognized net of the amount of VAT, except where the VAT incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case the VAT is recognized as part of the cost of acquisition of the asset or as part of the expense item as applicable. Receivables and payables are stated with the amount of VAT included. For sale or purchase of services, related VAT is deferred until the related receivable or payable from the transaction has been collected or paid.

The net amount of VAT recoverable from taxation authority is included as part of “Other current assets” and “Deposit and other noncurrent assets” in the consolidated balance sheet. The Group maintains an allowance for any possible disallowance of input VAT. A review of input VAT is made on a continuing basis to determine the adequacy of allowance for probable losses at each reporting date.

The net amount of VAT payable to taxation authority is included in “Accounts payable and accrued liabilities” in the consolidated balance sheet.

Property and Equipment

Property and equipment, except land, are stated at cost less accumulated depreciation and amortization and any impairment in value. Land is stated at cost less impairment in value, if any.

The initial cost of property and equipment comprises its purchase price, including import duties, taxes, borrowing costs and any directly attributable costs of bringing the asset to its working condition and location for its intended use. Expenditures incurred after the property and equipment have been put into operation, such as repairs and maintenance and overhaul costs, are normally charged to profit or loss in the period when the costs are incurred. In situations where it can be clearly demonstrated that the expenditures have resulted in an increase in the future economic benefits expected to be obtained from the use of an item of property and equipment beyond its originally assessed standard of performance, the expenditures are capitalized as an additional cost of property and equipment.

Construction in progress, which is included in property and equipment, is stated at cost. This includes cost of construction, equipment and other direct costs. Construction in progress is not depreciated until such time as the relevant assets are completed and become available for use.

Each part of an item of property and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

Except for a helicopter unit which is depreciated based on estimated 5,358 flying hours, depreciation is computed using the straight-line method over the estimated useful lives of the assets as follows:

	No. of years
Building	5 to 25
Kitchen and other operations equipment	3 to 10
Transportation equipment	5
Helicopter units and spare parts	3 to 5
Aviation equipment	2 to 10
Office furniture, fixtures and equipment	3 to 7
Drilling equipment	5

Building and leasehold and land improvements are amortized over the respective lease term or the lives of the assets (which range from 2 to 25 years), whichever is shorter.

Depreciation and amortization of an item of property and equipment begins when the asset becomes available for use, i.e., when it is in the location and condition necessary for it to be capable of operating in the manner intended by management. Depreciation and amortization ceases at the date that the item is classified as held for sale (or included in a disposal group that is classified as held for sale) in accordance with PFRS 5, *Noncurrent Assets Held for Sale and Discontinued Operations*, or the date the asset is derecognized, whichever is earlier.

The useful lives and depreciation and amortization methods are reviewed periodically to ensure that the residual values, periods and methods of depreciation and amortization are consistent with the expected pattern of economic benefits from items of property and equipment.

When property and equipment are sold or retired, their cost, related accumulated depreciation and amortization and any accumulated impairment in value are removed from the accounts. Any gain or loss resulting from their disposal is included in the profit or loss.

Investment Properties

Investment properties, which pertain to parcel of land held for appreciation in value and land and building held for rentals, are measured at cost less any impairment in value.

Investment properties are derecognized when it has either been disposed of or when the investment properties are permanently withdrawn from use and no future benefit is expected from its disposal. Any gains or losses resulting from the derecognition of an investment property is recognized in the profit or loss in the year of derecognition. Transfers are made to investment property when, and only when, there is a change in use, evidenced by cessation of owner-occupation, commencement of an operating lease to another party or completion of construction or development. Transfers are made from investment property when, and only when, there is a change in use, evidenced by commencement of owner-occupation or commencement of development with a view to sale.

Service Concession Arrangements

The Group accounts for its service concession arrangements in accordance with Philippine Interpretation IFRIC 12, *Service Concession Arrangements*, under the intangible asset model as it receives the right (license) to charge users of public service (see Note 15).

Revenue and Cost Recognition. The Group recognizes and measures revenue and cost in accordance with PAS 11, *Construction Contracts* and PAS 18, *Revenue*, for the services it performs. When the Group provides construction or upgrade services, the consideration received or receivable by the Group is recognized at its fair value. The revenue and cost from these services are recognized based on the percentage of completion measured principally on the basis of estimated completion of a physical proportion of the contract works, and by reference to the actual costs incurred to date over the estimated total cost of the project.

Service Concession Right. The service concession right is recognized initially at the fair value of construction works incurred, which include professional and consultancy fees, structural costs, etc. The Group applies PAS 38 on measuring the intangible assets. Following initial recognition, the service concession right is carried at cost less accumulated amortization and any impairment losses.

The service concession right will be derecognized upon turnover to the Grantor. There will be no gain or loss upon derecognition as the service concession right, which is expected to be fully amortized by then, will be handed over to the Grantor with no consideration.

Deferred Mine Exploration Costs

Expenditures for mine exploration works on mining properties are deferred as incurred, carried at cost less any impairment in value and presented as “Deferred mine exploration costs” in the consolidated balance sheet. When, as a result of the exploration work, recoverable reserves are determined to be present in quantities that can be commercially produced, exploration expenditures and subsequent development costs are capitalized as mine and mining properties and classified as part of property and equipment. A valuation allowance is provided for estimated unrecoverable costs based on the technical assessment by the Group of the future prospects of each mining property. When a project is abandoned, the related deferred mine exploration costs are written off.

Mining expenses, which are not related to establishing the technical feasibility and commercial viability of mineral resource extraction, are expensed outright.

Deferred Project Costs

Deferred project costs pertain to expenditures related to ongoing water projects where technical feasibility has been completed and the Group has the intention and ability (e.g., technical and financial) to complete the relevant activities to have grants from government authorities either to provide bulk or retail water services. Once grants from government authorities are awarded, the Group assesses whether these assets shall be accounted for under Philippine Interpretation IFRIC 12, *Service Concession Arrangements*, or property and equipment. Deferred project costs are not amortized until these are transferred as property and equipment or either financial or intangible asset under IFRIC 12.

Deferred Rent Expense

Deferred rent expense represents the difference between the face amount and the present value of refundable rental deposits made and is being amortized on a straight-line basis over the lease term. Amortization of deferred rent expense is included under “Rent expense” account in the profit or loss. Accretion of the refundable rental deposits using the effective interest rate method is included under “Interest income” account in the profit or loss.

Unearned Rent Income

Unearned rent income represents the difference between the face amount and the present value of refundable rental deposits received and is being amortized on a straight-line basis over the lease term. Amortization of unearned rent income is included under “Rental income” account in the profit or loss. Accretion of the refundable rental deposits using the effective interest rate method is included under “Financing charges” account in the profit or loss.

Impairment of Nonfinancial Assets

Nonfinancial assets other than goodwill

The Group assesses at each reporting date whether there is an indication that investments in associates, property and equipment, investment properties, deferred project costs, service concession right and input and other taxes may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Group makes an estimate of the asset’s recoverable amount. The Group also assesses its deferred mine exploration costs for impairment when facts and circumstances suggest that its carrying amount may exceed its recoverable amount. An asset’s recoverable amount is the higher of an asset’s fair value less costs to sell and its value-in-use. The recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets.

Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value-in-use, the estimated future cash flows are discounted to their present value using a pretax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Impairment losses of continuing operations are recognized in the profit or loss in those expense categories consistent with the function of the impaired asset.

An assessment is also made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed and recognized in profit or loss only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation or amortization, had no impairment loss been recognized for the asset in prior years. After such a reversal, the depreciation charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

Goodwill

Goodwill is reviewed for impairment annually or more frequently if events or changes in circumstances indicate that the carrying value may be impaired. Impairment is determined for goodwill by assessing the recoverable amount of the cash generating unit (or group of cash generating units) to which the goodwill relates. Where the recoverable amount of the cash-generating unit to which goodwill has been allocated is less than its carrying amount, an impairment loss is recognized immediately in the profit or loss. Impairment losses relating to goodwill cannot be reversed for subsequent increases in its recoverable amount in future periods. The Group performs its annual impairment test of goodwill as of December 31 of each year.

Revenue Recognition

Revenue is recognized to the extent that it is probable that the economic benefits associated with the transactions will flow to the Group and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received, excluding discounts and sales taxes or duties. The Group assesses its revenue arrangements against specific criteria in order to determine if it is acting as principal or agent. The Group has concluded that it is acting as a principal in all of its major revenue arrangements. The following specific recognition criteria must also be met before revenue is recognized:

Sale of goods (in-flight and other catering)

Catering revenue is recognized upon delivery of goods to and acceptance by airline clients and other customers.

Rendering of services

Revenue from ground handling, aviation and administrative services, charter flights and exploratory drilling services is recognized when the related services are rendered.

Rental income

Rental income is accounted for on a straight-line basis over the lease term. The cumulative excess of rental income on a straight-line basis over the related rent collections is presented as "Accrued rental receivable" in the consolidated balance sheet.

Interest income

Interest income is recognized as the interest accrues using, where applicable, the effective interest rate method, which is the rate that exactly discounts estimated future cash receipts through the expected term of the financial assets to the net carrying amount of the financial asset.

Construction revenue

See accounting policy under “Service Concession Right”.

Dividend income

Dividend income is recognized when the Group’s right as a shareholder to receive the payment is established.

Other income

Other income is recognized when the right to receive payment is established.

Other Comprehensive Income

Other comprehensive income comprises items of income and expense (including items previously presented under the consolidated statement of changes in equity) that are not recognized in the profit or loss for the year in accordance with PFRS. Other comprehensive income of the Group includes share in foreign currency translation adjustments on investment in an associate, unrealized gain (loss) in changes in fair value of AFS investments and remeasurements in the Group’s defined benefit plans.

Direct Costs and General and Administrative Expenses

Direct costs, which include expenses incurred by the Group for the generation of revenue from rendering of in-flight and other catering services, rental and administrative services, ground handling and aviation services, exploratory services and charter flights are expensed as incurred.

General and administrative expenses, which include the cost of administering the business and are not directly associated with the generation of revenue, are generally expensed as incurred.

Employee Benefits

Retirement Benefits Costs

Retirement benefits costs are actuarially determined using the projected unit credit method. This method considers each period of service as giving rise to an additional unit of benefit entitlement and measures each separately to build up the final obligation. Retirement benefit costs comprise the following:

- Service cost
- Net interest on the net defined benefit liability or asset
- Remeasurements of net defined benefit liability or asset

Service costs which include current service costs, past service costs and gains or losses on non-routine settlements are recognized as expense in the profit or loss. Past service costs are recognized when plan amendment or curtailment occurs. These amounts are calculated periodically by independent qualified actuaries.

Net interest on the net defined benefit liability or asset is the change during the period in the net defined benefit liability or asset that arises from the passage of time which is determined by applying the discount rate based on government bonds to the net defined benefit liability or asset. Net interest on the net defined benefit liability or asset is recognized as expense or income in the profit or loss.

Remeasurements comprising actuarial gains and losses, return on plan assets and any change in the effect of the asset ceiling (excluding net interest on defined benefit liability) are recognized immediately in other comprehensive income in the period in which they arise. Remeasurements are not reclassified to profit or loss in subsequent periods.

Plan assets are assets that are held by a long-term employee benefit fund or qualifying insurance policies. Plan assets are not available to the creditors of the Group, nor can they be paid directly to the Group. Fair value of plan assets is based on market price information. When no market price is available, the fair value of plan assets is estimated by discounting expected future cash flows using a discount rate that reflects both the risk associated with the plan assets and the maturity or expected disposal date of those assets (or, if they have no maturity, the expected period until the settlement of the related obligations).

The Group's right to be reimbursed of some or all of the expenditure required to settle a defined benefit obligation is recognized as a separate asset at fair value when and only when reimbursement is virtually certain.

The amount recognized as accrued retirement benefits payable or pension asset is the aggregate of the present value of the defined benefit obligation at the end of the reporting period reduced by the fair value of plan assets, if any, adjusted for any effect of limiting a net defined benefit asset to the asset ceiling. The asset ceiling is the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

Employee leave entitlement

Employee entitlements to annual leave are recognized as a liability when they are accrued to the employees. The undiscounted liability for leave expected to be settled wholly before twelve months after the end of the annual reporting period is recognized for services rendered by employees up to the end of the reporting period. For leave credits expected to be settled at the date of retirement or recognition, the liability is presented at its present value using assumptions consistent with those used to discount retirement benefits. The expense recognized comprise the service cost, net interest of the liability and remeasurements.

Termination benefit

Termination benefits are employee benefits provided in exchange for the termination of an employee's employment as a result of either an entity's decision to terminate an employee's employment before the normal retirement date or an employee's decision to accept an offer of benefits in exchange for the termination of employment.

A liability and expense for a termination benefit is recognized at the earlier of when the entity can no longer withdraw the offer of those benefits and when the entity recognizes related restructuring costs. Initial recognition and subsequent changes to termination benefits are measured in accordance with the nature of the employee benefit, as either post-employment benefits, short-term employee benefits, or other long-term employee benefits.

Borrowing Costs

Borrowing costs are capitalized if they are directly attributable to the acquisition, production or construction of a qualifying asset. A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use or sale. Capitalization of borrowing costs commences when the activities to prepare the asset are in progress and expenditures and borrowing costs are being incurred. Borrowing costs are capitalized until the assets are substantially ready for their intended use. Borrowing costs not qualified for capitalization are expensed as incurred.

Leases

The determination of whether an arrangement is, or contains a lease is based on the substance of the arrangement and requires an assessment of whether the fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset. A reassessment is made after inception of the lease only if one of the following applies:

- a. there is a change in contractual terms, other than a renewal or extension of the arrangement;
- b. a renewal option is exercised or extension granted, unless that term of the renewal or extension was initially included in the lease term;
- c. there is a change in the determination of whether fulfillment is dependent on a specified asset;
or
- d. there is a substantial change to the asset.

When a reassessment is made, lease accounting shall commence or cease from the date when the change in circumstances gave rise to the reassessment for scenarios (a), (c) or (d) above, and at the date of renewal or extension period for scenario (b).

Group as lessor

Leases where the Group does not transfer substantially all the risks and benefits of ownership of the assets are classified as operating leases. Initial direct costs incurred in negotiating operating leases are added to the carrying amount of the leased asset and recognized over the lease term on the same basis as the rental income. Contingent rents are recognized as revenue in the period in which they are earned.

Group as lessee

Leases where the lessor retains substantially all the risks and benefits of ownership of the asset are classified as operating leases. Operating leases are recognized as an expense in the profit or loss on a straight-line basis over the lease term. The cumulative excess of rent expense on a straight line basis over the related rent payment is presented as "Accrued rental payable" in the consolidated balance sheet.

Capital Stock and Additional Paid-in Capital

Capital stock is measured at par value for all shares issued and outstanding.

When the shares are sold at a premium, the difference between the proceeds and the par value is credited to the "Additional paid-in capital" account. When shares are issued for a consideration other than cash, the proceeds are measured by the fair value of the consideration received. In case the shares are issued to extinguish or settle the liability of the Company, the shares shall be measured either at the fair value of the shares issued or fair value of the liability settled, whichever is more reliably determinable.

Retained Earnings

Retained earnings consist of appropriated and unappropriated balances. Appropriated retained earnings are restricted for specific purposes and/or are not available for dividend declaration. Unappropriated retained earnings are not restricted and include the cumulative balance of net income or loss, any dividend distributions, prior period adjustments and effects of any change in accounting policy.

Treasury Shares

Own equity instruments, which are reacquired, are recognized at cost and deducted from equity. No gain or loss is recognized in the profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments. Any difference between the carrying amount and consideration, if reissued, is recognized in "Additional paid-in capital" account.

Income Taxes

Current income tax

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date. Current income tax for the current and prior period, shall, to the extent unpaid, be recognized as a liability and is presented as “Income tax payable” in the balance sheet. If the amount already paid, including the cumulative creditable withholding taxes, in respect of the current and prior period exceeds the amount due for those periods, the excess shall be recognized as an asset under “Other current assets” in the consolidated balance sheet.

Deferred income tax

Deferred income tax assets and deferred income tax liabilities are provided, using the balance sheet liability method, on all temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred income tax liabilities are recognized for all taxable temporary differences. Deferred income tax assets are recognized for all deductible temporary differences, carryforward benefits of excess minimum corporate income tax (MCIT) over the regular corporate income tax (RCIT) and unused net operating loss carryover (NOLCO), to the extent that it is probable that sufficient future taxable profits will be available against which the deductible temporary differences and the carryforward benefits of excess MCIT and unused NOLCO can be utilized. Deferred income tax however, is not recognized when it arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit.

Deferred income tax liabilities are not provided on nontaxable temporary differences associated with investments in domestic subsidiaries, associates and interest in joint ventures. With respect to investments in other subsidiaries, associates and interests in joint ventures, deferred income tax liabilities are recognized except where the timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient future taxable profits will be available to allow all or part of the deferred income tax assets to be utilized. Unrecognized deferred income tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that sufficient future taxable profits will allow the deferred income tax assets to be recovered.

Deferred income tax assets and deferred income tax liabilities are measured at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred income tax relating to items recognized directly in equity is recognized in equity and those directly in comprehensive income are recognized in the consolidated statement of comprehensive income and not in profit or loss.

Deferred income tax assets and deferred income tax liabilities are offset if a legally enforceable right exists to set off the deferred income tax assets against the deferred income tax liabilities and the deferred income taxes relate to the same taxable entity and the same taxation authority.

Provisions and Contingencies

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pretax rate that reflects current market assessment of the time value of money and where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provisions due to the passage of time is recognized as an interest expense.

Contingent liabilities are not recognized in the consolidated financial statements. These are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. A contingent asset is not recognized in the consolidated financial statements but disclosed when an inflow of economic benefits is probable.

Events After the Reporting Date

Post-year-end events that provide additional information about the Group's position at the reporting date (adjusting events), if any, are reflected in the consolidated financial statements. Post-year-end events that are not adjusting events are disclosed in the notes to consolidated financial statements when material.

Segment Information

The Group's operating businesses are organized and managed separately according to the nature of the aviation-support service provided by its four subsidiaries, water-related projects and mining-related activities. This is the basis on which the Group reports its primary segment information. The Group also monitors the revenue and operating results of its associates. Information with respect to these subsidiaries, as well as the Group's associates, are disclosed in Notes 4 and 9. The Group has only one geographic segment.

Earnings (Loss) Per Share

Basic earnings (loss) per share is computed by dividing net income (loss) for the year attributable to ordinary equity holders of the parent company by the weighted average number of shares outstanding during the year.

Diluted earnings (loss) per share is calculated by dividing the net income (loss) by the weighted average number of ordinary shares outstanding during the year plus the weighted average number of ordinary shares that would be issued upon conversion of all dilutive potential ordinary shares. The Company has no potentially dilutive shares as of December 31, 2014 and 2013.

Dividend Distributions

Dividends on common shares are recognized as a liability and deducted from retained earnings when approved by the shareholders of the Group. Dividends for the year that are approved after the balance sheet date are dealt with as an event after the reporting date.

3. Significant Judgments and Accounting Estimates

The preparation of the consolidated financial statements in accordance with PFRS requires the Group to exercise judgments, make estimates and use assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. The estimates and assumptions used in the consolidated financial statements are based upon management's

evaluation of relevant facts and circumstances as of the date of the financial statements. Future events may occur which will cause the assumptions used in arriving at the estimates to change. The effects of any change in estimates are reflected in the consolidated financial statements as they become reasonably determinable.

Judgments

In the process of applying the Group's accounting policies, management has made the following judgments, apart from those involving estimations, which have the most significant effect on amounts recognized in the consolidated financial statements.

Determination of the Company's functional currency

Judgment is exercised in assessing various factors in determining the functional currency of each entity within the Group. These include the prices of goods and services, competition, cost and expenses, and other factors including the currency in which financing is primarily undertaken. Additional factors are considered in determining the functional currency of a foreign operation, including whether its activities are carried as an extension of that of the Group rather than being carried out with significant autonomy.

The Company, based on the relevant economic substance of the underlying circumstances, has determined its functional currency to be Peso. It is the currency of the primary economic environment in which the Group operates. The functional currency of LTP, one of the Group's associated companies (see Notes 2 and 9), has been determined to be US\$.

Classification of financial instruments

The Group classifies a financial instrument, or its components, on initial recognition as a financial liability, a financial asset or an equity instrument in accordance with the substance of the contractual arrangement and the definition of a financial liability, a financial asset or an equity instrument. The substance of a financial instrument, rather than its legal form, governs its classification in the Group's consolidated balance sheets. The classification of the Group's financial instruments is disclosed in Note 30.

Impairment of AFS investments

For AFS debt investments, the Company assesses the counterparty's ability to comply with the contractual obligations to pay out principal and interest. Further, the Company assesses whether the market prices of these bonds indicate objective evidence of impairment. Based on management's assessment, there is no objective evidence of impairment on its investment in bonds, especially as the counterparties are able to pay the contractual payments. The carrying value of AFS debt investments amounted to ₱66.2 million and ₱106.6 million as of December 31, 2014 and 2013, respectively (see Note 13).

For AFS equity investments, management exercised judgment in assessing whether the quoted market price of the AFS equity investments at reporting date indicated an impairment vis-à-vis the cost. Management assesses that impairment is sustained once the decline in value reaches 20% of cost or that the decline in value persisted for more than 12 months. The Company believes that its outstanding investments in golf club and other proprietary and equity shares are not impaired. The carrying value of AFS equity investments amounted to ₱37.1 million and ₱30.2 million as of December 31, 2014 and 2013, respectively (see Note 13).

Accounting for acquisition of WBSI shares and water project

As discussed in Note 14 to the consolidated financial statements, on July 11, 2011, MAPDC acquired the 70% of the shares of stock of WBSI pursuant to a share purchase agreement between MAPDC and the former stockholders of WBSI. On the same date, MAPDC entered into a sale and purchase agreement for the Maragondon Bulk Water Supply Project (the Water Project) from

Islington Capital Holdings, Inc. (ICH). On September 15, 2011, MAPDC signed an amended sale purchase agreement with stockholders of WBSI and ICH, related to the acquisition of additional 12.6% shares over WBS and rights to the Water Project, respectively.

Prior to MAPDC's acquisition of WBSI shares, WBSI assigned and transferred its rights over the Water Project to ICH on September 15, 2010. Having regard to the substance of the agreements, the acquisition of WBSI shares is deemed to be linked to the acquisition of the Water Project from ICH and as such, the acquisition is treated as one transaction for accounting purposes. As of December 31, 2013, the sale and purchase agreement has not been consummated in view of certain water permits inherent in the Water Project that are yet to be secured. Accordingly, the investment in WBSI shares are still presented as part of "Project advances and investment" under the "Deposits and other noncurrent assets" account in the consolidated balance sheets.

In 2014, MAPDC entered into compromise agreement with the former stockholders of WBSI where a final consideration for the acquisition of the Water Project was agreed. This event confirmed the control of the MAPDC over WBSI. Accordingly, WBSI, as well as CBRI, which is WBSI's wholly owned subsidiary, was consolidated with the Group.

Classification of lease arrangements - the Group as Lessee and Lessor

The Group has property leases where it has determined that the risks and rewards related to such property are retained with the lessor (e.g., no transfer of ownership of leased assets by the end of the lease term). Both the lease and sub-lease agreements are accounted for as operating leases. Rental income amounted to ₱161.5 million in 2014, 2013 and 2012 (see Note 18d). Rental expense amounted to ₱195.2 million in 2014 and 2013 and ₱188.1 million in 2012 (see Notes 18 and 28).

Determination of indicators of impairment of nonfinancial assets

The Group assesses at each reporting date whether there is any indication that its investments in associates, property and equipment and investment property may be impaired. Also, the Group assesses whether facts and circumstances suggest that carrying amount of deferred mine exploration costs may exceed its recoverable amount.

The factors that the Group considers important which could trigger an impairment review included the following, among others:

- significant underperformance relative to expected historical or projected future operating results;
- significant changes in the manner of use of the acquired assets or the overall business strategy; and,
- significant negative industry or economic trends.

In 2013, an impairment test was made on the Group's investment in LTP primarily due to losses incurred by LTP (See Note 9). The recoverable amount has been determined based on a value-in-use calculation using cash flow projections based on financial budgets as approved by management covering a three-year projection. The projected cash flows was based on expectations of future outcomes taking into account past experience, adjusted for anticipated revenue growth based on management's future plans. Cash flows beyond the three year period are extrapolated into perpetuity assuming a zero growth rate, for impairment test purposes. The discount rate was a pre-tax measure based on the weighted average cost of capital of listed entities with similar assets or similar in terms of potential risk. The discount rate used in 2013 was 13%.

Based on management's evaluation as of December 31, 2013, the Company's investment in LTP is not impaired. Management believes that no reasonably possible change in these key assumptions would cause the carrying value of the cash generating unit to materially exceed its recoverable amount.

In 2014, LTP reported positive results from its operations. Management believes that LTP will continue to report positive results of operations in the next years based on the associate's operating budget. Accordingly, management believes that the 2013 indication of impairment is not anymore present.

Except for the Group's investment in LTP in 2013, management believes that there are no impairment indicators on its investment in associates, property and equipment, investment property, deferred project costs, service concessions, and deferred mine exploration cost as of December 31, 2014 and 2013.

Assessment whether SNVRDC is an operator under Philippine Interpretation IFRIC 12

Management has assessed that MAPDC's memorandum of agreement with the Municipality of Solano, NuevaVizcaya (Solano) to provide water distribution facilities is covered by the Philippine Interpretation IFRIC 12. MAPDC has assigned to SNVRDC the rights and obligations under the memorandum of agreement. The memorandum of agreement qualifies under the intangible asset model with respect to the operation of the waterwork facilities as SNVRDC has the right (license) to charge users of public service (see Note 15).

Contingencies

The Group, in its normal course of business, is involved in various legal cases and claims. Based on management's assessment, the Group will be able to defend its position on these cases and that the ultimate outcome will not have a significant impact on the group financial statements. Accordingly, no provision has been recognized for these contingencies.

Estimates and Assumptions

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised if the revision affects that period, or in the period of revision and future periods if the revision affects both current and future periods.

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date that have a significant risk of causing material adjustment to the carrying amounts of the Group's assets and liabilities follow.

Determination of fair value of financial instruments

When the fair values of financial assets and financial liabilities recorded in the consolidated balance sheet cannot be measured based on quoted prices in active markets, their fair values is measured using valuation techniques including the discounted cash flow model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. Judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these assumptions about these factors could affect the reported fair value of financial instruments. See Note 31 for further disclosures.

Determination of fair value of investment property

The Group's fair value of investment property is valued by reference to market-based evidence, using comparable prices adjusted for specific market factors such as nature, location and condition of the property. As of December 31, 2014 and 2013, the fair value of the investment property is based on valuation performed by an accredited independent value (see Note 12).

Estimation of allowance for doubtful accounts

Allowance for doubtful accounts is provided for accounts that are specifically identified to be doubtful of collection. The level of allowance is evaluated by management on the basis of factors that affect the collectability of the accounts, such as historical performance of counterparties, among others.

In addition to specific allowance against individually significant receivables primarily from airline customers, the Group also assesses, at least on an annual basis, a collective impairment allowance against credit exposures which, although not specifically identified as requiring a specific allowance, have a greater risk of default than when the receivables were originally granted to customers. This collective allowance is based on various factors such as historical performance of the counterparties within the collective group, deterioration in the markets in which the customers operate, various country or area risks, overall performance of the airline industry, and technological obsolescence which affects the confidence of the air transport market, as well as identified structural weaknesses or deterioration in the cash flows of counterparties.

The carrying value of the Group's receivables amounted to ₱408.8 million and ₱367.8 million as of December 31, 2014 and 2013, respectively. Allowance for doubtful accounts amounted to ₱13.1 million and ₱11.6 million as of December 31, 2014 and 2013, respectively (see Note 6).

The carrying value of the Group's project advances and investments related to advances made to ICH and its stockholders amounted to ₱15.6 million as of December 31, 2013 (see Note 14).

Determination of NRV of inventories

The Group estimates the NRV of inventories based on the most reliable evidence available at the time the estimates are made. These estimates consider the fluctuations of prices or costs directly relating to events occurring after the reporting date to the extent that such events affect the value of inventories. Other factors include the age and status of the inventories and the Group's experience on write-off and expirations.

The carrying value of inventories amounted to ₱44.1 million and ₱47.0 million, net of allowance for probable losses of ₱1.0 million as of December 31, 2014 and 2013, respectively (see Note 7).

Estimating allowances for probable losses on input taxes and tax credit certificates (TCC)

The Group estimates the level of provision for probable losses on input taxes and TCC based on the experience of the Group and assessment of counsels assisting the Group in processing the claims and negotiating the realization of TCC. As of December 31, 2014 and 2013, the carrying value of input taxes and TCC amounted to ₱203.0 million and ₱200.7 million, respectively. Allowance for probable losses amounted to ₱72.3 million and ₱66.6 million, respectively (see Notes 8 and 14).

Estimation of useful lives of property and equipment and number of flying hours of helicopter unit

The Group estimates the useful lives of property and equipment and number of flying hours of helicopter unit based on the internal technical evaluation and experience with similar assets. Estimated useful lives and number of flying hours are reviewed periodically and updated if expectations differ from previous estimates due to physical wear and tear, technical and commercial obsolescence and other limits on the use of the assets. There is no change in the estimated useful lives of property and equipment and number of flying hours in 2014 and 2013.

The carrying value of property and equipment as of December 31, 2014 and 2013 amounted to ₱395.3 million and ₱379.2 million, respectively (see Note 11).

Estimation of retirement benefits costs and obligation

The cost of defined benefit pension plans, as well as the present value of the pension obligation is, determined using actuarial valuations. The actuarial valuation involves making various assumptions. These include the determination of the discount rates and future salary increases. Due to the complexity of the valuation, the underlying assumptions and its long-term nature, defined benefit obligations are highly sensitive to changes in these assumptions. All significant assumptions are reviewed at each reporting date.

In determining the appropriate discount rate, management considers the interest rates of government bonds, adjusted to zero coupon rates, with term consistent with the obligation of the plan.

Accrued retirement benefits payable amounted to ₱15.3 million and ₱19.3 million as of December 31, 2014 and 2013, respectively (see Note 21). Pension asset amounted to ₱0.1 million and ₱0.5 million as of December 31, 2014 and 2013, respectively, and is included under "Deposit and other noncurrent assets" account (see Note 14). Retirement benefits cost amounted to ₱16.4 million, ₱25.2 million and ₱17.3 million in 2014, 2013 and 2012, respectively (see Note 21).

Recognition of deferred income tax assets

The Group reviews the carrying amounts of deferred income tax assets (gross of deferred income tax liabilities) at each reporting date and adjusts the balance of deferred income tax assets to the extent that it is no longer probable that sufficient future taxable profits will be available to allow all or part of the deferred income tax assets to be utilized. The determination of future taxable income, which will establish the amount of deferred income tax assets that can be recognized, requires the estimation and use of assumptions about the Group's future income and timing of reversal of temporary differences, unused NOLCO and excess MCIT.

Gross deferred income tax assets recognized, which relate primarily to operating subsidiaries, amounted to ₱31.0 million and ₱29.3 million as of December 31, 2014 and 2013, respectively. The Group also has unrecognized deferred income taxes primarily on the Company's and non-operating subsidiaries' temporary differences, NOLCO and MCIT (see Note 25).

Impairment of goodwill

The Group determines whether goodwill is impaired at least on an annual basis. This requires the estimation of value-in-use of the cash generating unit to which goodwill relates. Estimating the value-in-use requires management to make an estimate of the expected future cash flows from the CGU and also to choose a suitable discount rate in order to calculate the present value of those cash flows. For the purpose of impairment testing, goodwill has been allocated to MACS, the cash generating unit. The recoverable amount of the cash-generating unit has been determined based on a value in use calculation using cash flow projections based on financial budgets as approved by management covering a three-year projection. The projected cash flows was based on expectations of future outcomes taking into account past experience, adjusted for anticipated revenue growth based on management's future plans. Cash flows beyond the three year period are extrapolated into perpetuity assuming a zero growth rate, for impairment test purposes. The discount rate was a pre-tax measure based on the weighted average cost of capital of listed entities with similar assets or similar in terms of potential risk. The discount rate used in 2014 and 2013 is 9% , while for 2012 is 8%.

Management believes that no reasonably possible change in any of the above assumptions would cause the carrying value of the goodwill to exceed its recoverable amount.

Based on management's assessment, the recoverable amount of the goodwill is higher than the carrying value, thus no impairment loss was noted on the goodwill with carrying amount of ₱17.5 million as of December 31, 2014 and 2013 (see Note 14).

Estimation of provisions for probable loss

The Group is a party to certain claims arising from the normal course of business. The estimate of probable costs of possible claims has been developed in consultation with the Company's legal counsel and is based upon an analysis of potential results. In 2014 and 2013, the Group recognized provision for contingencies in the normal course of business amounting to ₱3.8 million and ₱4.7 million, respectively. Outstanding amounts of provision amounted to ₱3.8 million and ₱4.7 million as of December 31, 2014 and 2013, respectively (see Note 17). The information usually required by PAS 37, *Provisions, Contingent Liabilities and Contingent Assets*, is not disclosed as it may prejudice the Company's negotiation with the third party.

4. Segment Information

The Group's operating businesses are organized and managed separately according to the nature of the aviation-support services provided by the four subsidiaries, mining-related activities and water-related projects, which is the basis on which the Group reports its primary segment information. The Group also monitors its share in the results of operations of its associates (LTP and CPCS) that are accounted for using the equity method.

The operations of Group's segments are described as follows:

- In-flight and other catering segment, which is operated by MACS, refers to servicing of meal requirements of certain foreign and domestic passenger airlines at the NAIA and the MDA and of certain non-airline institutional accounts.
- Ground handling and aviation segment, which is operated by MASCORP, refers to both ramp and passenger handling and aviation services to foreign airlines and domestic carriers at NAIA, MCIA and KIA.
- Charter flights segment, which is handled by MAATS, provides international and domestic chartered flights from its base at the General Aviation Area, MDA to any point within the Philippines, through alliances with other helicopter owners.
- Rental and administrative segment, which is primarily operated through MAPDC, pertains to the sub-lease of the MacroAsia Ecozone at NAIA (see Note 28), which MAPDC leases from Manila International Airport Authority (MIAA) with LTP as the anchor locator (see Note 18d).
- Mining segment, which pertains to mining-related activities of the Group, refers to expenditures for exploration activities and rendering of exploration-related services.
- Water-related projects, which pertain to development (e.g., studies, surveys) and construction of water-treatment facilities activities, which are undertaken by MAPDC and its subsidiaries.
- Associates - this segment represents the Group's investments in associates that are accounted for using the equity method. Information with respect to these associates are disclosed in Note 9.

The Group has only one geographic segment. There were no inter-segment sales in 2014, 2013 and 2012. In 2014, 2013 and 2012, ₱245 million (or 15%), ₱236.6 million (or 15%) and ₱288.6 million (or 18%), respectively of the Group's total revenue was derived from two customers. For this purpose, the customers pertain to an entity known to the Group to be under common control.

Segment assets include the operating assets used by a segment and consist principally of cash and cash equivalents, receivables, inventories, other current assets and property and equipment, net of allowances, depreciation and any impairment in value. Segment liabilities include all operating liabilities for and consist principally of notes payable, accounts payable and accrued liabilities. Segment assets and liabilities do not include deferred income taxes. Segment results pertain to operating income.

Financial information on the Group's business segments as of and for the years ended December 31 are presented below. The amounts disclosed were determined consistent with the measurement basis under PFRS.

	2014	2013	2012

5. Cash and Cash Equivalents

	2014	2013
Cash on hand and cash in banks (Note 18a)	₱150,018,490	₱234,730,895
Short-term deposits (Note 18a)	531,219,043	632,650,034
	₱681,237,533	₱867,380,929

Cash in banks earn interest at the respective bank deposits rates. Short-term deposits are made for varying periods of up to three months and earn interest at the respective short-term deposit rates. Interest income earned amounted to ₱7.6 million, ₱11.0 million and ₱13.5 million in 2014, 2013 and 2012, respectively (see Note 22).

6. Receivables

	2014	2013
Trade:		
Third parties	₱322,995,497	₱227,260,789
Related parties (Notes 18f, 18g, 18h and 18i)	49,711,414	75,190,541
Due from:		
Related parties (Notes 18e and 18n)	–	38,761,938
Officers and employees	16,907,870	12,344,665
Suppliers, contractors and others	16,574,378	5,096,300
Interest receivable	2,573,415	2,709,385
Other receivables	13,071,974	18,022,902
	421,834,548	379,386,520
Less allowance for doubtful accounts	13,083,870	11,583,870
	₱408,750,678	₱367,802,650

Trade receivables arise from the revenue-generating activities of the Group. These are non-interest bearing with normal credit terms ranging from 30 to 60 days.

Due from suppliers, contractors and others pertain to down payments for various purchases or operating expenses of the Group.

Other receivables pertain to amounts due from certain airline clients for the processing of client's landing in aviation areas in the NAIA.

A reconciliation of the allowance for doubtful accounts for trade receivables (all arising from specific impairment) by class is as follows:

	MACS	MAATS	MASCORP	Total
December 31, 2011	₱9,247,720	₱1,257,621	₱-	₱10,505,341
Reversal of allowance (Note 22)	(2,600,000)	-	-	(2,600,000)
December 31, 2012	6,647,720	1,257,621	-	7,905,341
Provision (Note 20)	2,400,000	-	1,278,529	3,678,529
December 31, 2013	9,047,720	1,257,621	1,278,529	11,583,870
Provisions (Note 20)	1,500,000	-	-	1,500,000
December 31, 2014	₱10,547,720	₱1,257,621	₱1,278,529	₱13,083,870

7. Inventories

	2014	2013
At net realizable value:		
Food and beverage - net of allowance for probable losses of ₱1.0 million in 2014 and 2013	₱38,409,554	₱24,080,540
At cost - materials and supplies	5,656,030	22,961,138
	₱44,065,584	₱47,041,678

8. Other Current Assets

	2014	2013
Restricted short-term investment	₱11,329,160	₱-
Input taxes	54,718,114	36,159,364
Tax credit certificates	30,737,274	30,737,274
Prepaid expenses	12,848,403	11,898,779
Creditable withholding and prepaid taxes	12,649,227	11,543,095
Other current assets	8,175,846	1,093,736
	130,458,024	91,432,248
Less allowance for probable losses	29,205,949	29,205,949
	₱101,252,075	₱62,226,299

Restricted short-term investment pertains to a time deposit placed by the Company to guaranty an institutional catering contract.

Input taxes represent VAT paid on purchases of goods and services that can be recovered as tax refund/credit from the Bureau of Internal Revenue (BIR) or the Bureau of Customs. The tax credit

certificate can be used to pay any income tax due. The Group also has input taxes arising from acquisition of property and equipment and other assets and those which are not expected to be utilized in the next 12 months. Provision for losses on input taxes amounted to ₱31.3 million, ₱3.9 million and ₱25.2 million in 2014, 2013 and 2012, respectively (see Note 20).

Details of input taxes follow:

	2014	2013
Gross input tax	₱226,526,961	₱218,211,862
Less allowance for probable losses	72,303,644	66,618,256
	154,223,317	151,593,606
Less: noncurrent portion	128,711,152	144,640,191
	₱25,512,165	₱6,953,415

In 2014, the Group wrote off input taxes amounting to ₱43.1 million which is fully provided with allowance and ₱25.4 million as direct write-off.

Prepaid expenses and others mostly consist of prepaid insurance, rent, utilities, and unconsumed supplies.

9. Investments in Associates

	Percentage of ownership interest	2014	2013
Acquisition costs:			
LTP	49	₱935,759,560	₱935,759,560

Beginning of year		(148,846,095)	119,022,386
Share in net income (loss) for the year		128,226,824	(251,868,481)
Dividends declared to the Company		(18,000,000)	(16,000,000)
End of year		(38,619,271)	(148,846,095)
Share in re-measurement losses on defined benefit plan of associates:			
Beginning of year		(155,662,465)	(112,696,242)
Remeasurement gains (losses) on defined benefit plan for the year		85,032,893	(42,966,223)
End of year		(70,629,572)	(155,662,465)
Share in foreign currency translation adjustments:			
Beginning of year		(176,800,404)	(220,265,655)
Net foreign currency translation adjustments for the year		4,688,978	43,465,251
End of year		(172,111,426)	(176,800,404)
		₱661,709,466	₱461,760,771

* Effective ownership interest through MACS

As of December 31, 2014 and 2013, the shares of stock of the associated companies are not traded in public and as such, have no publicly traded price quotation.

LTP

On July 12, 2000, the Company entered into an agreement with Lufthansa Technik AG, a corporation organized and existing under the laws of the Federal Republic of Germany, and formed LTP. LTP provides maintenance, repairs and overhaul services on aircraft and components at the NAIA, MCIA, Diosdado Macapagal International Airport and Davao International Airport. The agreement provides for supermajority (i.e., two-thirds) vote of directors for the approval of the annual budget as well as other critical corporate acts of the agreement. The registered office address of LTP is LTP Technical Center, MacroAsia Ecozone, Villamor Airbase, Pasay City.

CPCS

CPCS is the Company's first in-flight catering venture, which started commercial operations in 1996. It is the only in-flight catering company at Mactan-Cebu International Airport and serves both domestic and international airlines. The registered office address of the CPCS is 1st Ave. Extension, Block B6, MEZ I, Lapu-lapu City.

MacroAsia WLL

On June 5, 2012, MACS entered into a Shareholders' Agreement with individuals to establish MacroAsia WLL, a national institutional catering and laundry company in Doha, Qatar. As of December 31, 2014, MacroAsia WLL has not yet started its commercial operations.

Summarized financial information of the associates as of and for the years ended December 31 is as follows:

	2014	
	LTP	CPCS
Current assets	₱2,864,678,992	₱51,800,017
Noncurrent assets	2,593,870,592	6,315,059

Group's share in total comprehensive income (loss)	(₱306,660,745)	₱13,889,702

The Group has interest in an immaterial associate that are accounted for using the equity method. The financial information of this associate follows:

	2014	2013
Carrying amount of immaterial associate	₱246,515	₱246,515
Amount of the Group's share in net loss	–	(2,063,661)

The associates have no contingent liabilities or capital commitments as of December 31, 2014 and 2013.

10. Material Partly-owned Subsidiary

Set out below are the summarized financial information of MACS that has non-controlling interest that is material to the Group. The amounts disclosed are based on those included in the consolidated financial statements before intercompany eliminations.

Summarized balance sheets:

	2014	2013
Current assets	₱371,186,010	₱343,724,523
Noncurrent assets	260,972,721	288,194,542
Current liabilities	276,135,377	312,035,756
Noncurrent liabilities	9,589,423	11,289,041
Equity	346,433,931	308,594,268
Attributable to non-controlling interest	69,286,786	61,718,854

Summarized statements of income:

	2014	2013
Revenue	₱1,046,764,899	₱991,985,449
Direct costs	734,878,490	690,583,891
Operating expenses	290,243,399	248,436,428
Net income	34,755,620	46,121,667
Attributable to non-controlling interest	6,951,124	9,224,333

Summarized statements of comprehensive income:

	2014	2013
Net income	₱34,755,620	₱46,121,667
Other comprehensive income	3,084,043	(3,031,218)
Total comprehensive income	37,839,663	43,090,449
Attributable to non-controlling interest	7,567,933	8,618,090

Summarized statements of cash flows:

	2014	2013
Cash flows from operations	₱30,913,672	₱101,443,301
Cash flows used in investing activities	(21,191,942)	(30,678,146)
Cash flows used in financing activities	(20,000,000)	(52,450,821)
Dividends paid to non-controlling interest	-	8,000,000

As of December 31, 2014 and 2013, the equity attributable to non-controlling interest in PWBRI amounted to ₱428,733 and ₱449,070, respectively. Total comprehensive loss attributed to PWBRI amounted to ₱20,338 and ₱19,805 in 2014 and 2013, respectively.

11. Property and Equipment

Net Book Value	₱359,678,551	₱19,880,666	(₱337,140)	₱-	₱379,222,077

Acquisitions of property and equipment on credit amounting to ₱1.4 million and ₱2.0 million in 2014 and 2013, respectively, are included as part of "Accounts payable and accrued liabilities" account as of December 31, 2014 and 2013, respectively. These are treated as noncash investing activities in the consolidated statements of cash flows. The outstanding amount in 2013 was paid in 2014.

Depreciation and amortization is distributed as follows:

	2014	2013	2012
Direct costs (Note 19)	₱72,752,447	₱68,126,740	₱52,628,948
General and administrative expenses (Note 20)	28,881,453	26,328,539	28,591,182
	₱101,633,900	₱94,455,279	₱81,220,130

The helicopter unit was depreciated based on 139,176, and 246 flying hours in 2014, 2013 and 2012, respectively.

The costs of fully depreciated property and equipment which are still in use amounted to ₱705.2 million and ₱454.4 million as of December 31, 2014 and 2013, respectively.

12. Investment Property

The Group's investment property pertains to a parcel of land held for future development which amounted to ₱143.8 million as of December 31, 2014 and 2013. In 2013, the Group recognized full recovery of impairment losses on investment property (see Note 22). As of December 31, 2014, the fair value of the investment property amounted to ₱258.0 million which is based on the appraisal report rendered by a recognized professional firm of appraisers (see Note 31).

The independent appraiser used the "Market Data Approach" in valuing the property. This approach considers the sales and listings and other market data of comparable properties registered within the vicinity of the property being valued. Factors such as location, size, shape of lot, highest and best use and time element were also taken into consideration in order to estimate the fair value of the property.

Operating expense incurred in relation to investment property pertains to real property taxes which amounted to ₱0.2 million in each of the three years in the period ended December 31, 2014 (see Note 20).

There are neither restrictions on the realizability of investment property nor contractual obligations to develop such property or for maintenance.

13. AFS Investments

	2014	2013
Debt:		
Philippine government treasury bonds	₱66,197,600	₱66,871,704
Corporate bonds	-	39,743,367
Equity - Golf club share and other proprietary and equity shares	37,138,300	30,176,800
	₱103,335,900	₱136,791,871

The changes in fair values of AFS investments are presented in other comprehensive income and the cumulative changes in fair value are presented as "AFS investments reserve" account in equity section of the consolidated balance sheets.

The movement of AFS investments reserve follows:

	2014	2013
Beginning balance	₱2,688,890	₱29,854,120
Fair value changes of AFS investments sold and recycled through profit or loss*	767,819	(14,067,293)
Changes in fair value of AFS investments, net of tax effect amounting to (₱700,000) in 2014 and ₱1,050,000 in 2013	5,625,890	(13,097,937)
Ending balance	₱9,082,599	₱2,688,890

*Included under "Gain on sale of investments in bonds" account (see Note 22).

Deferred income tax liabilities on the fair value changes of the AFS equity investments amounted to ₱1.1 million and ₱0.4 million as of December 31, 2014 and 2013, respectively (see Note 25).

- a. The Company had investments in Philippine government treasury bonds which carry interest rate of 3.25% to 6% in 2014 and 2013 and 6.12% to 8% in 2012.

In 2013, the Company disposed certain of its outstanding investments in Philippine government treasury bonds amounting to ₱109.4 million, realizing a total gain of ₱41.2 million (see Note 22). Total proceeds from the sale amounted to ₱244.8 million.

As of December 31, 2014 and 2013, outstanding investment in Philippine government treasury bonds amounted to ₱66.2 million and ₱66.9 million, respectively.

Total interest earned from these government bonds (including the amortization of premium) amounted to ₱2.3 million, ₱1.1 million and ₱3.2 million in 2014, 2013 and 2012 respectively (see Note 22).

- b. In prior years, the Company had investments in various corporate bonds. In 2013, the Company disposed certain investments in corporate bonds for a total gain of ₱8.6 million (see Note 22). Total proceeds from the sale amounted to ₱176.3 million.

As of December 31, 2013, investment in corporate bonds amounted to ₱39.7 million.

In 2014, the Company disposed all of its outstanding investments in corporate bonds amounting to ₱39.7 million, realizing a total gain of ₱0.8 million (see Note 22). Total proceeds from the sale amounted to ₱41.5 million.

Total interest income earned from these corporate bonds (including the amortization of premium) amounted to ₱2.3 million, ₱7.1 million and ₱2.5 million in 2014, 2013, and 2012 respectively (see Note 22).

- c. The Group's investments in golf club share and other proprietary and equity shares are carried at fair value based on published club share quotes that are publicly available from the local dailies and from the website of club share brokers.

In 2012, the Group determined that one of its investments in club shares is impaired because of the prolonged decline in fair value below its cost. As such, the Group recognized impairment loss on this club share for ₱0.4 million in 2012 (see Note 22).

14. Deposits and Other Noncurrent Assets

	2014	2013
Deferred project costs	₱63,473,737	₱–
Deposits (Note 28)	19,639,957	19,384,751
Tax credit certificates	18,080,753	18,080,753
Goodwill	17,531,232	17,531,232
Prepaid rent (Note 28)	8,051,823	8,455,038
Pension asset (Note 21)	82,796	514,366
Project advances and investment	–	18,876,088
Others	451,685	234,132
	₱127,311,983	₱83,076,360

Deferred project costs

As of December 31, 2014, “Deferred project costs” include:

Maragondon Bulk Water project costs	₱34,067,350
Engineering design, consultancy, development and geodetic surveys costs,	29,406,387
	₱63,473,737

a. Maragondon Bulk Water project costs

On July 11, 2011, the Group acquired 70% of WBSI outstanding shares amounting to ₱3.3 million pursuant to a share purchase agreement between the Company and the stockholders of WBSI. On the same date, the Group entered into a sale and purchase agreement for the acquisition of the Maragondon Bulk Water Supply Project (the Water Project) from ICH. Prior to the Group’s acquisition of WBSI shares, WBSI assigned and transferred its rights over the Water Project to ICH. On September 15, 2011, the Group signed amended sale agreements, respectively with shareholders of WBSI and ICH, related to the acquisition of additional 12.6% shares in WBSI and the corresponding rights to the Maragondon Bulk Water Supply Project. Total payments made to WBSI former stockholders for the water rights as of December 31, 2013 amounted to ₱15.8 million.

Having regard to the substance of the agreements, the acquisition of WBSI shares is deemed to be linked to the acquisition of the water project from ICH and as such, the acquisition is treated as one transaction for accounting purposes. As of December 31, 2013, the acquisition of the Water Project has not yet been consummated in view of certain water permits inherent in the project that are yet to be secured. As such, the Group accounted for its investment in WBSI shares and payments made to WBSI former stockholders totaling to ₱19.1 million as “Project advances and investment” in view of the Group’s right to refund from WBSI stockholders the total payments made if the water permits inherent in the project are not secured.

In 2014, the Group entered into a compromise agreement with the former stockholders of WBSI where a final consideration for the Water Project was agreed. The reduced consideration is due to the unsecured permits which are still unavailable as of date of the compromise agreement. The compromise agreement confirmed the Group’s control over WBSI. Accordingly, the Group accounted for WBSI as its subsidiary (see Note 3). Further,

as a result of the compromise agreement, the Group paid additional ₱18.3 million to WBSI former stockholders. As of December 31, 2014, total payments pertaining to the Water Project amounted to ₱34.1 million, which is included as part of the “Deferred project costs” account in the 2014 balance sheet.

b. Others

In relation to the Group’s water-related projects, the Group incurs expenditures related to the technical feasibility studies which include engineering designs, consultancy fees, geodetic surveys and other project costs. As of December 31, 2014, these costs amounted to ₱29.4 million and are included as part of the “Deferred project costs” account in the 2014 balance sheet.

Goodwill

The goodwill recognized by the Group amounting to ₱17.5 million as of December 31, 2014 and 2013 resulted from the Company’s acquisition of a non-controlling interest (13%) from a previous stockholder of MACS in 2006. The carrying amount of goodwill is allocated to MACS, the cash-generating unit.

15. Service Concession Right

As of December 31, 2014, the cost of service concession right amounted to ₱99.7 million. The amount pertains to incurred construction costs in relation to the construction of water treatment plant and pipe laying activities. The amortization of the service concession right has not started as the SNVRDC has not yet started its commercial operations. SNVRDC is the operating entity of the waterworks system in connection with MAPDC’s agreement with the Municipality Government of Solano, Nueva Vizcaya (Solano) (see Note 28e).

Pursuant to Philippine Interpretation IFRIC 12, the Group recognizes intangible assets in accordance with the accounting policies stated in Note 2. Service concession right mainly consist of costs incurred for the construction of the waterwork facility.

Advances to contractors pertain to SNVRDC’s advance payments for its two major contractors as required by the construction agreements. The payments serve as the mobilization fee of the major contractors and are diminished by the contractors through progress billings (see Note 28e).

16. Notes Payable

- a. On December 23, 2013, MASCORP obtained a three-year term loan amounting to ₱27.0 million for general corporate purposes and to finance its liabilities. The loan carried an interest of 5.5% per annum subject to monthly re-pricing.

As of December 31, 2014, current and noncurrent portion of the loan both amounted to ₱9.0 million. Interest expense amounted to ₱1.3 million in 2014 (nil in 2013).

- b. On February 25, 2014, MASCORP obtained five-year term loans from China Banking Corporation (CBC) amounting to ₱37.0 million and US\$0.99 million to support working capital requirement and to finance its liabilities. The loans will be payable in 60 equal and successive monthly amortization commencing at the end of the 1st month from initial drawn date of the loan. The Peso and US\$ loans carry an interest of 5.25% and 4.06% per annum, respectively.

As of December 31, 2014, current and noncurrent portion of the loans amounted to ₱16.3 million and ₱51.5 million, respectively. Interest expense amounted to ₱2.8 million in 2014.

- c. In 2012, MASCORP and MACS incurred interest expense amounting to ₱0.7 million and ₱1.1 million, respectively, from loans availed in 2011 which were settled in 2012.

17. Accounts Payable and Accrued Liabilities

	2014	2013
Accounts payable:		
Trade	₱74,423,567	₱95,805,620
Non-trade	30,758,456	53,626,727
Related parties

Non-trade (Note 18e)	-	2,531,250
Accrued:		
Utilities and others	81,144,816	70,850,086
Payable to contractors	10,599,124	-
Service fee (Note 28c)	8,762,122	6,670,348
Volume discounts	-	8,120,447
Payable to government agencies	25,854,585	22,928,554
	₱259,546,612	₱270,123,735

Trade payables are incurred in the conduct of the Group's business with normal credit terms ranging from 30 to 45 days. Nontrade payables include concession privilege fee payable and payable to mine surveyor and subcontractor.

Accrued expenses include the provision for probable loss which represents management's best estimate of probable cost of claims arising from the normal course of business that has been developed in consultation with the Company's legal counsel and is based upon an analysis of potential results.

Accrued volume discounts are incentives due to airline clients of MACS. Accrued service fee pertains to the 20% of the service fee declared by MACS, which is payable to SATS (see Note 28c).

Payable to government agencies include deferred output VAT and other tax-related payable such as withholding tax and payable to Social Security System, Philippine Health Insurance Corporation and Pag-IBIG Fund Contributions. Deferred output VAT pertains to output VAT of uncollected receivables from the rendering of the Group's services.

18. Related Party Transactions

Parties are considered to be related if one party has the ability to control, directly or indirectly, the other party or exercise significant influence over the other party in making financial and operating decisions. It includes companies in which one or more of the directors and/or shareholder of the Company either has a beneficial controlling interest or are in a position to exercise significant influence therein. Transactions between the Company and its subsidiaries and the related balances are eliminated at consolidation and are no longer included in the disclosures.

The following tables summarize the transactions with the Group's related parties and their account balances:

<i>(Amounts in millions)</i> Nature of Transaction	Outstanding balance/ Amount of transactions		Terms and conditions
	2014	2013	
Affiliates:			
Deposits and cash equivalents (Note 18a)	₱159.2	₱148.3	On demand; prevailing interest rate
Interest income on deposits and cash equivalents (Note 18a)	3.0	4.0	On demand; prevailing interest rate
Rental deposit (Note 18b)	0.1	0.1	To be refunded at the end of lease term
Trust fund retirement plan (Note 18c)	85.6	69.8	Based on trustee agreement

<i>(Amounts in millions)</i> Nature of Transaction	Amount of Transactions			Outstanding Balance				Terms And Conditions

(b) 25 years, non-interest bearing, includes impact of straight-line recognition of lease income

(c) On-demand, unsecured, non-interest bearing

Outstanding balances at year-end are to be settled in cash. There have been no guarantees provided or received for any related party receivables or payables. In 2014 and 2013, the Group recognized provision for doubtful accounts pertaining to amounts owed by a related party amounting to ₱6.2 million and ₱1.3 million, respectively (nil in 2012).

Group

- a. The Group has outstanding Peso and US dollar-denominated short-term investments as well as current and savings deposits, which bear interest based on prevailing market rates with an affiliated local bank under common control. Total deposits and cash equivalents amounted to ₱159.2 million and ₱148.3 million as of December 31, 2014 and 2013, respectively. Interest income amounted to ₱3.0 million, ₱4.0 million and ₱2.4 million in 2014, 2013 and 2012, respectively.
- b. MAC leases from the local affiliated bank the office space it currently occupies. The lease agreement is for a period of two years up to October 2011, with an annual rental rate that is subject to review every year. Total rent expense amounted to ₱2.5 million in 2014, 2013 and 2012. The contract of lease was renewed for a period of two years starting October 16, 2011 and unless earlier terminated, shall expire on October 15, 2013. The lease agreement has not been renewed but MAC continues to lease the office space under the last term and condition.

On the other hand, MMC also entered into a two-year lease contract with the local affiliated bank for its office space starting on November 1, 2011. The monthly rental fee is subject to a fixed price escalation rate of 5% starting on November 1, 2012. MMC has rental deposit amounting to ₱147,610 equivalent to three months advanced rental and is refundable and non-interest bearing. The discounting effect is not significant to the Group. The parties thereafter amended the contract of lease postponing the commencement of the lease term to January 1, 2012 and shortening the lease period to 22 months. The lease agreement has not been renewed but MMC continues to lease the office space. Total rent expense in 2013 and 2012 amounted to ₱0.6 million.

- c. The Group has a trust fund for its retirement plan with the local affiliated bank. As of December 31, 2014 and 2013, the fund assets amounted to ₱85.6 million and ₱69.8 million, respectively (see Note 21).

MAPDC

- d. MAPDC has a contract with LTP covering the sub-lease of a parcel of land located within NAIA. The contract, which commenced on September 1, 2000, is for a period of 25 years and renewable for another 25 years thereafter, subject to mutual agreement of the parties. The rental charge, which is at normal market rate, is subject to a fixed price escalation and deposit. Monthly fee due from LTP is equivalent to MAPDC's cost of leasing the land from MIAA, plus administrative fees (see Note 28). Rental and administrative income amounted to ₱188.9 million in 2014 and ₱187.9 million in 2013 and 2012.

MAPDC received refundable rental deposit from LTP amounting to ₱24.6 million (presented as "Rental deposit" account in the consolidated balance sheets), which is valued and reported at its accreted value of ₱5.3 million and ₱4.6 million as of December 31, 2014 and 2013, respectively. Accretion of interest (included as part of "Financing charges" account) amounted to ₱0.7 million, ₱0.6 million and ₱0.5 million in 2014, 2013 and 2012 (see Note 22b). The difference between the face amount and present value of the deposits at inception date of ₱19.1 million is treated and presented as "Unearned rent income" in the consolidated balance sheets. This is being amortized on a straight-line basis over the term of the lease. The related amortization amounted to ₱1.0 million in 2014, 2013 and 2012. As of December 31, 2014 and 2013, the unearned rent income amounted to ₱10.3 million and ₱11.2 million, respectively.

Further, as a result of the straight-line recognition of operating lease income, accrued rental receivable was recognized which amounted to ₱118.0 million and ₱117.6 million as of December 31, 2014 and 2013, respectively.

- e. MAPDC has an outstanding short-term, unsecured and non-interest bearing advances to WBSI amounting to ₱32.9 million as of December 31, 2013 (see Note 6). On the other hand, MAPDC has an outstanding short-term non-interest bearing advances from Cavite Business Resources, Inc. (CBRI) as of December 31, 2013 amounting to ₱2.5 million (see Note 17). In 2014, since WBSI and CBRI became subsidiaries of the Company, outstanding balances were eliminated.

MASCORP

- f. MASCORP provides ground handling services to Air Philippines, Inc. (Air Phil.), an affiliated company under common control. Fees for these services amounted to ₱88.2 million, ₱105.8 million and ₱117.5 million in 2014, 2013 and 2012, respectively. The related receivables as of December 31, 2014 and 2013 amounted to ₱18.6 million and ₱25.6 million, respectively (see Note 6).
- g. MASCORP provides ground handling services to Philippine Airlines, Inc. (PAL), an affiliated company under common control. Fees for these service amounted to ₱156.8 million, ₱130.8 million and ₱111.2 million in 2014, 2013 and 2012, respectively. The related receivables as of December 31, 2014 and 2013 amounted to ₱29.1 million and ₱47.6 million, respectively, and are presented under “Receivables” in the consolidated balance sheets (see Note 6).
- h. MASCORP bills LTP for ground handling services it rendered on behalf of LTP’s clients. Fees for these services amounted to ₱0.3 million, ₱3.0 million and ₱21.8 million in 2014, 2013 and 2012, respectively. The related receivables as of December 31, 2014 and 2013 amounted to ₱138 thousand and ₱30 thousand, respectively (see Note 6).
- i. MASCORP also leases ground support equipment from PAL with total rental cost amounting to ₱2.1 million, ₱2.3 million and ₱1.8 million in 2014, 2013 and 2012, respectively. Outstanding payable as of December 31, 2014 and 2013 relating to this transaction amounted to ₱3.0 million and ₱1.0 million, respectively (see Note 17).
- j. MASCORP pays to Air Phil. its shares on the rental and utilities in MIAA amounting to ₱1.4 million, ₱2.0 million and ₱1.9 million in 2014, 2013 and 2012, respectively. Outstanding payable as of December 31, 2014 and 2013 relating to this transaction amounted to ₱0.4 million and ₱0.5 million, respectively (see Note 17).

MACS

- k. MACS has outstanding payable to PAL aggregating to ₱7.5 million and ₱8.0 million as of December 31, 2014 and 2013, respectively, representing PAL’s share in the results of operation of the passenger lounge at NAIA (see Note 17).
- l. MACS provided catering services to PAL with total revenue earned amounting to ₱77.6 million in 2012 (nil in 2014 and 2013). Receivables outstanding as of December 31, 2014 and 2013 amounted to ₱1.9 million (see Note 6).
- m. MACS leased airline catering equipment from PAL. Lease expense amounted to ₱0.6 million in 2012 (nil in 2014 and 2013). There is no outstanding payable relating to this transaction.
- n. In 2014 and 2013, MACS provided an unsecured and non-interest bearing cash advances to MacroAsia WLL amounting to ₱5.9 million. In 2014, MACS wrote off the total outstanding balance of cash advances to MacroAsia WLL amounting to ₱5.9 million.

Compensation of Key Management Personnel

The short-term benefits of the Company's key management personnel amounted to ₱62.05 million, ₱60.24 million and ₱58.7 million in 2014, 2013 and 2012, respectively. There are no termination benefits or share-based payments granted to key management personnel.

19. Net Service Revenue and Direct Costs

Net Service Revenue

	2014	2013	2012
Gross service revenue	₱1,830,231,762	₱1,719,908,393	₱1,687,606,346

	₱427,641,252	₱375,643,818	₱361,043,049

21. Employee Benefits Costs

Retirement Benefits Cost

The Group has a funded, non-contributory defined benefit group retirement plan, administered by a trustee, covering all of their permanent employees. The retirement benefit is equal to a certain percentage of the monthly final salary for every year of service. The fund is administered by a trustee bank which is responsible for investment strategy of the plan, in consultation with the Group's Management.

Under the existing regulatory framework, Republic Act 7641 requires a provision for retirement pay to qualified private sector employees in the absence of any retirement plan in the entity, provided however that the employee's retirement benefits under any collective bargaining and other agreements shall not be less than those provided under the law. The law does not require minimum funding of the plan.

The components of retirement benefits cost recognized in profit or loss follow:

	2014	2013	2012
Current service cost	₱15,529,069	₱13,074,783	₱14,948,329
Net interest cost	840,160	839,567	2,354,757
Past service cost	-	11,296,717	-
	₱16,369,229	₱25,211,067	₱17,303,086

(Forward)

	2014	2013	2012
Portions recognized in:			
Direct costs (Note 19)	₱8,162,122	₱6,406,036	₱8,799,275
General and administrative expenses (Note 20)	8,207,107	18,805,031	8,503,811
	₱16,369,229	₱25,211,067	₱17,303,086

In 2013, MAC amended its retirement plan increasing the benefits of covered employees which resulted in past service cost amounting to ₱11.3 million.

The details of the accrued retirement benefits payable, net of pension assets, are as follows:

	2014	2013
Present value of defined benefit obligation	₱100,851,544	₱88,562,026
Fair value of plan assets	85,600,614	69,816,241
	₱15,250,930	₱18,745,785

The details of the remeasurement in other comprehensive income are as follows:

	2014	2013	2012
Actuarial gain (loss) arising from changes in:			
Experience adjustments	(₱3,525,247)	₱5,547,259	(₱4,191,366)
Financial assumptions	7,806,902	(4,119,053)	29,189,723
Demographic assumptions	–	–	–
Remeasurement on plan assets	360,566	(1,675,474)	567,958
Changes in the effect of asset ceiling	–	318,174	(302,132)
	4,642,221	70,906	25,264,183
Tax effect	(905,761)	1,594,688	(7,718,704)
	₱3,736,460	₱1,665,594	₱17,545,479

Movements in asset ceiling adjustments in 2013 are as follows:

Beginning balance	₱302,132
Interest on the effect of asset ceiling	16,042
Changes in the effect of asset ceiling	(318,174)
Ending balance	₱–

Movements in accrued retirement benefits payable and pension asset follow:

2014:

	Accrued retirement benefits payable	Pension asset (Note 14)
Beginning balance*	₱19,061,625	(₱315,840)
Retirement benefits cost recognized in profit or loss	16,124,305	244,924
Contributions	(14,992,917)	-
Remeasurements in other comprehensive income	(4,630,341)	(11,880)
Benefits paid directly by the Company	(228,946)	-
Ending balance	₱15,333,726	(₱82,796)

* Beginning balance of accrued retirement benefits payable includes net pension asset of MAPDC amounting to ₱198,526, which was presented as part of pension asset as of December 31, 2013. The same amount was deducted from the beginning balance of pension asset. As of December 31, 2014, MAPDC has an accrued retirement liability position.

2013:

	Accrued retirement benefits payable	Pension asset (Note 14)
Beginning balance	₱16,157,863	(₱1,410,805)
Retirement benefits cost recognized in profit or loss	23,026,742	2,184,325
Contributions	(19,840,667)	(1,200,000)
Remeasurements in other comprehensive income	16,980	(87,886)
Benefits paid directly by the Company	(100,767)	-
Ending balance	₱19,260,151	(₱514,366)

The details of accrued retirement benefits payable and pension asset by entity are as follows:

	Accrued retirement benefits payable		Pension asset (Note 14)	
	2014	2013	2014	2013
MAC	₱8,547,315	₱13,539,313	₱-	₱-
MACS	2,692,041	4,343,927	-	-
MASCORP	1,420,150	1,376,911	-	-
MAPDC	657,629	-	-	198,526
MAATS	-	-	722,581	315,840

Changes in present value of defined benefit obligation are as follows:

	2014	2013
Beginning balance	₱88,562,026	₱64,201,339
Current service cost	15,529,069	13,074,783
Interest cost	4,114,223	3,400,040

(Forward)

	2014	2013
Past service cost	P-	P11,296,717
Actuarial gain on retirement obligation	(4,281,655)	(1,428,206)
Benefits paid out of the Group's plan assets	(2,843,173)	(1,881,880)
Benefits paid by the Group	(228,946)	(100,767)
Ending balance	P100,851,544	P88,562,026

Changes in fair value of plan assets are as follows:

	2014	2013
Beginning balance	P69,816,241	P49,756,413
Interest income on plan assets	3,274,063	2,576,515
Contributions to the plan	14,992,917	21,040,667
Benefits paid	(2,843,173)	(1,881,880)
Remeasurement on plan assets	360,566	(1,675,474)
Ending balance	P85,600,614	P69,816,241
Actual return on plan assets	P3,634,629	P901,041

The major categories of plan assets are as follows:

	2014	2013
Cash and cash equivalents	P60,493,522	P43,605,141
Debt instruments:		
Government securities	20,612,130	16,995,669
Unquoted debt securities	4,261,860	9,062,570
Receivables	233,102	152,861
	P85,600,614	P69,816,241

The government securities held have quoted prices in active market. The remaining plan assets do not have quoted market prices in active market.

The plan assets have diverse investments and do not have any concentration risk.

The cost of defined benefit pension plans and the present value of the pension obligation are determined using actuarial valuations. The actuarial valuation involves making various assumptions. The principal assumptions used in determining retirement benefits cost and obligations are shown below:

	2014	2013
Average discount rates	4.45%-4.46%	4.4%-5%
Average future salary increases	5%	5%

The sensitivity analysis below has been determined based on reasonably possible changes of each significant assumption on the defined benefit obligation as of December 31, assuming if all other assumptions were held constant:

Assumptions:	2014	2013
Discount rate:		
+100 basis points	(P13,487,473)	(P7,660,222)
-100 basis points	18,439,032	10,324,125

Assumptions:	2014	2013
Salary increase rate:		
+1%	17,642,304	17,504,738
-1%	(13,224,187)	(17,837,549)

Shown below is the maturity analysis of the undiscounted benefit payments:

Date of retirement:	2014	2013
1 year and less	₱435,830	₱1,036,475
more than 1 year to 5 years	5,531,066	6,678,393
more than 5 years to 10 years	55,385,938	45,518,651
more than 10 years to 15 years	103,000,968	115,043,183
more than 15 years to 20 years	109,959,285	111,791,240
more than 20 years	2,740,259,196	2,318,066,181

The Group expects to contribute ₱28.2 million in 2015. The Group does not currently employ any asset-liability matching strategies.

Other Employee Benefits

Employees can accumulate earned leave credits, which can be used anytime when needed by the employee or converted to cash, computed based on the employee's final rate upon separation (i.e., resignation or retirement). Accumulated leave credits are presented as "Other employee benefits" which amounted to ₱10.0 million and ₱9.5 million as of December 31, 2014 and 2013, respectively. Provision for accumulating leave credits amounted to ₱0.8 million, (₱1.3) million and ₱1.8 million in 2014, 2013 and 2012, respectively.

22. Interest Income, Financing Charges, and Other Income (Charges)

a. Interest income was derived from:

	2014	2013	2012
Cash and cash equivalents (Note 5)	₱7,583,733	₱11,030,322	₱13,492,768
AFS investments (Note 13)	4,556,763	8,241,561	5,663,830
Accretion of refundable deposits (Note 28b)	706,567	612,880	531,615
	₱12,847,063	₱19,884,763	₱19,688,213

b. Financing charges consists of:

	2014	2013	2012
Notes payable (Note 16)	₱4,012,987	₱-	₱1,754,456
Accretion of refundable deposits (Note 18d)	706,567	612,880	531,615
	₱4,719,554	₱612,880	₱2,286,071

c. Other income (charges) - net consist of:

	2014	2013	2012
Construction revenue (Note 15)	₱99,665,179	₱–	₱–
Construction costs (Note 15)	(99,665,179)	–	–
Reversal of prior years' accruals	19,358,658	534,511	–
Foreign exchange gain (loss) (Notes 23 and 30)	12,506,949	29,308,411	(59,732,308)
Gain on sale of investments in bonds (Notes 13a and 13b)	811,298	49,782,205	–
Reversal of impairment loss on investment property (Note 12)	–	17,260,303	–
Reversal of allowance for doubtful accounts (Note 6)	–	–	2,600,000
Impairment loss on AFS investments (Note 13c)	–	–	(400,000)
Reclaimed water income	1,037,615	884,410	–
Others - net	9,199,304	3,793,697	1,406,615
	₱42,913,824	₱101,563,537	(₱56,125,693)

23. Foreign Currency-denominated Monetary Assets and Liabilities

The Group's foreign currency-denominated monetary assets and liabilities as of December 31 are as follows:

	2014			2013		
	US Dollar	Chinese Renminbi (RMB or ¥)	Total Peso Equivalent	US Dollar	Chinese RMB	Total Peso Equivalent
Assets						
Cash and cash equivalents	\$7,948,676	¥54,316	₱355,854,829	\$4,154,191	¥54,467	₱184,802,673
Receivables	5,063,371	–	226,433,959	1,920,697	–	85,269,373
AFS debt investments	–	–	–	2,223,673	–	98,719,960
	13,012,047	54,316	582,288,788	8,298,561	54,467	368,792,006
Liabilities						
Accounts payable and accrued liabilities	\$115,517	¥–	₱5,165,920	\$59,331	¥–	₱2,633,994
Net foreign currency- denominated assets	\$12,896,530	¥54,316	₱577,122,868	\$8,239,230	¥54,467	₱366,158,012

As of December 31, 2014 and 2013, the exchange rates of the Peso to US\$ dollar were ₱44.72 and ₱44.39 to US\$1, respectively, while the exchange rates of the Peso to RMB as of December 31, 2014 and 2013 were ₱7.18 and ₱7.31 to RMB1, respectively.

24. Registrations with the Board of Investments (BOI) and the Philippine Economic Zone Authority (PEZA)

- a. On July 15, 2008, the Company registered with the BOI, under the Omnibus Investment Code of 1987, as a producer of beneficiated nickel ore. Under this registration with the BOI, the Company is entitled to certain tax and non-tax incentives including income tax holiday (ITH) for a period of six years from January 2009 or actual start of commercial operations,

whichever is earlier. As the mining operations have not yet started, no benefit from ITH was availed of in 2014, 2013 and 2012. As of December 31, 2014, the Company has ongoing request to the BOI to amend the submitted Project Timetable for mining operations from January 2009 to the fourth quarter of 2015.

- b. On August 31, 2000, MAPDC was registered with the PEZA and started commercial operations as the Ecozone Developer/Operator of the MacroAsia Special Ecozone at the Ninoy Aquino International Airport (NAIA). At present, the MacroAsia Special Ecozone is the only existing ecozone within NAIA. Under the terms of its registration, MAPDC is subject to certain requirements and is entitled to certain tax benefits provided for under Republic Act No. (R.A.) 7916 (The Special Economic Zone Act of 1995), as amended by R.A. No. 8748, which include, among others, exemption from payment of all national internal revenue taxes and all local government imposed fees, licenses or taxes. In lieu thereof, MAPDC shall pay a 5% final tax on gross income earned from its operation of the MacroAsia Special Ecozone.

25. Income Taxes

- a. The current provision for income tax in 2014, 2013 and 2012 consists of the MCIT of the Company, MAATS (for 2014, 2013 and 2012) and MAPDC (for 2013 income from unregistered activities), the RCIT of MACS, MASCORP (for 2014, 2013 and 2012), the 5% tax on MAPDC's gross income from its PEZA-registered activities (see Note 24) and final tax on interest income of the Group.
- b. The Company's and subsidiaries' net deferred income tax assets (liabilities) as of December 31 are as follows:

- c. As of December 31, the deductible temporary differences, excess MCIT and NOLCO for which no deferred income tax assets were recognized in the consolidated balance sheets are as follows:

	2014	2013	2012
Deductible temporary differences on:			
Allowances for probable losses on:			
Input VAT	₱29,205,949	₱29,205,949	₱29,205,949
Deferred mine exploration costs	4,181,184	4,181,184	4,181,184
Unrecoverable creditable withholding taxes	-	-	1,747,707
Impairment in value of investment property	-	-	17,260,303
Accrued retirement benefits payable	11,221,535	13,539,313	6,163,668
Unrealized foreign exchange losses	4,075,394	11,569,003	4,503,154
Accrued incentive pay	1,271,970	1,243,769	-
NOLCO	122,476,200	205,594,458	323,960,449
MCIT	5,062,072	4,384,308	3,349,970

MAC, MMC, ASSC, PWBRI, DRDC and MAPDC did not recognize deferred income tax assets on these temporary differences, MCIT and NOLCO as management believes that the said companies may not have enough taxable regular income and capital gains against which these temporary differences and NOLCO can be used or RCIT payable against which the MCIT can be applied.

- d. MCIT can be deducted against the RCIT and NOLCO can be claimed as deduction from regular taxable income. As of December 31, the details of NOLCO and MCIT follow:

Year Incurred	Expiry Date	2014		2013

Provision for income tax	₱24,005,419	₱34,665,832	₱27,941,747

26. Basic/Diluted Earnings Per Share

Basic/diluted earnings per share are computed as follows:

	2014	2013	2012
Net income (loss) attributable to equity holders of the Company	₱114,979,503	(₱170,047,500)	(₱186,160,179)
Divided by weighted average number of common shares outstanding*	1,233,404,000	1,233,404,000	1,242,935,186
	₱0.09	(₱0.14)	(₱0.15)

* The weighted average number of shares takes into account the weighted average effect of changes in treasury share transactions during the year.

27. Equity

- a. Restriction on retained earnings of the Company

The retained earnings as of December 31 is restricted for dividend declaration for the portion equivalent to the following:

- Undistributed earnings of subsidiaries and equity in net earnings of associates amounting to ₱151.7 million and ₱54.2 million as of December 31, 2014 and 2013, respectively.
- Cost of treasury shares amounting to ₱49.4 million as of December 31, 2014 and 2013.
- Deferred income tax assets amounting to ₱1.4 million and ₱4.1 million as of December 31, 2014 and 2013.

b. Appropriation of retained earnings

On December 12, 2014, the MACS' BOD approved the appropriation of its retained earnings amounting to ₱50.0 million for plant expansion. MACS' BOD allocated this appropriation for the company's plans to operate an offsite commissary within the next two years.

On September 26, 2012, MACS' BOD approved the appropriation of its retained earnings which amounted to ₱50.0 million for various investments to expand business and renovation of facilities of MACS. On December 31, 2013, MACS' BOD has allotted this appropriation for the operation of an offsite commissary within the next two years.

On June 21, 2012, MASCORP's BOD approved the appropriation of its retained earnings which amounted to ₱30 million for business expansion. The expansion program is expected to run for another two years.

On December 12, 2011 and July 15, 2011, the Company's BOD approved the appropriation of the Company's retained earnings which amounted to ₱393.1 million and ₱300.0 million, respectively, for the mining development projects and water project, respectively. The water project is expected to be completed and operational on the last quarter of 2015. As to the mining project, the Company intends to start development activities and mining operations on 2015, after the period allotted for the extension of exploration, if on-going studies indicate favorable economics.

On December 12, 2011, MAATS' BOD approved the appropriation of its retained earnings which amounted to ₱15.0 million for purposes of expanding the business of MAATS, particularly the construction of an aircraft hangar. Acquisition is to be made in 2015 or earlier. In 2014, however, MAATS' BOD reversed the appropriated amount to declare as dividend during the year.

c. Cash dividends declared by the Company from the unappropriated retained earnings are as follows:

Date Approved	Per share	Stockholder of Record Date	Date of Payment
March 25, 2013	₱0.065	April 24, 2013	May 19, 2013
March 7, 2012	0.065	April 24, 2012	May 18, 2012

d. Treasury stock

On July 16, 2010, the BOD approved the Share Buyback Program (the Program) involving a total cash outlay of ₱50.0 million for the repurchase of the outstanding common shares of the Company from the market, using the trading facilities of the Philippine Stock Exchange (PSE). The Program will not involve any active or widespread solicitation for stockholders to sell. Repurchase of shares of stock will be done during the period of the Program at such prices perceived by the Company to be lower than the inherent value of the share. The Program will run until the ₱50.0 million authorized cash outlay is fully utilized or until such time that the BOD may direct, subject to appropriate disclosures to the PSE and the SEC.

There was no reacquisition of shares in 2014 and 2013. In 2012, the Company reacquired 6,125,000 shares for ₱17.5 million.

e. Movement in the Company's outstanding shares follows:

Outstanding shares as of December 31, 2011	1,239,529,000
Acquisition of treasury shares in 2012	6,125,000
<u>Outstanding shares as of December 31, 2013 and 2014</u>	<u>1,233,404,000</u>

f. Track record of registration of securities

On August 30, 1974, the SEC authorized the registration and licensing of the Company's securities with total par value of ₱20.0 million divided into 2,000,000,000 shares with a par value of ₱0.01 per share.

On March 22, 2000, the Philippine Stock Exchange, Inc. authorized to list the Company's 750,000,000 shares, with a par value of ₱1.00 per share and 500,000,000 warrants divided into the following:

- i. 250,000,000 shares to cover the 1:4 stock rights offering to stockholders of record as of April 12, 2000 at an offer price of ₱2.00 per share;
- ii. 500,000,000 warrants to cover the 2:1 warrants offering attached to and detachable from the rights shares at a subscription price of ₱0.10 per warrant; and
- iii. 500,000,000 shares to cover the underlying shares of warrants at an exercise price of ₱6.00 per share. Actual listing of the underlying common shares of the warrants shall take effect upon the exercise of the warrants.
- iv. All warrants expired in 2005.

MAC's shares are listed and traded at the Philippine Stock Exchange, Inc. and the approximate number of holders of its common equity as of December 31, 2014 and 2013 is 856 and 867, respectively.

g. Cash dividends received by non-controlling interest

On December 10, 2013, MACS' BOD approved the declaration of cash dividends amounting to ₱20.0 million or ₱16 per share payable on or before April 15, 2014.

On March 27, 2013, MACS' BOD approved the declaration of cash dividends amounting ₱20.0 million or ₱16 per share payable on or before May 15, 2013 and another ₱20.0 million or ₱16 per share payable on or December 31, 2013. These were fully paid in 2013.

Dividends attributed to non-controlling interest amounted to ₱12.0 million. Outstanding payable as of December 31, 2013 amounted to ₱4.0 million, which was paid in 2014.

h. Acquisition of non-controlling interest

In 2014, MAPDC paid a total of ₱10.6 million for the remaining 12.6% non-controlling interest to the previous stockholders of WBSI.

In 2012, MAC paid for the subscription payable of all of the previous non-controlling stockholders of MMC bringing MAC's ownership over MMC from 67% to 100%. The carrying value of the interest acquired as of that date amounted to ₱2.1 million.

28. Significant Agreements and Commitments

a. Concession Agreements

MACS and MASCORP have concession agreements with Manila International Airport Authority (MIAA) and Mactan-Cebu International Airport Authority (MCIAA) [the airport authorities] to exclusively operate within the airport authorities' premises. MACS operates an in-flight catering service for civil and/or military aircraft operating at NAIA and or MDA. In 2012, the concession agreement of MACS was renewable every year upon mutual agreement of the parties. In 2013, the concession agreement of MACS is renewed for a period of three years commencing on June 1, 2013 and expiring on May 31, 2016 or earlier depending upon the MIAA development plan affecting the area. The agreement is renewable yearly up to three years, subject to certain conditions. Meanwhile, MASCORP operates domestic and international groundhandling services at Terminals 1 and 2, MCIAA and KIA. The concession agreement of MASCORP is for a period of one year, subject to renewal at the sole option of the airport authorities. In consideration of the concession privilege, MACS and MASCORP pay the airport authorities a monthly concession privilege fee equivalent to 7% of monthly gross income on catering services and groundhandling services, respectively.

Concession privilege fee amounted to ₱106.9 million, ₱99.1 million, and ₱95.8 million in 2014, 2013 and 2012, respectively, which is presented under direct cost (see Note 19).

b. Lease Agreements

- i. In 1996, the Company assigned all its rights and obligations to MACS under the lease agreement it entered in the same year with MIAA for the use of a parcel of land where the catering concession facilities are located. The lease contract is for a period of 10 years from the start of the construction of the facilities, renewable every five years under such terms and conditions as may be agreed upon by both parties. Minimum annual rental payment amounts to ₱8.5 million. Upon expiration of the lease agreement, both parties mutually agreed to continue the lease on a renewable short-term basis using the terms in effect during the last year that the original lease agreement was in force.

In 2004, the Supreme Court (SC) issued a decision declaring current rental charges of MIAA at ₱35.55 per square meter (the current rate) as null and void. From 2004 to August 2013, MACS settles the lease charges using the contested rate notwithstanding the SC's ruling on the validity of such rate.

The lease contract between MACS and MIAA expired in July 2008. One of the provisions of the lease agreement is that MACS will transfer to MIAA all permanent improvements which MACS might have constructed in the leased premises upon the expiration of the original lease or upon cancellation of the lease agreement. As of December 31, 2012, the lease agreement was not renewed.

In October 2013, MACS has renewed the lease agreement with MIAA for a period of three (3) years commencing on June 1, 2013 and expiring on May 31, 2016 or earlier, depending upon the MIAA development plan affecting the area, renewable yearly up to three years, subject to certain conditions. Total minimum lease payment for this lease agreement follow:

Within one year	₱14,696,372
After one year up to end of lease contract	6,123,488
	<hr/>
	₱20,819,860

Lease expense relating to this lease agreement amounted to ₱16.1 million in 2014 and 2013, ₱11.3 million in 2012.

- ii. On August 7, 2000, MAPDC entered into a lease contract with MIAA covering the use of a parcel of land for 25 years of 23 hectares of land within NAIA. Significant terms and conditions of the contract are as follows:
 1. MAPDC is allowed to sub-lease the leased property to an affiliate. Since the leased property is declared as an economic zone, the sublease is preferably extended by MAPDC to an entity which is also PEZA-registered.
 2. MAPDC and/or its sub-lessee intends to invest US\$200 million over the next five years by introducing additional capabilities and enhancing the competitiveness in terms of productivity, quality, turnover time and customer orientation.
 3. The monthly rental fee shall be ₱53.34 per square meter, or a total of ₱12.1 million, with guaranty deposit of two months advance rental. The rental and other charges shall be subject to a fixed price escalation of 5% starting on the sixth year and by another 5% on years 11, 16 and 21. The escalation shall be on a compounded basis.
 4. The contract may be terminated and cancelled at the instance of MAPDC if:
 - a. MAPDC, its sub-lessee or any of its successors-in-interest, cease to operate their business; and or
 - b. MIAA or the government decides to transfer the airport to another location, making it impossible for MAPDC to conduct its business.

Future minimum rentals payable as of December 31 under MAPDC's operating lease agreement with MIAA are as follows:

	2014	2013
Within one year	₱162,800,092	₱160,131,238
After one year but not more than five years	843,491,296	659,874,143
Five years up to end of lease contract	823,875,219	1,140,534,742
	₱1,830,166,607	₱1,960,540,123

The rental deposit made to MIAA amounting to ₱24.6 million is reported at amortized cost in the consolidated balance sheets. The carrying value of the deposit amounted to ₱5.3 million and ₱4.6 million as of December 31, 2014 and 2013, respectively, and is included as part of "Deposits and other noncurrent assets" account. The difference between the face amount of the refundable deposit and its present value at the inception of the lease, amounting to ₱20.0 million, is treated as a deferred rent expense and is being amortized over the lease term. Related amortization amounted to ₱0.9 million in 2014, 2013 and 2012. Accretion of the rental deposit (included as part of "Interest income" account) amounted to ₱0.7 million, ₱0.6 million and ₱0.5 million in 2014, 2013, and 2012, respectively. As of December 31, 2014 and 2013, deferred rent expense amounted to ₱10.3 million and ₱11.2 million, respectively.

Further, as a result of the straight-line recognition of operating lease expense, accrued rental payable was recognized which amounted to ₱118.0 million and ₱117.6 million as of December 31, 2014 and 2013, respectively.

Rent expense amounted to ₱161.5 million in 2014, 2013 and 2012 (see Note 19).

iii. MASCORP has a lease agreement with MIAA for the lease of office space and staging area in the following locations:

1. Terminal 1 on a month-to-month basis.
2. Terminal 2 on a month-to month basis.

One of the provisions of the lease agreement is that MASCORP will transfer to MIAA all permanent improvements which MASCORP might have constructed in the lease premises upon the expiration of the original lease or upon cancellation of the lease agreement due to breach or violation of the terms and conditions of MIAA, or termination without renewal or extension of the terms of the lease. All permanent improvements shall automatically become the absolute property of MIAA and MASCORP shall have no right of reimbursement of the cost.

On August 10, 2009, the Company paid surety cash deposit to MIAA amounting to ₱2.0 million as requirement for the renewal of the lease agreement. Currently, management is in discussions with necessary parties to ensure the renewal of the lease. As negotiation with MIAA is handled at the Group level, the offer has also not been accepted by MASCORP. Meanwhile, MIAA continues to bill and MASCORP continues to pay the rental fee based on current rates.

Rent expense amounted to ₱5.7 million, and ₱6.4 million and ₱3.9 million in 2014, 2013 and 2012, respectively.

iv. In 2012, MASCORP entered into a lease agreement with Sky Freight Center located at Ninoy Aquino Avenue, Paranaque City for its office space. The lease is for a period of five years, commencing on April 16, 2012 until April 15, 2017, subject to 5% escalation starting on the third year of the lease term. Total rent expense charged to operations amounted to ₱1.2 million in 2014 and 2013. MASCORP paid security deposit amounting to ₱2.3 million which was included under the “Deposits and other noncurrent assets” account (see Note 14).

The future annual rental commitments of the foregoing lease agreement as of December 31 follow:

	2014	2013
Within one year	₱1,248,526	₱1,191,465
After one year but not more than five years	1,698,699	2,896,983
	₱2,947,225	₱4,088,448

v. The Company has several lease agreements with third party lessors covering the use of parcels of land for 35 years in Palawan starting 2010. In 2012, the Company entered into additional lease of land with another third party lessor. The leased properties will be used by the Company as drying area and/or stockpile of its mine products and other related purposes (see Note 32). The Company prepaid the rental charges up to 18 to 30 years totalling ₱8.5 and ₱9.0 million as of December 31, 2014 and 2013, respectively, and is included under “Deposits and other noncurrent assets” account (see Note 14). Rental rates are subject to escalation during the lease periods. Rental expense charged to operations amounted to ₱0.6 million in 2014, 2013 and 2012. This is included as part of “Mining expenses” under “Operating expenses” account (see Note 19).

c. Service Fee

In 2007, MACS BOD passed a resolution whereby MACS shall pay service fee to the Company and SATS provided that MACS' profit before tax, after calculating the service fee, is not less than the amount of service fee. The fee shall be equivalent to 5% of quarterly net sales, which shall be divided according to the equity ratio between the Company and SATS of 80% and 20% share, respectively. Total service fee recognized by MACS amounted to ₱48.4 million, ₱41.4 million and ₱43.8 million in 2014, 2013 and 2012, respectively. SATS' corresponding share of the service fee amounted to ₱9.7 million, ₱8.3 million and ₱8.8 million in 2014, 2013 and 2012, respectively. Outstanding payable to SATS amounted to ₱8.8 million and ₱6.7 million as of December 31, 2014 and 2013, respectively (see Note 17).

d. Exploratory Service Agreements

MMC has various service agreements with third parties, wherein the MMC will undertake exploratory drilling and sampling of nickel laterite services on the third party's mining tenement.

Revenue recognized amounted to ₱34.9 million, ₱9.2 million and ₱10.3 million in 2014, 2013 and 2012, respectively, while the outstanding receivables balance as of December 31, 2014 and 2013 amounted to ₱11.8 million and ₱4.0 million, respectively.

e. Waterworks System Agreement

On February 12, 2013, MAPDC entered into a Memorandum of Agreement (the Agreement) with Solano to design, construct, commission and maintain a new and complete waterworks system in Solano, Nueva Vizcaya ("Service Area"). The Agreement is for a period of 25 years from February 12, 2013 subject to renewal based on the provisions of the Agreement.

MAPDC is allowed to bill or invoice and collect payment from its customers for services rendered, including one-time service and installation charge and meter and consumption deposit. After a certain period from commencement date, MAPDC shall pay Solano service fee per cubic meter of water sold. For purposes of implementing the services, MAPDC incorporated SNVRDC to serve as the operating entity (See Note 15).

29. Capital Management

The primary objective of the Group's capital management is to ensure that it maintains a strong credit and healthy capital ratios in order to support its business and maximize shareholder value.

The Group manages its capital structure and makes adjustment to it, in light of changes in economic conditions. To maintain or adjust capital structure, the Group may adjust the dividend payment to shareholders, return capital to shareholders repurchase or issue new shares. The Group is not subject to externally imposed capital requirements as of December 31, 2014 and 2013. Further, no changes were made in the objectives, policies or processes for each of the three years in the period ended December 31, 2014.

The Group monitors capital vis-à-vis after-tax profit. The Group also monitors the equity ratio. Equity considered by the Group is total equity in the consolidated balance sheets, excluding items arising from other comprehensive income. The return on equity ratio is computed by dividing the after tax profit by total capital.

The following summarizes the total capital considered by the Group and the computation of the return on equity:

	2014	2013
Capital stock	₱1,250,000,000	₱1,250,000,000
Additional paid-in-capital	281,437,118	281,437,118
Treasury shares	(49,418,660)	(49,418,660)
Retained earnings	1,477,897,069	1,373,499,166
	₱2,959,915,527	₱2,855,517,624
Net income (loss)	₱121,910,289	(₱160,842,971)
Return on equity	4.12%	-5.63%

30. Financial Risk Management Objectives and Policies

Risk Management Structure

Audit Committee

The Committee performs oversight role on financial management functions especially in the areas of managing credit, market, liquidity, operational, legal and other risks of the Group.

Risk Management Committee

The Committee assists the BOD in identifying and assessing the various risks to which the Group is exposed to. The Committee also ensures that the Group's management has implemented a process to identify, manage and report on the risks that might prevent the Group from achieving its strategic objectives.

BOD

The BOD is responsible for the overall risk management approach and for approval of risk strategies and principles of the Group.

Financial Risk Management

The Group's principal financial instruments comprise cash and cash equivalents and some external liabilities which were availed of primarily to fund operations. The Group has other financial assets and financial liabilities such as trade receivables and payables which arise directly from operations.

The main risks, arising from the Group's financial instruments are foreign currency risk, credit risk, interest rate risk and liquidity risk. The BOD reviews and approves policies for managing these risks and they are summarized as follows:

Foreign currency risk

The Group's transactional currency exposure arises from sales in currencies other than its functional currency and retaining its cash substantially in currency other than its functional currency. Approximately 90% of MACS' and 63% of MASCORP's revenue in 2014, 2013, and 2012, respectively, are denominated in US\$. In addition, the Group closely monitors the foreign exchange rates fluctuations and regularly assesses the impact of future foreign exchange movements on its operations. Foreign currency monetary assets and liabilities are disclosed in Note 23.

The following table demonstrates the impact on the Group's income before income tax and equity of reasonably possible changes in the US\$, with all other variables held constant (amounts in millions):

	Movement in US\$ and RMB	Increase (decrease) in Income before Income Tax US\$	Increase (decrease) in Income before Income Tax RMB
2014	Increase of 4%	₱23.1	₱0.05
	Decrease of 4%	(23.1)	(0.05)
	Movement in US\$ and RMB	Increase (decrease) in Loss before Income Tax US\$	Increase (decrease) in Loss before Income Tax RMB
2013	Increase of 5%	(₱13.4)	(₱0.02)
	Decrease of 5%	13.4	0.02
2012	Increase of 4%	(11.6)	–
	Decrease of 4%	11.6	–

The Group reported net foreign exchange gain of ₱12.5 million and ₱29.3 million in 2014 and 2013, respectively, and net foreign exchange loss of ₱59.7 million in 2012 (see Note 22).

Credit and concentration risk

Credit risk is the risk that the Group will incur a loss because its customers or counterparties failed to discharge their contractual obligations. The Group manages and controls credit risk by setting limits on the amount of risk it is willing to accept for individual counterparties and by monitoring exposures in relation to such limits.

The Group trades only with related parties and duly evaluated and approved creditworthy third parties. It is the Group's policy that all customers and counterparties that wish to trade with the Group, particularly on credit terms, are subjected to credit verification procedures. In addition, receivable balances are monitored on a continuous basis with the result that the Group's exposure to bad debts is not significant. The Group has major concentration of credit risk given that the Group's cash and cash equivalents are deposited in the local affiliated bank. Further, MASCORP's major customers include PAL and Air Phil. MMC also has a single customer. However, since these companies are related parties and the local affiliated bank is one of the country's reputable banks, management believes that the Company is not exposed to any significant risk.

With respect to credit risk arising from financial assets, the Group's exposure arises from default of the counterparty, with a maximum exposure equal to the carrying values of these instruments. The Group only deals with financial institutions that have been approved by the BOD of the Company and those of its subsidiaries. The Group does not require any collateral and other credit enhancements.

Credit quality per class of financial assets

The credit quality of financial assets is managed by the Group using internal credit ratings.

The next tables show the credit quality of the Group's financial assets and an aging analysis of past due but not impaired receivables.

December 31, 2014:

	Neither past due nor impaired			Past due or individually impaired	Total
	High Grade	Standard Grade	Sub-standard Grade		
Loan and receivable:					
Cash in bank and cash equivalents*	₱680,209,788	₱-	₱-	₱-	₱680,209,788

	₱954,902,104	₱41,756,342	₱-	₱175,345,071	₱1,172,003,516

*Exclusive of cash on hand amounting to ₱1,027,745 as of December 31, 2014.

December 31, 2013:

	Neither past due nor impaired			Past due or individually impaired	Total
	High Grade	Standard Grade	Sub-standard Grade		
Loan and receivable:					
Cash in bank and cash equivalents*	₱866,454,493	₱-	₱-	₱-	₱866,454,493
Receivables:					
Trade	93,626,585	27,107,932	29,341,649	152,375,164	302,451,330
Due from related parties	38,761,938	-	-	-	38,761,938
Due from officers and employees	12,344,665	-	-	-	12,344,665
Interest receivables	2,709,385	-	-	-	2,709,385
Other receivables	14,651,493	-	-	3,371,409	18,022,902
Deposits	19,384,751	-	-	-	19,384,751
Project advances and investment**	-	15,572,088	-	-	15,572,088
AFS investments-					
Retail treasury and corporate bonds	106,615,071	-	-	-	106,615,071
	₱1,154,548,381	₱42,680,020	₱29,341,649	₱155,746,573	₱1,382,316,623

*Exclusive of cash on hand amounting to ₱926,436 as of December 31, 2013.

**Exclusive of nonfinancial assets of ₱3,304,000 as of December 31, 2013.

The Group's financial assets are categorized based on the Group's collection experience with affiliates and third parties.

- High Grade - settlements are obtained from counterparty following the terms given to the counterparty.
- Standard Grade - some reminder follow-ups are performed to obtain settlement from the counterparty.
- Sub-standard Grade - constant reminder follow-ups are performed to collect accounts from counterparty.
- Impaired - difficult to collect with some uncertainty as to collectability of the accounts.

The aging analysis of receivables as of December 31 are as follows:

	Past Due but not Impaired					Impaired	Total
	Less than 30 days	30 to 60 days	61 to 90 days	More than 90 days			
2014	₱37,153,642	₱58,588,286	₱23,408,940	₱43,110,333	₱13,083,870	₱175,345,071	
2013	₱33,378,250	₱55,822,716	₱20,796,741	₱34,164,996	₱11,583,870	₱155,746,573	

Impairment assessment

The main considerations for impairment assessment include whether any payments are overdue or if there are any known difficulties in the cash flows of the counterparties. The Group assesses impairment on an individual account basis.

Items considered when determining allowance amounts include the sustainability of the counterparty's business plan, its ability to improve performance once a financial difficulty has arisen, projected receipts and the expected dividend payout should bankruptcy ensue, the availability of other financial support and the realizable value of collateral, and the timing of the expected cash flows. The impairment losses are evaluated at each reporting date, unless unforeseen circumstances require more careful attention even at interim.

Interest rate risk

The Group's exposure to the risk for changes in market interest rates relates primarily to the Group's notes payable with floating interest rates. The Group has a practice of keeping its interest-bearing liabilities to third parties within a threshold that can be serviced through operating cash flows. Management closely monitors the behaviour of interest rates to ensure that cash flow interest rate risk is kept within management's tolerable level. Finally, interest-bearing liabilities are ordinarily incurred on a short-term basis only.

The table below sets forth the estimated change in the Group's income before income tax (through the impact on the variable rate borrowings) due to parallel changes in the interest rate curve in terms of basis points (bp) as of December 31, 2014 and 2013, with all other variables held constant. There is no other impact on the Group's equity other than those already affecting the consolidated statements of income.

	Increase (decrease) in income before income tax 2014	Increase (decrease) in loss before income tax 2013	Increase (decrease) in loss before income tax 2012
100 bp rise	(P0.86 million)	P0.27 million	P39.5 million
100 bp fall	0.86 million	(0.27 million)	(39.5 million)
50 bp rise	(0.43 million)	0.14 million	19.7 million
50 bp fall	0.43 million	(0.14 million)	(19.7 million)

Liquidity risk

Liquidity risk is the risk that the Group will not be able to meet its obligations when they fall due under normal and stress circumstances. To limit this risk, management manages assets with liquidity in mind, and monitors future cash flows and liquidity on a daily basis. This incorporates an assessment of expected cash flows which could be used to secure additional funding if required.

The Group's objective is to maintain a balance between continuity of funding and flexibility through the use of operating cash flows, advances from related parties and short-term bank loans.

In addition, MASCORP has an available credit line for P20.0 million as of December 31, 2014. The line of credit is available through drawing of checks up to the approved credit line and will be effective up to November 2015. As of December 31, 2014, there was no amount drawn against this line of credit.

The table below summarizes the maturity profile of the Group's financial liabilities based on contractual and undiscounted repayment obligations. Repayments which are subject to notice are treated as if notice were to be given immediately. The table also analyses the maturity profile of the Group's financial assets held for managing liquidity in order to provide complete view of the Group's contractual commitments and liquidity.

December 31, 2014:

31. Fair Value

The following table provides the comparison of carrying amounts and fair values of the Group's assets and liabilities:

As at 31 December 2014:

	Date of valuation	Carrying value	Fair value measurements using		
			Quoted prices in active markets (Level 1)	Significant observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Assets measured at fair value:					
Available for sale financial investments (Note 13)					
Government securities	December 31, 2014	₱66,197,600	₱66,197,600	₱–	₱–
Golf club shares	2014	37,138,300	37,138,300	–	–
Assets for which fair value is disclosed:					
Investment property (Note 12)	December 31, 2014	143,852,303	–	–	257,959,500
Deposits (Note 14)	December 31, 2014	16,208,078	–	–	16,208,078
Liabilities for which fair value is disclosed					
Deposits (Note 18)	December 31, 2014	5,328,763	–	–	5,328,763

As at 31 December 2013:

	Date of valuation	Carrying value	Fair value measurements using		
			Quoted prices in active markets (Level 1)	Significant observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Assets measured at fair value:					
Available for sale financial investments (Note 13)					
Government securities		₱66,871,704	₱66,871,704	₱–	₱–
Corporate bonds	December 31, 2013	39,743,367	39,743,367	–	–
Golf club shares	2013	30,176,800	30,176,800	–	–

(Forward)

	Date of valuation	Carrying value	Fair value measurements using		
			Quoted prices in active markets (Level 1)	Significant observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Assets for which fair value is disclosed:					
Investment property (Note 12)	December 17, 2013	₱143,852,303	₱-	₱-	₱174,064,000
Deposits (Note 14)	December 31, 2013	30,767,121	-	-	30,767,121
Liabilities for which fair value is disclosed					
Deposits (Note 18)	December 31, 2013	16,004,566	-	-	16,004,566

There have been no transfers between Level 1 and 2 in 2014 and 2013.

Cash and cash equivalents, receivables, accounts payables and accrued liabilities

The carrying values of cash and cash equivalents, receivables and accounts payable and accrued liabilities approximate their fair value due to their short-term nature.

Notes payable

The carrying value of notes payable approximates its fair value due to the re-pricing feature of the interest it carries.

AFS investments

Fair value of the quoted notes and bonds is based on exit price at the reporting date.

Investment property

The independent appraiser used the “Market Data Approach” in valuing the property. The Group has determined that the highest and best use of the property is its current use. The highest and best use of the property at the measurement date would be for industrial or residential condominium use. For strategic reasons, the property is not being used in this manner.

32. Deferred Mine Exploration Costs and Mining-Related Activities

As of December 31, 2014 and 2013, deferred mine exploration costs follow:

Beginning/ending balance	₱237,489,872
Less accumulated impairment loss	4,181,184
	₱233,308,688

Infanta Nickel Project

Deferred mine exploration costs pertain to costs incurred by the Company in the exploration of its mining property located in Brooke’s Point, Palawan, the Infanta Nickel Project (the Project).

The Project is the Company’s tenement under a Mineral Production Sharing Agreement (MPSA) with the government. The MPSA is a consolidation of the Company’s eight mining lease contracts with the Government that were granted under Commonwealth Act No. 137 and P.D. 463. In the 1970’s, the Company operated the mine as an export producer of beneficiated nickel laterite. As such, it had sales and purchase agreements with Sumitomo Metal Mining Co.,

Ltd. of Japan, and thus, had made shipments of nickel ore to Japan in the 1970's until very low nickel prices forced the operations to be suspended. The previous quarry and road network within the tenement still exist and is currently being maintained for future use.

The MPSA runs for a term not exceeding 25 years from the date of the grant of the MPSA, and is renewable for another term not exceeding 25 years under the same terms and conditions, without prejudice to changes that will be mutually agreed upon by the DENR and the Company.

In 2008, the Supreme Court has ruled with finality that the Company has vested and legal rights to its MPSA; and with the grant of the environmental compliance certificate (ECC) in 2010 for operations by the DENR, the Company has secured two major permits necessary to bring back the mine to operations. Currently, the Company is working on the acquisition of a Certificate of Pre-condition (CP) from the National Commission on Indigenous Peoples (NCIP) and approval of its Declaration of Mining Feasibility from the Mines and Geosciences Bureau. Simultaneously, it has ongoing discussions with potential partners for the development of the project for the best interest of the various stakeholders.

In 2010, the exploration efforts of the Company resulted in the delineation of 10.8 million dry metric ton of measured mineral resource with average grade of 1.30% nickel (Ni) and 31.28% iron (Fe) at 1% NI cut-off. The reserves calculation was validated by the Mines and Geosciences Bureau (MGB) to be acceptable. MGB's independent calculation revealed a measured mineral resource of 12.8 million dry metric ton with average grade of 1.29% Ni and 32.20% Fe at 1.0% Ni cut off.

On September 13, 2010, the Company received the ECC for operations of the Project. The ECC was granted by the Department of Environment and Natural Resources (DENR), after a thorough project review and series of consultations were conducted principally under the supervision of the Environmental Management Bureau (EMB) and Environmental Impact Assessment Review Committee.

The recovery of deferred mine exploration costs depends upon the success of exploration activities and future development of the mining properties, as well as the discovery of recoverable reserves in quantities that can be commercially produced. The Company has cumulative impairment loss of ₱4.2 million considering the market condition in prior years.

Additions to deferred mine exploration costs primarily pertain to drilling, assay analysis, geological survey and site management expenditures.

Administrative expenses related to the mining exploration activities are expensed as incurred and presented under "Mining expenses" account in the consolidated statements of income. These amounted to ₱5.0 million, ₱13.3 million and ₱13.8 million in 2014, 2013 and 2012, respectively (see Note 20).

Deeds of Assignment with Bulawan Mining Corporation (BUMICO)

In 2012, the Company entered into two deeds of assignment with BUMICO. The first deed of assignment covered BUMICO's rights, title to, interests and obligations under the former's application for exploration permit with the MGB of the DENR over certain properties in Basay, Negros Oriental under Exploration Permit Application No. 000103 VII. In consideration, the Company paid BUMICO ₱16.0 million, which is included under "Deferred mine exploration costs" account in the consolidated balance sheets. The said assignment was approved by the Regional Director of the MGB on January 28, 2013.

The second deed of assignment covered BUMICO's rights, interests and obligations under an Operating Agreement with Philex Mining Corporation (PHILEX). The Operating Agreement granted PHILEX the exclusive right and privilege to take over, as an independent contractor, the working and operation of Mineral Claims as defined in the Operating Agreement for a period of 25 years. In consideration, the Company offered its technical services for BUMICO to tie up with PHILEX. The said deed of assignment was consented by PHILEX. Currently, PHILEX has no operations over the Mineral Claims. Once PHILEX resumes the operations of and generates income from the Mineral Claims, the Company shall be entitled to royalty payments and that BUMICO shall be entitled to a certain percentage of such royalties.

INDEPENDENT AUDITORS' REPORT ON SUPPLEMENTARY SCHEDULES

The Stockholders and the Board of Directors
MacroAsia Corporation
12th Floor, Allied Bank Center
6754 Ayala Avenue, Makati City

We have audited in accordance with Philippine Standards on Auditing, the consolidated financial statements of MacroAsia Corporation and its subsidiaries as at December 31, 2014 and 2013 and for each of the three years in the period ended December 31, 2014, included in this Form 17-A, and have issued our report thereon dated March 31, 2015. Our audits were made for the purpose of forming an opinion on the basic financial statements taken as a whole. The schedules listed in the Index to the Consolidated Financial Statements and Supplementary Schedules are the responsibility of the Company's management. These schedules are presented for purposes of complying with Securities Regulation Code Rule 68, As Amended (2011) and are not part of the basic financial statements. These schedules have been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, fairly state, in all material respects, the information required to be set forth therein in relation to the basic financial statements taken as a whole.

Following are the related party transactions and balances that were eliminated during the consolidation:

- MACS' BOD passed a resolution in 2007 whereby its stockholders, MAC and SATS, shall receive service fee provided that MACS' profit before tax, after calculating the service fee, is not less than the amount of the service fee. The fee shall be equivalent to 5% of the quarterly net sales which shall be divided according to the equity ratio between MAC and SATS (80% and 20%, respectively). Service fee of MACS recognized by MAC amounted to ₱38 million in 2014.
- In 2014, the BOD of MAC charged service fee to MASCORP equivalent to 20% of income before interest, income tax, depreciation and amortization. Total service fee earned amounted to ₱12.6 million.
- MAC has a rental agreement with MAATS for the use of MAC's helicopter for six months, renewable every six months at the option of both parties. The rental fee consists of a basic monthly fee of ₱44,000 plus an amount computed at a rate based on flying time. Rental fees charged to MAATS amounted to ₱1.2 million in 2014. Total short-term and noninterest-bearing advances to MAATS amounted to ₱5.5 million as of December 31, 2014.
- MAATS declared dividends during the year. Outstanding dividends receivable by MAC amounts to ₱8.3 million as of December 31, 2014.
- MMC obtains noninterest-bearing cash advances from MAC and MAPDC. Outstanding amount of advances from MAC amounted to ₱24.5 million as of December 31, 2014. Meanwhile, outstanding amount of advances from MAPDC amounted to ₱2.7 million as of December 31, 2014.
- AASC obtains noninterest-bearing advances from MAC in the normal course of business. Outstanding advances amounted to ₱0.3 million as of December 31, 2014.

Common Stock	2,000,000,000	1,250,000,000	(16,596,000)	1,233,404,000	-	875,035,000 (70.94%)	67,971,000 (5.51%)

MacroAsia Corporation and Subsidiaries
Schedule I - Financial Soundness Indicators
As of December 31, 2014 and 2013

	<u>2014</u>	<u>2013</u>
Return on Net Sales (RNS) ¹	6.67%	(10.56%)
Return on Investment (ROI) ²	4.07%	(6.63%)
Return on Equity (ROE) ³	4.20%	(6.70%)
Direct Cost Ratio ⁴	77.12%	76.37%
Operating Expense Ratio ⁴	24.82%	23.33%
Current Ratio ⁵	4.18:1	4.58:1
Debt-to-Equity Ratio ⁶	3%	1%
Interest Coverage Ratio ⁷	3,736%	N/A
Asset-to-Equity Ratio ⁸	1.18:1	1.18:1

¹ This is the ratio is computed by dividing net income attributable to equity holders of the parent by the total net revenues.

² This ratio is computed by dividing net income attributable to equity holders of the parent by the sum of total interest-bearing liabilities plus equity attributable to equity holders of the parent.

³ This ratio is computed by dividing net income attributable to equity holders of the parent by the equity attributable to equity holders of the parent.

⁴ Direct Cost ratio is computed by dividing total cost over total net revenues, while total operating expenses is divided by total net revenues to arrive at operating expense ratio.

⁵ Current Ratio is the ratio of the total current assets divided by the total current liabilities.

⁶ Debt-to-Equity Ratio is the ratio of the total interest-bearing debts divided by total stockholders' equity.

⁷ Interest coverage ratio is the ratio of the total earnings before interest and taxes (EBIT) divided by the interest expense of the period.

⁸ The asset-to-equity ratio is the total assets divided by the equity.
